Subject: Please OPPOSE proposed Charter amendment (File #110401)

---

Honorable Supervisors,

I strongly urge you to oppose Supervisor Wiener's proposed Charter amendment (File #110401) that would allow changes to be made after the fact by later Boards of Supervisors and Mayors to ALL ordinances passed by the voters, including retroactively any and all that were passed before November 8, 2011, after 3 or 7 years have elapsed.

Currently only the voters can alter or amend ordinances passed by the voters, which is a protection against government's negating the will of the voters. This Charter amendment would remove that protection, notwithstanding a provision that any changes must further the purposes of the initiative, since the purposes of an initiative and the effects of proposed changes may be subject to interpretation and manipulation by a government that may wish to weaken an initiative previously passed by the voters and to do so without their consent. Requiring that 3 years or 7 years must elapse before any alteration may be made does not remove the deleterious effect of this amendment.

The wheels of government necessarily move slowly and inefficiently in a democracy. This Charter amendment seems to be a solution in search of a problem. There is no problem here, unless it be democracy itself, for there already exists a process for revising any initiative, whether it be flawed or merely undesirable, by returning it to the voters once again for reconsideration or revision.

I seriously urge you to oppose this probably well-intentioned but potentially damaging proposed Charter amendment.

Sincerely yours,

Judith Hoyem

EDWIN M. LEE  
MAYOR

June 1, 2011

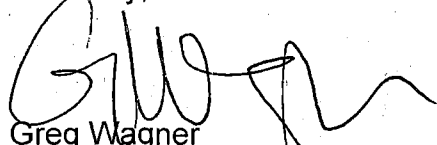

Angela Calvillo  
Clerk of the Board of Supervisors  
1 Dr. Carlton B. Goodlett Pl. Room 244  
San Francisco, CA 94102

Dear Ms. Calvillo:

As required under the San Francisco Administrative Code, SEC 12P.3 (ii), this letter provides notice to the Board of Supervisors that the Mayor's Proposed Budget for fiscal year 2011-2012 does not contain funding for consumer price index increases for nonprofit corporations or public entities for the coming fiscal year, nor for prior years. Because the City's Joint Report, issued on April 7, 2011, projects a \$306 million budgetary shortfall for the coming fiscal year, it would not be feasible to provide this funding through other budgetary reductions without jeopardizing City operations.

If you have any questions, please contact my office.

Sincerely,

  
Greg Wagner  
Mayor's Budget Director

---

Date: June 1, 2011  
To: Honorable Members, Board of Supervisors  
From:  Angela Calvillo, Clerk of the Board  
Subject: Notice of Transfer of Function Under Charter Section 4.132

---

Pursuant to Charter Section 4.132, Mayor Edwin Lee has issued a notice to the Board of Supervisors, dated June 1, 2011, announcing a plan to reorganize duties and functions between departments and other units of government within the executive branch. The notice attached describes the specific positions being transferred.

Such reorganization shall become effective 30 days after its issuance unless disapproved by the Board of Supervisors during that time. If you would like to hold a hearing on any of these transfer of function items, please let me know by Friday, June 10.

**Re: Notice of Transfer of Function under Charter Section 4.132**

Dear Madam Clerk:

This letter constitutes a notice to the Board of Supervisors under Charter Section 4.132 of a transfer of function between departments within the Executive including:

- Twenty-five positions (4.0 FTE 1705, 7.0 FTE 8202, 12.0 FTE 8204 and 2.0 FTE 8205) will transfer from the Sheriff's Department to the Department of Public Health to provide security services at the clinics and other DPH facilities.
- Thirteen positions (1.0 FTE 0923, 7.0 FTE 1404, 2.0 FTE 1406, 1.0 FTE 1408, 1.0 FTE 1424, 1.0 FTE 1762) will transfer from the Department of Technology to the City Administrator so that the City Administrator oversees the City's Reproduction and Mail services.
- One position (1.0 FTE 1224) will transfer from the Department of Human Resources to the Office of the Assessor-Recorder to provide human resource management.
- One position (1.0 FTE 0931) will transfer from the Department of Human Resources to the Department of Building Inspection to provide human resource management.
- One position (1.0 FTE 1043, Limited Term) will transfer from the Police Department to the Department of Technology to support the City's Data Center Consolidation project.

If you have any questions please feel free to contact me at 554-6486.

Sincerely,

Greetings,

As you know, after the San Francisco Board of Supervisors voted 8-3 against a measure to ban sitting on city sidewalks in June 2010, Mayor Gavin Newsom took Proposition L, better known as the sit-lie ordinance, to the ballot.

Supporters, especially businesspeople in the Haight-Ashbury neighborhood, said it would curb loitering and aggressive panhandling. But since the police acknowledge that enforcement will be "complaint-driven," opponents are sure it will be unfairly used against homeless people.

Penalties for repeat offenders include 30-day jail sentences and \$500 fines. Officials can go ahead and add to that jail sentence, since \$500 might as well be \$1,000,000 for many of the city's homeless. It makes no sense to put people in jail, costing taxpayers money, because they can't pay a fine.

Please take action once again to end this discriminatory sidewalk sitting ban.

Greetings,

It has been a year after the prohibition against sitting or lying on San Francisco sidewalks and police officers have begun enforcing the law known as Sit/Lie. Being that the Board of Supervisors mission is to “respond to the needs of the people of the City and County of San Francisco...” it is very contradicting that this law is even in place.

It is extremely important to emphasize on the real needs of many of the residents in San Francisco. This law is targeting the innocent act of sitting or lying and it happens that the population that is being targeted is primarily homeless individuals. Many of the individuals whom are homeless are recent immigrants, seniors, mentally ill, addictively ill, veterans, and working poor. Many of them are poor and homeless who are trying to adapt to a new language and environment, live off the little income they receive, lack the appropriate health care services, and/or barely make it through with their wages. Taking that into consideration it is very conflicting and irrational that fining \$50 to \$500 and possibly even jail time is going to address the needs of the community.

Having police officers give out warnings and citations is not helping address the real problem. Please consider an attempt to end the discriminatory sidewalk sit-lie ordinance and focus on the outreach and provide services for those who chronically sit or lie on public sidewalks.

Subject: Overturn San Francisco's Discriminatory Sidewalk Sitting Ban

---

Greetings,

As you know, after the San Francisco Board of Supervisors voted 8-3 against a measure to ban sitting on city sidewalks in June 2010, Mayor Gavin Newsom took Proposition L, better known as the sit-lie ordinance, to the ballot.

Supporters, especially businesspeople in the Haight-Ashbury neighborhood, said it would curb loitering and aggressive panhandling. But since the police acknowledge that enforcement will be "complaint-driven," opponents are sure it will be unfairly used against homeless people.

Penalties for repeat offenders include 30-day jail sentences and \$500 fines. Officials can go ahead and add to that jail sentence, since \$500 might as well be \$1,000,000 for many of the city's homeless. It makes no sense to put people in jail, costing taxpayers money, because they can't pay a fine.

Please take action once again to end this discriminatory sidewalk sitting ban.

Andre Rabie

Subject: End the Sidewalk Sit-Lie Ordinance

---

Greetings,

It has been a year after the prohibition against sitting or lying on San Francisco sidewalks and police officers have begun enforcing the law known as Sit/Lie. Being that the Board of Supervisors mission is to "respond to the needs of the people of the City and County of San Francisco..." it is very contradicting that this law is even in place.

It is extremely important to emphasize on the real needs of many of the residents in San Francisco. This law is targeting the innocent act of sitting or lying and it happens that the population that is being targeted is primarily homeless individuals. Many of the individuals whom are homeless are recent immigrants, seniors, mentally ill, addictively ill, veterans, and working poor. Many of them are poor and homeless who are trying to adapt to a new language and environment, live off the little income they receive, lack the appropriate health care services,

and/or barely make it through with their wages. Taking that into consideration it is very conflicting and irrational that fining \$50 to \$500 and possibly even jail time is going to address the needs of the community.

Having police officers give out warnings and citations is not helping address the real problem. Please consider an attempt to end the discriminatory sidewalk sit-lie ordinance and focus on the outreach and provide services for those who chronically sit or lie on public sidewalks.

Holly Greene  
Crescent City, CA

RE: File Number 110652: Amendment to the Memorandum of Understanding (MOU) with the San Francisco District Attorney Investigator's Association

Dear Ms. Calvillo,

In accordance with Ordinance 92-94, I am submitting a cost analysis of the MOU between the City and County of San Francisco and the San Francisco District Attorney Investigator's Association. The amendment applies to the period commencing July 1, 2011 through June 30, 2012, affecting 40 authorized positions with a salary base of approximately \$4.2 million and an overall pay and benefits base of approximately \$5.7 million.

Based on our analysis, the ordinance will result in a \$240,120 cost savings in FY 2011-12. The savings will be realized through a 4.62% annualized wage reduction in exchange for 12 floating furlough days. The MOU continues the wage reduction and furloughs that are in effect during FY 2010-11, which were scheduled to expire on June 10, 2011.

If you have additional questions or concerns please contact me at 554-7500 or Michelle Allersma of my staff at 554-4792.

Sincerely,

Ben Rosenfield  
Controller

RE: File Number 110653: Unrepresented Employees Ordinance

Dear Ms. Calvillo,

In accordance with Ordinance 92-94, I am submitting a cost analysis of the Unrepresented Employees Ordinance. The ordinance covers the period July 1, 2011 through June 30, 2012, affecting 136 authorized positions with an overall pay and benefits base of approximately \$12.1 million. As members of the Public Employees Committee of the San Francisco Labor Council (PEC), employees have agreed to the terms in the summary letter.

Based on our analysis, the ordinance will result in savings of approximately \$923,000 in FY 2011-12. The savings will be realized primarily through an exchange through which employees will pay their own employee retirement contribution, which is set at 7.5% in the San Francisco Charter and is currently paid by the City, in exchange for a base wage increase of 5.75%. This swap will result in increased salary costs of approximately \$445,000 offset by savings of approximately \$884,000, for a net savings of \$440,000 in FY2011-12.

Also included in the ordinance are several wage concessions. For covered employees other than Mayoral staff, deferral of a 3.5% wage increase and a 1.25% wage reduction will result in savings of approximately \$273,000 in FY 2011-12. Mayoral staff wages will be reduced by 4.5%, resulting in approximately \$191,000 in savings.

If you have additional questions or concerns please contact me at 554-7500 or Michelle Allersma of my staff at 554-4792.

Sincerely,

Ben Rosenfield  
Controller

### Supervisors:

As you know, the Mayor held a series of meetings in April with CBO leadership representative of citywide CBOs. Supervisor Chu attended most of those meetings, as well as some of your legislative aides. The Mayor held a wrap-up meeting with this same group yesterday, and I wanted to share with you the information that was presented. Please find attached a budget narrative explaining the proposed budgets for HSA, DAAS, DPH and DCYF as well as the spreadsheets they distributed at the meeting.

Greg and I have been making the rounds to update you on where the budget is, but we haven't reached everyone yet. In the interim, the Mayor wanted to make sure you had this information - most of which you likely are already fairly familiar with. Please feel free to call with any questions.

Please note that we are in the process of compiling an updated CBO crosswalk spreadsheet - we hope to have that out early next week.

Enjoy the long weekend,  
Starr

## Community, Mayor, Department Budget Collaboration

### Outcomes of FY11-12 Budget Engagement Process

---

Over the past four months, the Mayor, Department leadership and CBO leadership from across the City participated in budget “working sessions” involving the Health and Human Services policy area and the specific budget proposals of the Department of Public Health, the Department of Children, Youth and Their Families, and the Human Services Agency. These budget “working sessions” led to the following budget Policy Priorities and in turn, to concrete changes in the Mayor’s Fiscal Year 2011-12 Proposed Budget.

#### Budget Policy Priorities

1. Preserve programs and services that meet basic human needs: housing/shelter, food & nutrition, protection/safety, emergency assistance, and access to healthcare and income support.
2. Prioritize the most vulnerable, including those at the highest risk for negative consequences and/or with multiple issues and barriers.
3. Prioritize/Minimize reductions to services and programs that leverage outside revenues (for example: state, federal, private, donations, and client fees).
4. Prioritize services that directly benefit individuals and prevent higher costs to the City and/or higher service costs.
5. Prioritize services that will be lost and non-renewable (such as facilities) if they are eliminated.
6. Support the diverse expertise and experience of the system of care – which includes a variety of care: neighborhood based, population based, Family Resource Centers, and other programs that support families.
7. Prioritize the commitment to community-based care – for service delivery and outreach; and to prevent institutionalization, incarceration, and the utilization of high-end care.
8. Consider program effectiveness when making budget reductions in specific programs or initiatives.

#### Outcomes

While each Department will present in more detail on their changes, the following table summarizes the funding adjustments in the Mayor’s Proposed Budget:

\$ millions	Proposed Reductions	Accepted Reductions	Change	% Change
DCYF	5.6	2.8	(2.80)	50%
DPH	12.1	5.5	(6.60)	55%
DHS	3.3	1.8	(1.50)	46%
DAAS	4.8	1.4	(3.40)	71%
Total	\$25.80	\$11.50	(14.30)	57%

**DEPARTMENT OF CHILDREN, YOUTH & THEIR FAMILIES (DCYF)**

---

To remain consistent with the department’s Children’s Services Allocation Plan (CSAP) and Request for Proposal (RFP) processes, the department initially proposed a percentage reduction to all FY10-11 one-time funds to reach their 10% General Fund reduction target. To reach its 10% contingency target, DCYF proposed eliminating all one-time funds from 10-11 in order to keep RFP recipients and other grantees fully funded according to their current contracts with DCYF.

**KEY CHANGES**

After the community engagement process with the Mayor, members of the Board and community leadership, several specific funding principles and concerns were identified, including the need to:

- Preserve Direct Services.
- Prioritize service access and funding for:
  - Early Child Care and Education (ECE);
  - Family Resource Centers (FRC); and
  - Youth Workforce Development (YWD).
- Prioritize service access and funding for special populations including immigrants, LGBTQ, and Transitional Aged Youth.

In light of these principles, the Mayor’s Proposed Budget re-prioritizes DCYF’s funding to meet these criteria and only includes a 10% General Fund reduction, rather than the full 20% target.

\$ millions	Proposed Reductions	Accepted Reductions	Change	% Change
DCYF	\$5.60	\$2.80	(\$2.80)	50%

**REPRIORITIZED REDUCTIONS**

In its re-prioritized reduction strategy, DCYF distributed reductions across each of the department’s service areas. The following are the service areas reduction strategies:

- Early Child Education (ECE) Total Proposed Funding: \$13 million
  - Proposed reduction (\$150,000) – Eliminate non-Direct Services. Preserve all direct-services.
- Family Support Total Proposed Funding from DCYF: \$4.4 million
  - Proposed reduction (\$175,000) – Eliminate non-Direct Services and preserve Family Resource Centers.
- Out of School Time (OST) Total Proposed Funding: \$19.5 million
  - Proposed reduction (\$117,200) – Eliminate Technical Assistance and reduce remaining services by 45%.
  - Proposed reduction (\$457,400) – Reduce 35% of one-time funds. Preserve funded programs under \$75,000.
- Violence Prevention Initiative (VPI) Total Proposed Funding: \$6.1 million
  - Proposed reduction: VPI (\$1,042,314) – Extend one-time funded contracts for six-months with a 5% reduction. Issue a new RFP in September for any program wishing to

continue. New contracts to begin January 2012. DCYF has worked extensively with providers in VPI and have gained their support in this strategy.

- Youth Leadership (Y-Lead) Total Proposed Funding: \$18 million
  - Proposed reduction: Workforce (\$360,000) – Eliminate programs that did not apply to the FY10-13 RFP; Apply 15% reductions to all others.
  - Specialized Teen (\$341,201) – Reduce 35% of one-time dollars. Preserve all programs under \$75,000.
  - TAY(\$9,600) – 10% reduction
  - Health & Wellness (\$30,000) – 100% reduction of one-time dollars

**DEPARTMENT OF PUBLIC HEALTH (DPH)**

---

DPH is the largest City department, with a budget of \$1.5 billion including roughly \$348 million in General Fund. As a result, DPH was assigned the largest general fund reduction target of \$34.8 million and a contingency target of \$34.8 million. As the provider of last resort, DPH sought to maximize all revenue options and to maintain as many services as possible. In the majority of instances, General Fund dollars are used to leverage other revenues and/or fund the cost of services that revenues do not completely cover. For these reasons, DPH’s initial budget proposal included two central strategies:

**I. Maximize Revenue and Efficiencies to Maintain Services**

DPH was able to project significant additional revenues from the new Medi-Cal Waiver for San Francisco General Hospital, one-time revenues from a change in prior year Short-Doyle Medi-Cal Reimbursements for mental health and from changes in payment rates to Laguna Honda Hospital. In addition, DPH sought efficiencies in the next fiscal year to reduce existing costs, including contracting out Sheriff security services at the hospitals without any resulting layoffs. This will result in \$2.0 million in savings at DPH alone. The Sheriff’s department would also achieve additional overtime savings as Sheriff deputies are returned to posts at the jails.

**II. Make Additional Reductions to Unmatched General Fund**

Through revenues and efficiencies, DPH was able to meet \$57 million of the targeted reduction without cuts to services or support. To meet its remaining reduction target, the department, however, had to propose over \$10 million of service reduction. The proposals included:

- \$3.6 million in contract reductions to residential behavioral health programs;
- \$4.2 million in contract reductions to non-residential behavioral health programs;
- Elimination of 10 civil service staff positions in Behavioral Health, worth \$1.2 million; and
- \$1.1 million in savings in Housing and Urban Health by transferring 55 existing housing units and 70 stabilization beds into new supportive housing units

\$ millions	Proposed Reductions	Accepted Reductions	Change	% Change
DPH	12.1	5.5	(6.60)	55%

After the community engagement process with the Mayor, the Mayor's Proposed Budget reflects several changes to DPHs' contingency plan, including:

- No reductions to residential behavioral health programs. The Mayor's Proposed Budget fully funds all residential treatment programs. Due to the collective decision to prioritize services for the most vulnerable, the Mayor did not accept any reductions in this service area. This decision maintained \$3.6 million for various programs across the City.
- \$1 million restoration of for non-residential contracts. With a cut proposal of \$4.2 million to non-residential treatment programs, the Mayor's Proposed Budget retains \$1 million in funding for these programs. Recognizing that agencies with smaller contracts have less flexibility to manage reductions, funding for 23 agencies with community behavioral health contract totaling less than \$1 million was prioritized.
- Retention of permanent housing units. As permanent housing is critical to keeping patients healthy, 55 housing units at the Star Hotel will be maintained.
- Retention of 10 civil services positions in behavior health clinics. The department also found additional one-time efficiencies to maintain these positions, which are critical for patient flow and efficient clinic operations.

### Human Services Agency

---

As part of the department's reductions for the FY 2011-12 Budget, HSA submitted \$8.1 million in reduction that would have direct service impacts on health and human service clients. This includes \$3.3 million from the Department of Human Services (DHS) and \$4.8 million from the Department of Aging and Adult Services (DAAS).

\$ millions	Proposed Reductions	Accepted Reductions	Change	% Change
DHS	\$3.3	1.8	-1.5	46%
DAAS	4.8	1.4	-3.4	71%
Total	8.1	3.2	-4.9	61%

Feedback provided by CBOs included a desire to preserve core services to the most vulnerable populations and maintain funds that leverage non-local support. Also, it was clear that contractors providing these core services have taken hard budget cuts over the past several years and, in some cases, are at a breaking point in their ability to continue operations. As a result of this input, the Mayor and the department determined that proposed reductions to the following program areas should be adjusted by the following amounts:

#### Human Services

1. Maintain current services at Drop-In Centers rather than RFP for shelter reservation services (\$898k);
2. Maintain 24-hour service at the Next Door Shelter rather than reduce to 15-hours (\$181k); and
3. Reduce cuts to CBOs operating and providing services at permanent supportive housing sites to single adults (\$270k) and to families (\$139k). While DHS's proposal for supportive housing continues to impact contracts, this funding reduction is consistent with the department's effort to standardize funding levels across programs for similar services without reducing the number of housing units available to low-income populations (\$409k total).

**Aging and Adult Services**

1. Reject increased health premium co-pays from \$10 to \$15 and elimination of dental benefits to IHSS Public Authority care providers (\$1.9M);
2. Full preservation of funding for vulnerable populations including Hoarders and Clutterers (\$100k), Alzheimer's Day Care Resource Centers (\$186k), Nutrition (\$600k), and Senior Companion (\$22k) services (\$908k total);
3. Reduce cuts to services that directly benefit vulnerable populations including:
  - a. Transitional Care Case Management with a focus consumers who are transitioning from acute hospitalizations back to the community (\$80k);
  - b. Case Management, with an effort to maintain an equitable distribution of case management programs across the city (\$108k);
  - c. Transportation Program Reduction, while the Taxi Voucher program will be eliminated, transportation to senior centers and grocery shopping trips will be retained (\$190k);
  - d. Senior Centers and Activity Centers for Adults with Disabilities, DAAS will work with providers to implement plans that result in doing the least harm to consumers (\$153k);
  - e. Legal Services Reduction to provide access to legal advice and resources to seniors and adults with disabilities (\$95k); and
  - f. Naturalization Program Reduction for services that aid in completing and filing of naturalization applications and/or assist in preparing seniors and adults with disabilities to pass citizenship tests (\$95k).

\$9.33M 10% Reduction Target:

Dpt	Program	CBO	Item	FY10-11 Budget	FY10-11 GF Share of Reduction	FY11-12 GF Share of Reduction	Total GF Reduction	FY11-12 Remaining Budget	Notes
DHS	CALWORKS	EARN	Eliminate IDA Program -- 62 existing accounts, 20 new	\$50,000	\$0	\$50,000	\$50,000	\$0	Reduction would mean no new IDA's (savings accounts) for FY 11-12. Would mean about 20 clients could not open new accounts.
				\$91,559	\$0	\$91,559	\$91,559	\$0	Reduction would eliminate support for EARN to service already opened accounts in FY 11-12 (approx 62 accounts).

June 2, 2011

To: Supervisor Campos  
Cc: Supervisor Chiu, Supervisor Farrell and the Clerk of the Board  
From: Jennifer Browne, Assistant Director  
Subject: Outreach Advertising Term Contract – Follow Up to May 26, 2011 Committee Meeting

RECEIVED  
BOARD OF SUPERVISORS  
SAN FRANCISCO  
2011 JUN -3 AM 9:53  
BY [initials]

In follow up to the Government Audit and Oversight Committee meeting of May 26, 2011, the Office of Contract Administration would like to provide additional information that addresses some of the questions raised during the meeting:

- For the FY 12-13 term contract bid, OCA will increase invitations to bid by 93% by conducting outreach to approximately 54 local newspapers. As in prior years, OCA's recommendation to the Board of Supervisors will be based on vendor responsiveness and points awarded during bid evaluation (in accordance with Admin. Code 2.81-3).
- OCA will pursue all legal and appropriate methods to negotiate reduced pricing with bidders
- The total anticipated spend under this term contract is approximately \$30K - \$40K per year with decreases based on legislation that reduced ad size as a cost cutting measure
- OCA regulations require that we officially recommend only responsive bidders for contract award but the Board of Supervisors has historically used its discretion to award the Outreach Advertising contract to a broader range of bidders to best serve the City's outreach advertising needs

	FY 10-11	FY 11-12	FY 12-13 (plan)
Newspapers Invited to Bid	8	28	54
Bids Received by OCA	8	14	tbd
OCA Recommended Awardees	5	5	tbd
BOS approved Awardees	8	13	tbd

Please find further detail in the attached spreadsheets regarding FY 10-11 awards, FY 11-12 bids and recommended awards, bid prices, circulation, and bid evaluation criteria. I have also included the newspaper database OCA has begun compiling for next year's term contract bid for your review.

If you have any additional questions, please contact me at 415-554-4751.

Dear Board of Supervisors

I am writing to urge the City of San Francisco to turn the Sharp Park Golf Course over to its next door neighbor, the National Park Service. The Sharp Park Wetlands provide critical habitat for the endangered California Red-Legged Frog and a variety of other wildlife. Both frogs and wetlands are rapidly disappearing in California and worldwide, so it is disconcerting that the City of San Francisco is currently using taxpayer dollars to pump the Sharp Park Wetlands dry, killing endangered frogs in the process, and violating state and federal laws.

The Sharp Park Golf Course has a long history of environmental and economic troubles, and the time has clearly come for the City of San Francisco to change course. By closing the golf course and handing the land over to the National Park Service, the City of San Francisco would relieve itself of its current financial, legal and environmental burden, and it would also clearly mark itself as a world leader in environmental protection efforts.

The restored Sharp Park Wetlands would be a safe haven for threatened wildlife and would provide valuable recreational opportunities to San Francisco residents and tourists alike. This would not only improve the quality of life for San Francisco's residents, it would increase the long-term economic value of the property.

On behalf of all those who enjoy nature and wildlife, thanks for your consideration.

San Francisco Board of Supervisors  
1 Dr. Carlton B. Goodlett Place, Rm. 244  
San Francisco, CA 94102

RECEIVED  
BOARD OF SUPERVISORS  
SAN FRANCISCO

2011 MAY 27 PM 2:57

BY AK

Dear San Francisco Board of Supervisors:

My name is Julie Dull and I live at 1043 Crestwood Drive in South San Francisco. I am writing to urge the City and County of San Francisco to close Sharp Park Golf Course and create a new public park at Sharp Park in partnership with the National Park Service. A new public park will protect our environment, return financial resources to San Francisco's neighborhood parks, and create recreational amenities that everyone can enjoy.

Sharp Park Golf Course has a long history of environmental problems, largely because of its poor design and unfortunate placement. The current operation of the golf course harms the habitat and causes take of two species protected by the federal Endangered Species Act: the California red-legged frog and the San Francisco garter snake. San Francisco is not permitted by the federal or state government to cause this harm.

Closing the golf course and managing the property in conjunction with the National Park Service will free up city resources that can be redirected to neighborhood parks and community services in desperate need of financial resources. Closing the golf course is also the most fiscally prudent method for optimizing recreational uses of Sharp Park.

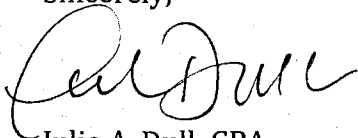

Congresswoman Jackie Speier has requested a \$5 million federal bailout for Sharp Park Golf Course. Although this would only cover part of the massive capital expenditures needed to continue operating a golf course at the site, this use of federal money is inappropriate. I oppose a federal bailout for the golf course: if federal money is going to be part of the solution at Sharp Park, taxpayers deserve an asset in return, and the best asset would be a new National Park that protects endangered species while providing recreational opportunities everyone can enjoy.

A new public park at Sharp Park will provide access to hiking trails, picnicking spots, camping facilities, as well as environmental education opportunities. These are the amenities that modern Bay Area residents consistently request in survey after survey, including surveys conducted by the Recreation and Parks Department.

A new public park will also ensure the continued existence and abundance of two endangered species that San Francisco is charged with protecting; it will improve public access to coastal recreation; and it will make the coastline more resilient to the storm surges and flooding events that are expected to be exacerbated by global warming.

I ask that the City close Sharp Park Golf Course and create a new public park in partnership with the National Park Service. Thank you for this opportunity to express my concern and to give my support for a new public park at Sharp Park.

Sincerely,

Julie A. Dull, CPA

President and Members:

As required by Section 2.10 of the San Francisco Administrative Code, the Office of the Controller (Controller) has updated the status of the implementation of the recommendations of the San Francisco Civil Grand Jury.

The Controller's Office will continue to track civil grand jury recommendations until the respondent indicates an agreed-to-be-implemented recommendation is fully implemented or abandoned because it is no longer reasonable or warranted. The updates for fiscal years 2003-2004 through 2009-2010 are posted on the Controller's website located at <http://sfcontroller.org/index.aspx?page=143>.

Respectfully submitted,

Ben Rosenfield

Invest in City College!  
Robert to: Board of Supervisors

06/02/2011 06:47 PM

To Mayor Lee and Supervisors: City College provides critical educational opportunities to 100,000 working students every year. Our future depends on quality, affordable education. Students have it hard enough as it is -- let's give students a break by eliminating the \$2 million in service fees charged to City College.

Sincerely,

Robert

Subject: REFERENCE: 20110426-003 City Fiber Revenue Opportunities

This letter is in regards to the request by David Chiu, President of the Board, on 4/26/2011 that the Department of Technology to provide analysis of possible revenue from leasing unused City and County fiber-optic network capacity.

The Department of Technology (DT) has attached a report outlining the opportunities and challenges of the City and County of San Francisco providing dark fiber services to customers as a leased service. DT notes in the report that the department analysis and industry trends show this to be a feasible revenue opportunity for the city and recommends moving forward to sign lease agreements with customers. The first lease for this type of service was signed on 5/18/2011 between the City and CENIC / UCSF for dark fiber. The attached report outlines other potential customers DT is in discussions with and the potential one-time and annual revenues this service could provide to the City.

Regards,

Jon Walton

Subject: Revenue Generation Potential from Dark Fiber

MEMORANDUM

The Department of Technology (DT) has owned, maintained, and operated its own communications infrastructure for more than 100 years. A key part of this infrastructure is a fiber optic network, comprised of over 110 miles of fiber optic cable. DT is continually expanding its fiber infrastructure, and in the past year alone has installed approximately eight new miles of fiber to connect thirteen additional facilities operated by five departments. Fiber optic communications operates by transmitting light through strands of glass that is approximately the thickness of a strand of hair. Fiber is "lit" when network equipment at either end of the fiber transmits and receives light, and "dark" when installed but not used. The owner of the fiber, in this case the City, would be responsible for maintaining fiber optic infrastructure and the customer would be responsible for maintaining the network equipment that would send and receive data on the this infrastructure.

As the fiber network expands, DT's has placed more strands of fiber that needs immediate demand, in order to avoid the need to pull new fiber cables or dig new trenches. For example, DT typically installs 312 strands of fiber cable for backbone for each new extension, even though current usage rarely exceeds 12 strands. This approach is cost effective because the cost of labor is over 85% of the cost of installing fiber.

Leasing this unused fiber to non-City entities represents an opportunity to generate revenue for the City. These strands are fully isolated from fiber used for City purposes. The City would lease "dark fiber" where the third party would be responsible for placing optical equipment at each end of the fiber to send and transmit data through laser transceivers. The City would be responsible for maintaining the physical fiber, but not the data riding over the fiber infrastructure.

Research indicates that there is a growing demand and a strong potential market for dark fiber in San Francisco. DT has conducted research in this area, including commissioning two comprehensive and widely acclaimed "Fiber Studies" completed by Columbia Telecommunications Corporation (CTC), as well as applying for a federal stimulus grant for broadband infrastructure. We rely heavily on this prior work for this analysis<sup>1</sup>. In addition, we have experienced a growing number of inquiries and requests to use City fiber from a diverse group of nonprofit and commercial entities.

---

<sup>1</sup> The fiber feasibility study can be found here: <http://www.sfgov3.org/index.aspx?page=1442> . The broadband infrastructure grant application here: [http://www.sfgov3.org/ftp/uploadedfiles/dtis/tech\\_connect/CCI%20final%20application.pdf](http://www.sfgov3.org/ftp/uploadedfiles/dtis/tech_connect/CCI%20final%20application.pdf).

This Memorandum will focus primarily on the market for dark fiber and fiber-based services that would maximize DT's existing dark fiber and potentially create a revenue source for the City.

### **Business Description**

DT has installed dark fiber for a limited number of external institutions, including City College, San Francisco State University, the California Institute for Regenerative Medicine, California Academy of Sciences, the Bay Area Video Coalition (BAVC) and the Internet Archive. DT has begun to accelerate this effort, entering into a recently signed agreement with the Corporation for Educational Networks in California and the University of California, San Francisco (UCSF) to install dark fiber to key UCSF facilities. The City UCSF and CENIC are currently discussing two additional phases of this network, one that would connect all of the City Department of Public Health (DPH) neighborhood and jail based clinics to allow UCSF physicians to serve patients remotely, and a second that would connect UCSF facilities throughout the City.

From construction to operations and maintenance, DT staff has the skills necessary to expand the citywide network to serve a larger percentage of external clients, including community anchor institutions, other government entities and businesses. DT maintains an extremely high level of in-house implementation and operations expertise. In terms of customer-facing network management, DT network staff can be seen as having roles similar to those undertaken by a large facilities-based Internet service provider, including attending to the needs of customers, making physical connections, managing network electronics, connecting to outside service providers, keeping information secure, hosting information, managing infrastructure and growing the network to serve increasing demands.

### **Current Market for Dark Fiber**

San Francisco's private broadband infrastructure is fairly typical of urban areas. The City's central business district (Financial District and South of Market) is well served by multiple broadband providers with fiber rings, including AT&T, Level 3, AboveNet, Verizon and others offer facilities based high speed networks. Gradually, the incumbent phone and cable providers have been extending fiber deeper into residential neighborhoods to server relatively large institutions, such as schools, and aggregation points for residential services (also known as fiber to the node FTTN). The traditional providers do not offer dark fiber, but only managed services where the provider supplies both the fiber and manages the network equipment that transmits data, while some of the newer providers offer dark fiber.

There are some exceptions to this general pattern:

- In new developments, such as Mission Bay, AT&T has deployed fiber to the premises (FTTP).
- The San Francisco Unified School District (SFUSD), Department of Public Health and Library, can get fiber-based managed Ethernet services, such as AT&T's Opt-E-Man.
- Large institutions with heavy bandwidth needs, such as Lucas Film, can afford to obtain special fiber builds when they are reasonably close to the path of a regional route.

Evidence indicates that there is a high demand for affordable dark fiber in San Francisco. Dark fiber remains very expensive in the neighborhoods where it is available, and is unobtainable in other neighborhoods. For many anchor institutions and small businesses, these high costs have

stifled all initiatives to develop local networks or applications that require dark fiber or dedicated private networks.

City leased fiber will provide lower price points and more flexibility than services currently offered by the incumbent carriers. Direct leasing of City dark fiber to the anchor customer would be capable of speeds of 10-100 of Gbps with the right equipment and optics.

### **Potential Customers**

#### 1. Education, Health Care and Digital Media

Dark fiber will be of particular interest to industries that require high bandwidth, such as education, health care, biotechnology and digital media. Dark fiber would offer these industries nearly infinite bandwidth, only limited by their investment in optical and electronic equipment at the end of the fiber. City fiber would allow customers to create value-added services not supported by managed services.

#### 2. Economic Development Areas

The availability of dark fiber in economic rehabilitation zones, such as the Central Market Street and Tenderloin area, that the City has identified for economic development incentives could provide another inducement for bandwidth intensive industries to stay or locate to these areas. The City could offer a standard service package in a restricted area, by conducting advance research on the cost of providing service and working with the Mayor's Office of Economic and Workforce Development on marketing the service to potential and existing occupants.

#### 3. Competitive Last Mile Internet Service Providers (ISPs) and Wireless (ISPs)

The City's fiber network can act as critical backbone for last mile providers. In connection with our Broadband Technology Opportunity Program (BTOP) infrastructure grant application, the City received letters from a variety of last mile ISPs, including Sonic, Raw Bandwidth, WebPass and Tower Stream, expressing strong interest in leasing fiber from the City. Sonic, a regional ISP has expressed an interest in interconnecting with the City's middle mile network as part of a proposed FTTx network build in San Francisco's neighborhoods. Without much fanfare, the company is currently building an open access FTTx in nearby Sonoma County<sup>2</sup>.

Sonic states that "Interconnection with the City's network will allow Sonic.net to obtain middle mile connectivity that will reduce our cost of doing business and result in lower cost, much higher speed Internet service to City customers."

In San Francisco, evidence indicates that competitive last mile service providers are not adequately served by existing commercial broadband services, primarily due to the excessive cost of connecting end users network. For example, in its attached letter, potential last mile partner Raw Bandwidth states:

---

<sup>2</sup> <http://www.pressdemocrat.com/article/20100321/BUSINESS/3211022>

“Over the past decade providing broadband services, I’ve watched as the Internet bandwidth we obtain in well-connected datacenters has dropped substantially in cost, while the middle mile bandwidth (ATM) to connect to our existing ADSL customers provisioned on AT&T’s legacy wholesale platform has actually risen since that time to the point it costs us significantly more to move bits across town than it does to move them across the country and internationally. There is nothing other than the existing virtual monopoly for middle-mile bandwidth (and in the case of middle-mile bandwidth to connect wholesale DSL circuits leased from AT&T to us, a true monopoly) that causes this to be.”

By creating a purely wholesale middle mile network, charging a cost based rates for middle mile services, the proposed middle mile network would have opened up competition for San Francisco residents.

### Current Requests for City Fiber

The City has received requests from a variety of institutions for dark fiber, including KQED, the Independent Television Services (ITVS), The Warfield entertainment venue, and the Chronicle Building.

### Unique Opportunities with City Fiber

City fiber could provide other unique capabilities not offered by carriers, such as cross connects to peering fabrics or cross connects to various providers. Again, this offers higher reliability and quality and lower cost for services. Once this network connects to the peering point, last mile service providers may find it attractive to make bulk deals for their services-- which could be Internet, but could also be connectivity to their applications--perhaps databases, search engines, conferencing networks, VoIP--to any of the users on the network. This is also a low-cost yet effective way to connect any eligible entity with dedicated national networks, such as LambdaRail or Internet(2).

### Technical and Policy Concerns

#### Route Diversity

Sophisticated potential clients for dark fiber will want to ensure that fiber reaches their facility on from two directions, following two paths, so that a physical rupture in one path does not cripple their network. They will require documentation of the location of the fiber they are using which demonstrates this route diversity. DT will need to develop a more robust fiber inventory and mapping system in order to document fiber routes.

#### City Use Primary

Any discussions with potential customers will need to clarify that City use is primary and that third party use will only be made available after all current and future City use is accounted for. In addition, during any disaster or emergency incident and related response and recovery period, City resources, including City fiber will be prioritized for public safety use, and any non-government use will have secondary status during that period.

### Demand exceeding limited City Resources to Deploy and Maintain

DT will need to be cautious in committing to new fiber deployments to ensure that we have sufficient staff to perform fiber on contractually defined timelines.

### City Liability for Service Outages

Fiber leases will need to explicitly protect the City against liability for service outages, much as commercial providers are protected. Working with the City Attorney, DT has a draft lease that addresses this issue.

### Rights to Structures and Pre-existing Fiber

In consultation with the City Attorney's Office, DT must verify that we can use existing facilities, such as conduit or existing fiber, for this new purpose which differs from the original purpose.

### Pricing and Revenue Projections

#### Pricing Models

There are two components to pricing dark fiber: (1) a one-time installation fee that covers the cost of bringing fiber to a location from the nearest existing fiber and (2) an ongoing recurring fee to cover maintenance and occupancy for the fiber.

The one-time installation fee depends entirely on the proximity to current fiber and the availability of structure such as existing conduit or utility poles. If a location is far from existing fiber, or more significantly, if it requires trenching and the placement of new conduit, installing fiber will tend to be more costly. The typical cost range within the City is between \$5,000 and \$75,000. Both public and private sector providers tend to charge a fixed one-time fee for dark fiber installation, although some may subsidize this charge through higher ongoing charges.

There are two approaches to pricing ongoing [recurring] maintenance and occupancy costs for dark fiber: (1) a price based on mileage, strand counts, contract duration and other factors and (2) a flat price per connection. Municipal entities tend to use the mileage/strand based system. However, due to San Francisco's compact geography and the simplicity of the approach, a flat fee may merit consideration within a finite geography, such as the Central Market Street and Tenderloin area.

#### Prices and Revenue

We suggest recurring pricing on a per month, per mile, per fiber strand basis as is typical in the industry with a smaller fixed charge. A dark fiber contract typically consists of a year "indefeasible right to use" (IRU) are typical for the industry and the prices we recommend are for a 20 year IRU. These agreements would have some type of escalation to account for inflation as well. We are presenting a range of prices starting at the low end of what other municipal utilities charge and ending at the high end.

Ongoing Prices for Using Dark Fiber  
Per Strand, Per Mile, Per Month

Low	\$	100
Medium	\$	150
High	\$	200

We expect a mix of clients, some interested in connecting multiple facilities within the City directly with fiber, others in a single connection to the outside. For our revenue projections, we assume 4 "Big Rings" large clients seeking to connect an average of 8 locations in a 30 mile ring within the City, 6 "Medium Rings" seeking to connect an average of 4 locations in a 20 mile ring and 12 "Single Sites" connecting a facility to an Internet point of presence.

**Revenue from Ongoing Charges for Dark Fiber**  
**End of Third Year**

	Big Ring 3			Medium Ring 6			Single Site 12			Annual Revenue
	Miles	\$/Month	Total Annual	Miles	\$/Month	Total Annual	Miles	\$/Month	Total	
Low	30	\$6,000	\$216,000	20	\$4,000	\$288,000	15	\$3,000	\$432,000	\$ 936,000
Medium	30	\$9,000	\$324,000	20	\$6,000	\$432,000	15	\$4,500	\$648,000	1,404,000
High	30	\$12,000	\$432,000	20	\$8,000	\$576,000	15	\$6,000	\$864,000	1,872,000

Revenue will also depend on our capacity for adding new locations.

**Comparison**

Companies, and even some public agencies, are reluctant to disclose dark fiber prices. However, during the preparation of our Fiber Feasibility Study we did develop some information on what other municipal entities charge for dark fiber.

We had proposed to charge a rate of \$100 per strand, per month in our BTOP grant application. This was assuming that the build out for the network would be paid for by the grant.

There are several municipalities in California that provide dark fiber. While structured differently, these prices range from \$100/fiber/mile/month for San Rafael, \$165/fiber/mile/month for Burbank \$290/fiber/mile/month for Palo Alto and Los Angeles. For the most part, these cities have electric utilities. Nationwide the range is between \$13 and \$500/fiber/mile/month.

Another consideration is the price for managed Ethernet service. AT&T currently charges the City \$1880 per month for 1 Gigabit "Opt-E-Man" managed Ethernet service.

## Next Steps

The next steps for making excess dark fiber available for a fee:

- Proceed with dark fiber installations for UCSF immediately.
- Release a Request for Interest (RFI) to determine private sector demand. This RFI will include a template contract and costs for ongoing occupancy and maintenance. The process will follow this schedule:
  - o 30 days release draft for internal review:
  - o 60 days issue RFI to public
  - o Make fiber maps available by appointment at 1 So. Van Ness Ave.
  - o 90 days responses due.
  - o 100 days select proposals for further consideration.
  - o 120 days complete installation cost estimates for candidate installations.
  - o Repeat quarterly with reduced timeframes.
- Develop maps of fiber availability and prices for Central Market Street and Tenderloin Area plan for expedited access to dark fiber for businesses and non-profit organizations in the area within 90 days.
- Address potential legal and policy concerns in consultation with City Attorney's office.

Please forward to all Supervisors.

Dear Supervisors: (Reply Requested)

I was in the park the other day and those noisy Segways came through the lovely, just replanted, peaceful Rhododendron Dell! It was extremely disturbing to have these electric motor machines going through this peaceful area of the park. These machines should stay on the roadways.

A friend told me he saw/heard them while he was jogging on Strawberry Hill! This is crazy - one of the quietest places in the park and now motorized vehicles! These must stay on the roadways.

If for some small chance, a person is renting this machine due to physical walking limitations, then have that person have their blue card and they can ride thru those places. All others in the tour group must park on the road and walk. **NO MOTORIZED LOUD DISTURBING MACHINES ON THE PEACEFUL PATHS!!!!**

**Please write to tell me what you intend to do about this issue.**

Sincerely,  
Barbara Dennes

This is a copy of the email I sent to your Fire Department. It says what I have to say to you very clearly. Thank you for your consideration.

"What kind of public servants are you? What kind of human beings are you? That poor man who drowned in SF Bay was waiting for one of you to just show a little concern and he would have come out of the water. If you do not understand, it is very simple. If you can swim and you see someone drowning, you try to save him or her. Instead, you used this man's life to make some kind of political statement. You killed him as sure as if you put a gun to his head and pulled the trigger. What kind of human beings are you? You ought to be ashamed of yourselves."

You people in San Francisco government should be very proud of your fire and police personnel. They have put you in the headlines and on the map....but for the wrong reasons. I hope none of you never has to depend on them because if you do, you are up the creek, or bay, to be more correct.

-Alvin Hebert

**SUBJECT:** Amendment to City Planning Code Adding Section 259.53 of the Planning Code  
To Establish the Presidio-Sutter Street Special Use District  
Board of Supervisors File No. 110658

Dear Supervisors Mar, Cohen and Wiener:

The Land Use and Economic Development Committee of Board of Supervisors ("Committee") will conduct duly noticed public hearings on June 6, 2011 on an amendment to the Planning Code establishing the Presidio-Sutter Street Special Use District ("SUD"), an overlay to the underlying RM-1 zoning.<sup>1</sup> The SUD would allow redevelopment of the property owned by Booker T. Washington Community Service Center ("BTWCSC" or "Center")<sup>2</sup> located at 800 Presidio Avenue, San Francisco ("Property" or "Site") for a new and expanded Center and an

<sup>1</sup> Since the certified FEIR for the SUD has been appealed to the Board, the Committee may deny one or both of the SUD Ordinances or forward one or both to the Board without recommendation.

<sup>2</sup> BTWCSC, the oldest community service center serving the African-American community in San Francisco has been in its current location at 800 Presidio Avenue since 1952. In 1919 BTWCSC began providing services exclusively to the black community; however, its programs now serve a diverse ethnic population, 50% blacks; 30% Asians, 10% Latinos and 10% others, all of whom are from low to very low income and/or immigrant families.

Subject: Re: Special zoning district - Booker T. Washington

---

**Clerk of the Board: please copy all members**

Supervisor Mar:

I am a San Francisco resident since 1972. Since 1983 (almost 30 years!) I have resided at 2620-1/2 Sutter Street, a duplex I own with my wife Vanessa. I was a City employee from 1973-1985; I presently work at the Oakland International Airport. Vanessa is a City employee now (since 1985). We always vote -- every election! I have been involved in local and national politics since I was George McGovern's statewide youth coordinator in 1972.

I am writing you to express my deep dissatisfaction with what I understand to be your position in supporting the full build-out of the Booker T. Washington Community Center in District 2, one that so egregiously violates the planning and building codes that it requires a special zoning district. And a project with virtually zero auto parking in an already impacted neighborhood and City.

First, I understand that you intend to introduce and support an amendment that overrides that of District 2 Sup. Mark Farrell. This is not your district, but his. Why would you seek to interfere in another Supervisor's district? If you persist, be certain that I will actively campaign in your district against your re-election, or election to any city-wide office. Be very certain of it, Supervisor. I have been very actively engaged in city-wide campaigns since those of Richard Hongisto, Carol Ruth Silver, Terence Hallinan, Harvey Milk, George Moscone, Phil, Sala and John Burton, and many others. I also contribute each year generously, generally to liberal Democratic candidates beyond California for most obvious reasons. But I have the financial wherewithal to readily redirect that money and more.

Second, this neighborhood already has seen its share of undue disregard for City-wide planning and zoning requirements. We are encroached from the east by the continued

18

expansion of CPMC. From the south by Kaiser Hospital, most notably that monstrosity backed by Joe Donahue (to his personal financial aggrandizement, I might add) along Geary Boulevard about 15 years past. The Westside Courts housing project lies just 1/2 block from my front door. And Booker T. and the MUNI car-barn sit just a block west of my house. Any 'share-the-pain' argument is completely trumped by severe impacts already in place.

Third, a compromise to this project, Supervisor Farrell's compromise, is supported by all of the surrounding neighborhood associations. In fact, the overall project in reality is opposed in its entirety by the numerous neighborhood associations, including members of the Pacific Heights Residents Association, Laurel Heights Improvement Association, Jordan Park Improvement Association and the Presidio Heights Neighborhood Association. Why would you seek to breach the compromise?

Finally, the specious argument that we are simply a bunch of NIMBY racists opposing the Booker T. Washington Community Center efforts to save itself from its own ongoing financial mismanagement is hateful and completely false. Further, members of the board of Booker T. are not local residents, but outliers at best, and non-City residents at worst.

As stated above, you do not represent this district and the fact that you would undercut our supervisor, and lead the charge against us and try to ram a 70,000 square foot building into this modest and historic low density neighborhood is despicable. As you already know, the Mayor's Office of Housing has already agreed to the compromise and promised to fund the project. Double the allowed density, 65-70 feet in height on Sutter Street and a building bigger than Costco is not reasonable, ethical or fair to these neighbors.

Please reconsider your support of the full build-out and withdraw it. You may contact me or my wife, Vanessa, at my home at 415-931-5621. Thank you for your re-consideration of this matter. I remain,

Very truly yours,

Marcel E. and Vanessa M. Conrad

---

Andrea & Barry Brown  
2646 Post Street  
San Francisco, CA 94115

Dear Supervisors / Supervisor Mar:

RE: letter to OPPOSE the 800 Presidio/ Booker T Washington Project. **Please distribute a copy to all District Supervisors.**

Mr Mar, and supporting Supervisors to the Booker T Washington/ MOH project. We are writing to very strongly oppose the 800 Presidio/Booker T Washington project proposed in District 2. I would like to also point out the obvious, Mr. Mar that this project that you are sponsoring and supporting is NOT in your district and you have never shown up or hosted any community meeting to meet with the residential neighbors that are numerous and in great opposition of the project. I would like to know how this project even was conceived as it is so out of scale and place. We are also outraged that this project has received (thus far) rubber stamp approval by the City of San Francisco as it has been illegally pre-funded by the City in violation of CEQA (the California Environmental Quality Act) by the Mayor's Office of Housing and other agencies. There exists direct case law present that will provide easy support in our intended legal action if the project is not brought into compliance with the low density 40 foot planning code limit for height, compliance with SF and bulk limitations and rear yard setbacks, an adequate EIR based on the actual impacts of the project on the surrounding neighborhood as well as the conditional use of the project. These violations and lack of community buy in is an extreme scandal that we as the surrounding neighbors intend to expose to the media if this rubber stamped and illegally pre-authorized building is allowed to proceed as planned and the building is not brought into more complete compliance with the existing planning.

The required Environmental Impact Report (EIR) was/is a sham and written as a justification for the project (another legal violation of CEQA) and is not a true reflection of the neighborhood environmental impacts. Additionally, the EIR was not distributed in a timely manner, was not re-distributed with the many significant changes to the project and did not allow the community adequate time to respond to the proposals or regroup after the changes to the building and developers. The EIR wrongly stated an across the board there would be 'no significant impact' of this project on the surrounding neighborhood. This is ludicrous even if one is only considering the huge size and scale (a 500% increase of the current building), lack of parking and traffic congestion for a large gym facility, with active school and community programming, 50 residential units of new housing in a parking congested neighborhood and the unproven and unprecedented use of this building for housing adult age (18-24 year old) 'youth' in an unregulated environment. This is an unproven idea of setting up an artificial housing situation by closely housing people in the same young age group and background. There will then be no societal regulation that would naturally occur from residents from a variety of age groups and lifestyles as there would normally be in a residential building. This will no doubt become be a noisy, dorm like environment. However, despite my misgivings of the use of the residential portion, we as the neighbors really oppose the size and scale and design of this building and the

fact that it does not fit in the legal planning envelope. I believe we can work with the use with some compromise and agreed upon regulation of the use and intended residents.

Further the SF Planning Department took great pains to try to hide by redaction in the final certified version of the EIR the City's pre-funding of the project by crossing out the Mayor office of Housing's affiliation with the project, but the financial funding information has already been sunshined and is proven. There is now no amount of crossing out the Mayor's Office of Housing/ City funding that clearly happened far prior to the required EIR and other certifications. That that attempt was basically an admission of guilt and only happened after we pointed out the law.

In addition, Mr Mar, you have supported and sponsored legislation to change the zoning limited to one lot which is illegal 'spot zoning'. There are also numerous examples of case law that have proven that this type of planning code amendment (limited to one lot ) is also illegal. The zoning for the area was set for a reason. The project is proposed on a lot that if such a massive building (70,000 SF and 55 ft tall (nearly 70 feet at the Sutter Street side) will completely overshadow homes downhill. The shadow fan is enormous as indicated in the planning department graphic and will completely overshadow the two and three story Victorian and Edwardian historic homes in this valley type area. This huge building that will greatly negatively impact our neighborhood and property values in the zoned low density 40 height limit zoning area. We are owners at 2646 Post Street and our rear yard will back up into the rear yard of this project and we will be greatly impacted by the noise and glare of the rotated gym proposed a few feet from our property line with a glass curtain wall facing our building is constructed. This building also includes roof deck for parties for 18 to 24 year old residents above the gym and towering at least 30 feet above our small 4 unit Edwardian building. Additionally impacting is that the currently proposed bulk of the building extends 25 feet beyond the rear yard planning envelope as currently planned.

Please realize that hundreds of members of the Pacific Heights Residents Association, the Laurel Heights Improvement Association, the Jordan Park Improvement Association and the Presidio Heights Neighborhood Association oppose the current project as planned and will be actively opposing this attack and breach of your planning and political ethics.

Mr. Mar, we find it particularly egregious that you would override and attempt to undermine another Supervisor's progress to strike a very FAIR COMPROMISE for the project as the actual Supervisor of this district, Mark Farrell, has done. I find this an outrageous breach of professional and political courtesy and and undermines the will of the surrounding voters and constituents in the district. As a property owner, voter and taxpayer within 300 feet of this proposed development, I can only view this as an attack on me and my neighbors. Your refusal to support a compromise is not reasonable and your name will be attached to this scandal when it is widely exposed to the citizens of San Francisco. It is an extremely unethical move to not even have one meeting with the people who live in the surrounding neighborhood. Not one of the neighbors I have spoken to to gather signatures to opposed the project as filed in our Conditional Use Authorization Appeal agree with or support the project as currently conceived. So many have been left completely unaware due to the complete lack of outreach, length of time to study the EIR and respond to the many proposed changes. This is very unfair and another clearly illegal breach that we intend to expose.

I would also like to point out that his neighborhood is already home to numerous facilities that serve the greater population of San Francisco. We are not trying to exclude ourselves from doing our part for the greater good. The facilities I am referring to include a massive Muni barn across the street from the proposed project, a large public housing development two blocks away on Post Street, two large hospital complexes in the neighborhood (UCSF Mount Zion and Kaiser) as well as a fire station one block up the way on Presidio. You do not know the impacts or this neighborhood with traffic and congestion and unprecedented scale of this building. The fact that you are undermining our supervisor, and lead the charge against us and try to ram a 70,000 square foot building into this modest and historic low density neighborhood without so much as a meeting or consultation with us who live here is a complete outrage. The Booker T. Washington

sponsors are being completely unreasonable by proposing such a large building. It is at a minimum double the allowed density, 65-70 feet in height at the downhill side at Sutter Street towering over the neighboring ONLY residential buildings with the exception of the Muni barn one block over. This is a building planned to be bigger than a big box store. It is not reasonable, ethical or fair to the neighbors in impose this on our neighborhood.

Your charge as a Supervisor is to represent the will of the people, to build consensus and provide support of the right project for the right area. Please live up to this charge and do not change the zoning of the lot to create the spot zoning 'special use district'. Our neighborhood will be divided with this ill conceived project. It would be far better to have a neighborhood united in agreement with such a huge change, welcoming of the new changes and residents. As of now, this project will be so negatively affecting of our neighborhood forever and create so much ill will and negative precedent. There were never any project alternatives considered (another legal violation of NEPA and CEQA ) as there exists plenty of areas in the City that this project would have been easily appropriate for the intended use and zoning and not demolishing a historic resource as this one is currently planned.

The neighbors in this area are not opposed to change as long as long as it is appropriate, we are sick and tired of being unfairly characterized with such labels as NIMBY's and racists as we have been by the Booker T. Washington project sponsors, when we are merely in support of responsible and zoning compliant development that retains our neighborhood's character, property values and quality of life. We are being denied a voice in this matter and it is being rammed down our throats. We need to feel that we are heard and considered, we have been ignored at every turn and it is outrageous.

We strongly suggest that you support the surrounding community's opposition to this project, and at the very least, continue this item for further study. I urge you to call a community meeting to come out to our neighborhood and meet with us and listen to our concerns surrounding this huge project's terrible impact on the neighborhood.

Sincerely,

Andrea & Barry Brown

**Re: Support for the Booker T. Washington Community Service Center Project**

Dear Supervisor Farrell:

I urge you to support the development of the Booker T. Washington Community Service Center (BTWCSC) as approved by the San Francisco Planning Commission. While I am not a resident of District 2, my son currently attends The Little School, a neighbor of BTWCSC.

I am in favor of a 5-story, 50-unit development because I believe it would enhance the vitality of the neighborhood, improve the quality of life in District 2 and provide an innovative child and youth center providing essential services. As a parent, I value strong institutions that establish a solid foundation for children, youth and young adults and believe BTWCSC will provide important services putting the children and young people it serves on the path to success.

Thank you for your time and efforts on behalf of the community.

Sincerely,

Tiffany Hill

Supervisor Farrell,

This email is to encourage your strong support of the redevelopment of the Booker T. Washington Community Service Center. I am a District 2 resident living at 50 Presidio Avenue.

Quality urban redevelopment is key to keeping our City and District vibrant. As an experienced multifamily apartment investor across the country, I can say that the 5-story, 50-unit proposed design of the new community center is excellent and appropriate for the neighborhood. I'm glad the Planning Commission has agreed and look forward to a similar finding by the Board of Supervisors.

As a businessman, I appreciate the track record of success that the Booker T. Washington program has delivered over the years and the important role it plays in improving the lives of San Francisco children, senior citizens and their families. Let's reward this track record by supporting this redevelopment and allowing this great institution to continue to make a difference in so many lives.

Thank you for your consideration.

Sincerely,

John Adair

Dear Supervisor Farrell,

I hope that you will support the development of the Booker T. Washington Community Service Center (BTWCSC) as approved by the San Francisco Planning Commission. I am a parent with children at The Little School, only 2 blocks away from BTWCSC.

I am in favor of a 5-story, 50-unit development because I believe BTWCSC is an anchor, community institution in the Western Addition, and the facility needs to be restored so that it can thrive, provide essential services and enhance quality of life in the neighborhood. The development of the BTWCSC will create an innovative community institution that will bring together and provide comprehensive support to children, youth and their families and former foster youth. As a parent, I value strong institutions that establish a solid foundation for children, youth and young adults and believe BTWCSC will provide important services putting the children and young people it serves on the path to success.

Thank you for your time and efforts in the service of District 2.

Re: Support for the Booker T. Washington Community Service Center Project

Dear Supervisor Farrell:

I urge you to support the development of the Booker T. Washington Community Service Center (BTWCSC) as approved by the San Francisco Planning Commission. I am a resident of District 2 and a Trustee of The Little School, a neighbor of BTWCSC; one of my four children currently attends The Little School, and my other three children are alumni of the school.

I am in favor of a 5-story, 50-unit development because I believe it would enhance the vitality of the neighborhood, improve the quality of life in District 2, establish an innovative child and youth center providing essential services, and bring diversity and vitality that I believe is important for the neighborhood and the children, like my own, that make up the fabric of the neighborhood. The long-term viability of this important development would be ensured through the creation of 50 greatly needed affordable housing units.

Thank you for your time and efforts on behalf of the community.

Sincerely,

Jenny Pearlman

**Clerk of the Board: please copy all members**

**Supervisor Mar:**

I am a San Francisco resident since 1978. Since 1993 I have resided at 2611 Sutter Street.

I am writing you to express my distress with what I understand to be your position in supporting the full build-out of the Booker T. Washington Community Center that is not in your District. This building violates the planning and building codes to the extent that it requires a special zoning district. The project also provides minimal parking for the future residents.

You plan to introduce and support an amendment that overrides that of District 2 Supervisor Mark Farrell. This is not your district. Why would you seek to interfere in another district? If you persist, be certain that I will actively campaign in your district against your re-election, or election to any city-wide office.

Many of the residents who will also be affected live in District 5 – our Supervisor is Ross Mirkarimi. He has been a total “no show” on this issue. He has been invited to neighborhood meeting and I have sent emails to him about this project. No response whatsoever.

I want to address the idea that we are a bunch of NIMBY racists opposing the Booker T. Washington Community Center. Most of us can only be judged by what we have done and what we have not done. I am easier to read. I am in no way a racist. I am white but that does not make me a racist. I really hate having to prove that I am not racist but in this case it is necessary. My partner of 31 years is black. He does not live in the neighborhood but is in total agreement with me. In short – upgrading the current facility. But I know that compromise is the only solution at this point.

Supervisor Mar, you do not represent this district and the fact that you would undercut another supervisor and lead the charge against our neighborhood and try to ram a 70,000 square foot building into this modest and historic low density neighborhood is despicable. As you already know, the Mayor’s Office of Housing has already agreed to the compromise and promised to fund the project. Double the allowed density, 65-70 feet in height on Sutter Street and a building bigger than Costco is not reasonable, ethical or fair to these neighbors.

Please reconsider your support of the full build-out and withdraw it. You may contact me at 415-567-0297.

Yours truly,

Beth Wells

---

Dear Sir and/or Madam,

If it is true that this board is considering a ban of circumcision, I hope that you will not ban this ancient practice.

While I am not a Jew, I respect our Jewish brothers and sister greatly. I believe it would be a deep wound to the consciousness of a large group of people.

Furthermore, I suggest that considering the evil perpetrated upon our fellows throughout history, this would smack of that same historical attitude.

Very Sincerely Yours,

Mrs. Jody Gallegos

# Two sides of circumcision

Re "Circumcision ballot measure is proposed," May 25

I have seen a circumcision done and could not believe that an infant could be inflicted with such excruciating pain without any anesthetic whatsoever. The poor infant screamed in pain while the adults surrounding him seemed elated.

This barbaric and sadistic ritual belongs in the Middle Ages and should not be tolerated today.

*Gino Hasler Arleta*

It seems to me that there is no difference between outlawing male circumcision, which a group wants to do in Santa Monica, and outlawing abortion. It is another example of people who want to legislate their own morals and impose their will on others concerning an area that should be left to an individual's right to choose.

*J.M. Samuel Santa Monica*

Post Office Box 1223

Hey, PG.....

Perhaps the appropriate people should change the name of San Francisco---to San FraNanny and relocate city hall to North Beach.

As you know, North Beach was the home of the stripper clubs---and speaking of stripper clubs---the board of supervisors seems intent on stripping away the citizenry's choices.

And for reasons which escape me, those elected idiots on the Board of Supervisors (Stupes) strongly believe that they know what's best for the citizens of SF. Beginnings of a nanny state?

From Happy Meals to the exterior plumbing of male infants --- San Francisco's politicians never know when to stop.

With their unpredictable concern, perhaps they can join the ranks of the sexually-starved TSA people.

Casually,

*William C. Bradshaw*

Sir:

In light of the deceptive force behind putting the Circumcision Ban bill on the ballot, I urge you to remove it in the name of justice. The group behind this bill is anti-semitic, and a highly offensive comic book has been put out by them. You must stand for something. Would you allow a ballot measure requiring the deportation of ethnic minorities? A ballot measure outlawing interracial marriage? A ballot measure banning baptisms? More information on this subject may be found at the following link: [www.worldjewishdaily.com](http://www.worldjewishdaily.com)

## **Circumcision ban comic book shows 'grotesque anti-Semitic imagery,' ADL says**

**'Monster Mohel' comic book is one of two titles in the 'Foreskin Man' comic book series created by the Male Genital Mutilation Bill group pushing to make male circumcision illegal in San Francisco.**

In the name of justice and religious freedom, I urge you to remove this offensive proposal from the ballot.

Sincerely,

Ellen Cox

RE: Progress Report on the Japantown Special Use District Permit  
Activities per Board of Supervisors Ordinance 180-06

1650 Mission St.  
Suite 400  
San Francisco,  
CA 94103-2479

Reception:  
415.558.6378

Fax:  
415.558.6409

Planning  
Information:  
415.558.6377

## BACKGROUND

On July 27, 2006 the San Francisco Board of Supervisors adopted Ordinance 180-06 establishing the Japantown Special Use District and with uncodified reporting requirements for the Planning Department in Section 6. Section 6 of this ordinance reads as follows.

*"This Section is uncodified. Within 2 years of the effective date of this Ordinance, the Planning Department shall transmit to the Clerk of the Board of Supervisors a report that summarizes statistics relating to the implementation of the special Use District, which may be the basis for subsequent amendments to Planning Code Section 249.31. Those statistics shall include, but are not necessarily limited to, filings of Conditional Use authorization and use of the Commission's Discretionary Review powers with respect to the following: (1) how many applications have been filed, (2) outcome of such filings, and (3) whether those filings were made based on (a) one or more requirements contained in Section 249.31, or (b) notice requirements under Section 249.31, or (c) other Sections of the Planning Code. This report also shall include data on the timing to process Planning approvals within this District. In addition, the report shall propose a method to assess the economic impacts that are associated with compliance with this District's requirements. Within 90 days of the receipt of the report, a Committee of the Board shall hold a hearing on said report."*

To comply with the reporting requirements of this ordinance, the Planning Department respectfully submits the data report information specified herein.

## PERMIT ACTIVITY IN THE JAPANTOWN SPECIAL USE DISTRICT

2007-2008 and 2009-2010

2007-2008

PERMIT TYPE	# OF PERMITS	COMMERCIAL or RESIDENTIAL	AVERAGE PROCESSING TIME (Days)
Conditional Use	1	COMMERCIAL	396
Alterations	11	COMMERCIAL	348
Alterations	2	RESIDENTIAL	204

RECEIVED  
BOARD OF SUPERVISORS  
SAN FRANCISCO

2011 JUN - 1 PM 3:08

BY \_\_\_\_\_  
AK

2009-2010

PERMIT TYPE	# OF PERMITS	COMMERCIAL or RESIDENTIAL	AVERAGE PROCESSING TIME (Days)
Conditional Use	1	COMMERCIAL	110
Alterations	2	COMMERCIAL	203
Alterations	2	COMMERCIAL	ACTIVE
Certificate of Appropriateness	5	RESIDENTIAL	100
Discretionary Review	1	RESIDENTIAL	262
Variance	1	RESIDENTIAL	94

Based on the information in these summary data tables and the more detailed permit activity information contained in the attached Appendix A, there has been a minimal amount of total permit activity. For the 22 permit applications during 2007 and 2008, 17 were associated with commercial uses and the remaining five were for residential uses. Additionally, seven of these permits were associated with one property on Post Street and seven of these permits were either expired or cancelled. Only one of the 14 issued permits required Conditional Use authorization from the Planning Commission. The average permit processing time for approved permits was between 205 and 396 calendar days.

For the thirteen permit applications during 2009 and 2010, six were for commercial uses and the remaining seven were for residential uses. One of these permits was cancelled. The average permit processing time for the five issued commercial permits was between 110 and 203 days. Only one of these five permits required Conditional Use authorization from the Planning Commission. For the seven residential permit applications during this two year period, five were applications for Certificates of Appropriateness for alterations to historic residential properties. Only one of these six residential permits required Discretionary Review due to the proposed conversion of two dwelling units to a single family home. The average permit processing time for these six residential permit applications was between 94 and 262 days.

Due to a number of factors, the permit processing time improved significantly between the 2007-2008 period of time and the 2009-2010 time frames.

**FINDINGS**

In all cases, where the applicable, the notification requirements contained in Ordinance 180-06 have been adhered to by the Planning Department. In no case, where the Planning Commission under its discretionary review powers or conditional use authorizations, did the Commission make findings that the approved applications were either incompatible with the neighborhood character, development pattern, or design aesthetics of the Special Use District. Additionally, through Planning Commission review authority, these permits were issued in support of the purposes for establishing the Japantown Special Use District.

This report proposes that the most appropriate method to assess the economic impacts associated with compliance with this District's requirements is to continue working with the community to finalize the Japantown community planning and rezoning process that will integrate appropriate portions of Ordinance 180-06. At this time there is no Planning Department recommendation to modify Planning Code Section 249.31.

Subject: Treasure Island

---

Dear Honorable Board Members,

There are a number of concerns about the plan to build a city on Treasure Island: traffic, air pollution and the remaining questions of toxic clean up, seismic stability and vulnerability to Tsunami and sea rise. It is also unsettling that the project has almost tripled in size, going from under 3000 units in the original plan to 6000 in 2006 and 8000 in the current plan. But the real issue for me is the choice to use public money to finance the attraction of a large population to the center of our defining open space, building high-rises up to 40 stories on bay fill in an active earthquake zone during in an era of sea level rise, and limiting ingress and egress to a single bridge already at traffic capacity.

It's a bad idea.

Right now the bay serves us well, providing open space and dramatic views for millions of residents and visitors alike. With this single development the nature of the bay will change dramatically for all those who look at it, whether from bridge, roadway, waterfront, boat or balcony. This decision will do more to alter the views of the bay than all the development in the last 50 years put together. Unfortunately most people are unaware of the extent of this proposed change and your vote tomorrow night is our last chance to get it right.

I urge you to overturn the Planning Commissions approval of the project and return to the earlier, smaller scale plan.

Thank you for your consideration.

Sincerely,

Chris Chouteau

Show Details

File #110618

Please don't approve the current EIR, but instead, go with the project that was approved in 2006. That one makes much more sense and won't get you in trouble later. History will not look kindly upon supervisors who give away local power and control for the sake of developer profits. The current project is shockingly undemocratic and unsustainable. Please see the letter I mailed to your clerk for more detailed comments.

Thank you,

Re: File #110226, Treasure Island/Yerba Buena Island Development Agreement  
Hearing date: June 6, 2011  
Request: Please do not enter into this agreement. See below.

I've been reading a wonderful book about the 1906 earthquake and fire, which presents a strong case that the people trying to save San Francisco - the self-appointed citizens' committees, National Guard, fire department, police - actually hastened its destruction, by sanctioning wide-spread use of inappropriate "black powder" dynamite, which not only didn't stop the fires, but added to their extent and ferocity by reducing buildings to kindling and by setting off sparks that started new fires. Anyone familiar with black powder dynamite could have told them not to use it, but chaos reigned, and frenzied inexperience prevailed.

Jump ahead to 2011. You have a budget crisis. You're trying to save San Francisco. You want to do it by giving away ownership and control over city-owned property, on which you intend to allow highrises to be built on liquid land fill, in an active earthquake/tsunami zone, shortly before sea level rise will inundate the island. In years to come, your lack of good judgment and your haste to develop this revenue stream will be critiqued by those who must deal with the consequences. Your rationalizations about the project "meeting code" will be seen as a convenient way to avoid deeper and far more serious issues. When the Bay Bridge becomes mired in traffic jams, when birds by the thousands crash into these Pacific Flyway barriers and die, when future residents gaze out upon mini-Manhattan in the middle of our beautiful Bay and wonder why?, you can try to answer them. Or, you can take a wise stand now. Please do not approve this misguided and potentially disastrous agreement. There are better ways to solve the budget crisis.

The questions I asked earlier in this process have not been adequately answered in the final EIR, and the mitigations proposed are too little, and too ineffective. Therefore, I reiterate them here, so that they will become part of the public record:

Re: Treasure Island/Yerba Buena Island Redevelopment Project Case:

#2007.0903E — Questions on the DEIR

As the producer of the documentary, *The Wild Parrots of Telegraph Hill*, and my current project, *Pelican Dreams*, I am deeply concerned about the proposed TI/YBI redevelopment project ("the project") on which comments are being solicited for the DEIR. In that regard, I have a number of questions for which I would hope to receive informed and detailed responses:

1. As I understand it, numerous high-rise towers (multi-story commercial and residential), may be planned for Treasure Island. In that regard, DEIR Impact B1-4 deals with avian collisions with buildings. What studies, if any, not including the subject DEIR, have been done to determine whether the Pacific Flyway for migratory birds could be significantly impacted or affected by high-rise towers built on or proximate to such Flyway path?
2. The DEIR cites at p. 1V.M.50; Stenzel, et.al., *Abundance and Distribution of Shorebirds in the San Francisco Area*, however, does the DEIR rely on any more specific studies than this? If so, please give the author and title of such materials.
3. Please provide a description of each and every species of (a) migrating bird, (b) resident bird, for which the project could have potential impact or affect, and for each and every species the nature and scope of such impact or affect.
4. Please describe in detail as to each local and regional bird species, how glass surfaces on the project's high-rise towers would "affect the viability of local and regional bird populations."
5. Please describe which species of migratory birds would be vulnerable to illuminated buildings at night.
6. Please state why there are no illuminated night renderings of the proposed project's high-rise towers.
7. Please describe in detail, as to each species of migratory bird, why "avian collisions are a potentially significant impact."
8. Please describe at least five locations in the United States where patterned and fritted glass has been used in high-rise towers, and what has been the result of such use in each such location in diminishing avian collisions.
9. Please set forth in detail why, with Mitigation Measure M-B1-4a, "the impacts on birds from the Proposed Project would be less than significant."
10. Why do the "ground floor and first few stories of buildings present the greatest hazards to birds"?
11. Which "breeding birds" within the project area may be at risk of colliding with the project's possible high-rise towers?
12. Specifically to the peregrine falcon, please describe the nature and extent of the project's potential impacts on this endangered species.
13. Specifically to the California brown pelican, please describe the nature and extent of the project's potential impacts.
14. What species of birds listed under the Federal Endangered Species Act, or proposed to be listed, may be subject to impact from or affected by the proposed project's buildings, including high-rise towers?
15. As to Question # 14, would such impacts or affects be considered

significant? If so how? If not, why not?

16. What species of birds listed under the California Endangered Species Act, including candidate species, and any species of special concern, may be impacted or affected by the proposed project's buildings, including high-rise towers?

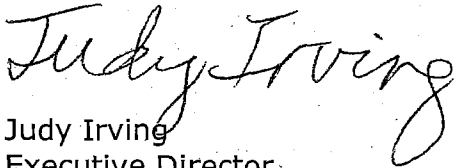

17. As to Question # 16, would such impacts be considered significant? If so, how? If not, why not?

18. Which bird species would be considered to have a known or high potential to nest on any of the project's proposed high-rise towers?

19. What measures would be taken to minimize avian collision with antennae, monopole and rooftop elements on any of the project's buildings, including high-rise towers?

20. As to breeding birds on Treasure Island, what steps will be taken during each stage of project development to mitigate impacts?

Best regards,

Re: Treasure Island BOS Appeal and Appended State Documents

May 2, 2011 and June 6, 2011, & June 7, 2011

There are three major issues challenging the Planning Commission approved EIR.

**1. Seismic safety:**

Building the Dutch equivalent of polders around developments does not appear sufficiently viable to resist the anticipated quake. Remember that the Dutch initiation of polder use was a 14<sup>th</sup> century program to reclaim the Zuider Zee after a then major earthquake and subsidence created the Zee. Do T.I. proposed methods meet objective tests or, even Dutch earthquake standards?

A major life safety issue is that the infrastructure that links polders will not resist liquefaction as severe as occurred in the minor quake of 1989.

**2. Mitigation Impacts:**

The pro-forma for Treasure Island suggests an inadequacy to cover public mitigation impacts costs as required by an EIR. Particularly affected will be bridge traffic capacity and island infrastructure liabilities, including life safety, as noted above.

**3. Title Clearance Mitigation:**

Regardless of the Treasure Island use, its ownership is sufficiently questionable as to require mitigation. There are means to both provide clearance of title and provide substantial revenue underpinning for EIR mitigation. Proposed is title clearance in the State's favor as a "Wetlands" under the aegis of the California State Lands Commission as follows:

- A. Close analogy to the title issue for T.I. is that pursued by the State for Hamilton Airbase in Marin. It was found that abandonment of the Airbase would entail reverting title to the state of a portion of the Airbase that was filled by Catholic Archdiocese. These lands were wetlands below mean high tide in 1850 that, therefore, were covered by the terms of the Arkansas Act of 1850. That Act granted California, among other states, "stewardship" of such lands on behalf of the federal government forever.

Despite "facts on the ground" and a land transfer to the Air Force, as a wartime owner, the perpetual ownership by the State remains the dominant claim to a fee-simple title for such land.

What is true in Marin remains true of Treasure Island despite Navy usage as a wartime necessity. The city claims that it is re-buying title from the Navy. Consider that the city, then, did not have a legal claim to title because such lands were required to be owned by the State in perpetuity in "stewardship." What the Navy bought from the city earlier was the right of usage, not title.

But the city acknowledges the state's title by proposing to exchange the state's wetlands ownership of Treasure Island for an offshore state submerged- under water- land ownership. How can a city, even with the assistance of state legislative chicanery, trade state ownership of land the state already owns for land the state already owns?

- B. Suggested is a way out of title difficulty that provides a safe harbor and benefit for all regardless of future use.
  1. Clear title by acknowledging the State's underlying title under the Terms of the Wetlands Trust. View the Navy's claim as development second deed of trust.
  2. Entrust the County of San Francisco as an administrative district of the State as the residual authority for the State with negotiated fiscal shares for the State and the County.
  3. Deed developers a second deed of trust subject to "Stewardship" stipulations, General Plan and EIR requirements. Property taxes would then become, under the same stipulations, possessory interest taxes.
  4. Because the proposal will no longer be a redevelopment project, the use of tax increments will no longer be available to such needs as capital improvements and public benefits as affordable housing. Alternative means for providing for capital costs, such as Mello Roos, are cumbersome.
  5. However, a more providential means exist in use of leased land "ground rents" charged to the ultimate owners of development. This method would provide a more sustainable base for fiscal underpinning and for secure design and maintenance controls.
  6. Because "ground rents" would be charged to the ultimate users on the downside the cost to the developers' equity position should be nil especially due to clearance of title issues.
  7. A "Performance Bond is necessary insurance for underwriting the city/county development costs of mitigation. There is an unsupportable risk for the city/county given the time-certain expenditures presently indicated. **Insurance would provide proof of development capability.**

To: San Francisco Dept. of Planning  
Attention: Bill Wycko, Environmental Review Officer  
Fr: Bernard Choden (em: choden@sbcglobal.net)  
Re: Response to the DEIR for Treasure Island  
Aug. 5, 2010

I believe that "due diligence" has not been exercised for findings regarding the ownership of Treasure Island and the proposed seismic safety mitigation for associated development proposals.

1. The State of California owns the development site in perpetuity by virtue of federal law "The Arkansas Act of 1850" gave all states stewardship of coastal wetlands below mean high tide as of September 1850. Authenticating correspondence by state officials involving Hamilton Airbase, an analogous situation, is appended. The DEIR on page IV.A 12 asserts that state legislation in 1942 and 1997 both empowered the transfer of Treasure Island to the Navy, a wartime exercise as with Hamilton Airbase, and the release of Treasure Island from the terms of the Tidelands Trust. State law does not trump federal law despite many invalid challenges by the state attempting to do so. The question of ownership underlies the legality and efficacy of the control of uses and resources needed to mitigate the impacts of the proposed development. This issue is fundamental to the integrity and accuracy of the DEIR.

The draft also indicates a legislatively approved trade of possible Tide Lands Trust sites for island perimeter sites that for the most part are very much below water and likely to remain so. The sea level is expected to rise 2.5 feet during the time expected for island's initial development and far more during the development's overall economic life. These deepening submerged lands traded to the Trust cannot be expected to be equivalent value for state purposes. This is a farcical replay of the fabled Florida scams related to sale of swamp lands in the 1920's.

2. The near liquefaction of Treasure Island during the moderate Loma Prieta earthquake of 1989 should give rise to the especial seismic safety requirements required to both ensure the survivability of occupants and structural developments. The DEIR on pages II.72 thru 76 raises skepticism as to this possibility. For one, compacting sand cannot reach the density of even sandstone or consolidated rock and therefore cannot be expected to provide a safe seismic underpinning. Further, foundation mats, while structurally useful, cannot be secure if their underpinnings are liquefiable.

One means of testing the viability of the proposed seismic security measure is for the developers and city to provide evidence of the fiscal insurability of both the survivability of the island's occupants and its development and to demonstrate so before the DEIR is approved. It is necessary to secure significant evidence of tests of these seismic safety measures before approval of the DEIR.

## I. BACKGROUND

The attached maps A and B and legend indicate the types of parcels which underly the approximately 1800 acres of Hamilton Airbase. Discussions with Walter Cook have indicated that a substantial portion of this land is, with varying degrees of probability, recoverable by the state.

### 1. Submerged Lands

These lands are sovereign lands by virtue of having been ceded to the state when California joined the Union in 1850. By state law, the state's use of such lands is limited to fisheries, wild life, game, and navigational purposes. The areas to the east and including Parcel TLL 31, Map B, are lands which fall into this category and which can be readily reacquired by the state through legal action. Vegetation prior to 1851 ceased at the western boundary line of this parcel, thus implying the existence of mud flats on these parcels at that time.

Parcels TL 179, 178, 175, TLL 5(c), and TLL 210 represent patents for use which have lapsed and, therefore, these lands appear reclaimable without challenge. The remainder of this submerged land was patented with permission to build a levee. However, such patents did not negate the state's sovereign right to trespass for the maintenance of fisheries, navigation, wild life, and game.

### 2. Wet Lands

Congress, in the 1850 Arkansas Act, gave to the states sovereignty over wet lands which include lands below sea level, above mean high tide, and areas with salt marsh vegetation.

Early maps indicate the presence of numerous scattered salt ponds and slitches throughout the remainder of the runway and maintenance shop area extending northwest up to and including parcel S and O 69. The state granted patents for the use of this land. However, SL

feels this area is worth litigation on the basis of the uses and of the ecological protection rights noted. The state argues that it has retained the rights to trespass in this area in order to maintain it for fisheries, wild life, game, and navigation.

### 3. The Rancharo

This area was originally above sea level and GSA has clear title. Therefore, it appears beyond litigation so far as potential reclamation by the state is concerned. This is the area contiguous to Highway 101 and which contains the Lanham housing site.

### 4. Previous Action

Title to the area bordering the northern side of the airbase was litigated by the state and the title rights were resolved with the California Packing Corporation in 1943. This area, therefore, is in an unchallengeable ownership situation with fee-simple title. Hamilton Airbase to the south, therefore, represents a defeasible fee, with reservations, subject now to litigation. This condition also applies to the area to the south of the airbase beginning with Parcel S and O 80.

## II. ACTION BY THE SLC

It is the intention of Mr. Cook to begin a recovery action first by notifying the GSA and, second, through possible litigation to recover the submerged and wet lands within the airbase. He does not wish to subject this area to negotiation with GSA which might involve a trade-off of claimed state rights for other areas or equities on the higher elevations such as Lanham site since this would prejudice his case with regard to claimed sovereign objectives and uses. In addition to notifying GSA, Walter Cook will notify Marin County and the City of Novato.

After the above action is initiated, to avoid prejudicial judgment with regard to the intent of the State Lands Commission to establish sovereign rights and use, HCD and SLC should enter negotiations with the GSA with regard to the possibility of trading part of the federal land debt (comprising a total of 121,000 acres) for the above sea level area of Hamilton Airbase. HCD and SLC will argue that the improvements are valueless and constitute a detriment to the future improvement and reuse of the site. The objectives to the GSA and the state administration, for the above sea level area then, will be posited as follows:

- a. Protect the ecology of the water shed, particularly the below sea level areas.
- b. Integrity of use in a manner harmonious with the maintenance of the wet and tide lands ecology and uses.

- c. Establishment of development of a suitable ground rent return which, in part, can be used to maintain the ecology and state lands interest in the overall site.
- d. To return a surplus of such ground rents into a sinking fund for general statewide community development and housing purposes, and for intensive development of bay area fisheries.

III. PHASING OF ACTION

- a. Letter by SLC claiming rights and threatening litigation to the GSA. threatening NO
- b. A second following letter from HCD jointly with SLC and Resources Agency to GSA with regard to an uplands trade-off for part of the federal school lands debt. *don't know about this*

*not SLC* → Initiate legislation declaring that low and moderate income housing and employment development are public purposes compatible with the existing authorized use of submerged and wet lands, if those lands are no longer submerged or wet lands, are not required for restoration of the ocean, riverine, or seashore ecology, and the development would not adversely affect the use of other sovereign lands. It should be understood clearly that these additional proposed uses are offered only as a secondary priority to the existing authorized uses. Compatibility should be further defined as follows:

1. Primarily for low and moderate income housing, community development, and employment.
2. Having a monetary and/or functional benefit to present authorized uses.
3. Recognizes the right of a possible or eventual reuse of community developed lands for presently authorized uses.

The legislation should also establish a sinking fund funded through ground rents or development rights for the reuse of state lands such as Hamilton Airbase. The funds may be used statewide for indicated public purposes such as stabilization of deteriorated communities, housing aids, and development of state fishery ecologies. Recommendations to the Legislature for allocations from the fund will be made jointly by the Resources Agency, SLC, and HCD. In order to carry out the housing and community development activities financed by the fund, the legislation should declare that HCD is a public housing agency with powers to carry out the authorized housing and community development programs.

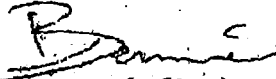

We may also suggest recourse to Congressional action regarding the state possession of the uplands area and the discounting of existing equities.

All of the above will establish precedent with regard to other shoreline properties, defense lands such as Susanville, Stockton, and Los Angeles. In particular, the SLC will follow up the above litigation action by challenging the San Francisco Harbor Sub-division Act of 1872 on the basis of English Common Law precedent which established that submerged and wet lands, after 100 years of an uninitiated purpose, should revert to state sovereignty. This relates to our previous memo regarding the Santa Fe Railroad lands and other lands within five miles of a point near the Ferry Building located on the eastern edge of San Francisco.

The higher areas can be expected to be fully developed except for small park areas. The sovereign use area can, in part, be leased from the SLC on a 99-year basis; Port and fisheries development would be permanent.

Presuming a 50% development coverage of the 1200 acres at Hamilton Airbase, we can expect about \$2/300,000,000 of development. In addition to my charges to the leaseholder for payment of in lieu taxes to local government, the state could expect to receive a ground rent of 8% on the value of the land and improvements.

Assuming half of the ground rents are allocated to HCD, Hamilton alone will generate a \$12,000,000 annual cash flow to HCD. This cash flow will be more than enough to carry out a significant program of housing and community development, including Hamilton.

  
Bernard Choden

*3*

TO: ACS

SUBJECT: HAMILTON

Walter Cook briefed me this morning regarding his meeting with Tony Pace, et.al, at GSA. The bottom line is that our opportunity to move on Hamilton is alive and well but urgent.

1. GSA will proceed to ignore Walter's claim of state sovereignty, based upon a solicitor general's interpretation in 1965 regarding adverse possession.
2. Walter will request litigation from the Commission based on
  - a. adverse possession only pertained to defense uses now being abrogated and recent enquiries from Washington expressing doubts about the title and desiring to clean up the situation.
  - b. Walter expects to need to post a \$1,000,000 bond to cover the maintenance of the base during the interval of the suit; he now favors extending the land trade concept to cover the entire area of Hamilton; thus, the uncontested areas will be paid for outright, by trade, the ~~intermediate~~ <sup>indeterminate</sup> areas will be paid by ~~at~~ a court determined amount with the sums being represented by the state land's equities being held in escrow. No cash from the legislature, therefore, will be needed...our approach, therefore, becomes extremely desirable.
  - c. The suit bond needs pulls priority away from Northrup's priority for a trade away from the Imperial Valley ~~lands~~ <sup>lands</sup> and makes SLC dependent on the eventual cash flow from Hamilton as a means of acquiring the ~~terminal~~ <sup>terminal</sup> lands later (which they should do in any case since we can multiply the land equities faster by putting it into the Hamilton investment than letting it ~~wait~~ sit in abeyance in state title).
3. Walter will be at the 2 pm meeting to back this and deal with

SUMMARY OF CALENDAR ITEM:

*Prelim. Staff.*

Request authorization to proceed with title litigation at Hamilton Air Force Base, Marin County, California.

\*\*\*\*\*

The Federal General Services Administration is proceeding with disposal of Hamilton Air Force Base which has been declared surplus by the Air Force.

A search of the records shows the existence of State sovereign titles within the Base. Exhibit A, attached hereto, shows the approximate location of the various categories of title, as follows:

- 1. Parcel A: No State patents have been issued for this portion of the Base. The parcel originally consisted of tidelands of San Pablo Bay owned by the State in its sovereign capacity. This parcel was blocked off from the Bay by levee construction many years ago. The Federal government acquired private title claims but is unable to trace its title back to its source.
- 2. Parcel B: State tideland patents were issued in the last century for this parcel. The Federal title claims to this parcel are

based on their assertions of ownership as successors in interest to the State's tideland patents. The public trust easement was reserved in law by these tideland patents and continues to exist in the absence of its being terminated in some lawful manner. We find no such termination. The tidelands are within the City limits and the California Constitution (Art. V, Sec. 3) prohibits the alienation by the State of its right, title, and interest therein.

3. Parcel C: This area was patented by the State by Swamp and Overflowed Lands patents in the last century. However, the historical maps and charts show that the parcel was interlinedated with sloughs and other tidelands over which the State's tideland easement exists.
4. Remainder of the Base: The remainder of the Base was within the confirmatory patent issued by the United States under the Treaty of Guadalupe Hidalgo for the Rancho Novato, the existence of which preceded statehood. The title review has not shown evidence of any State sovereign right, title, or interest therein.

Exhibit B shows the Base parcel along the northerly bank of Novato Creek. The evidence shows State ownership within this parcel as part of the natural bed of the Creek and as tidelands along said Creek.

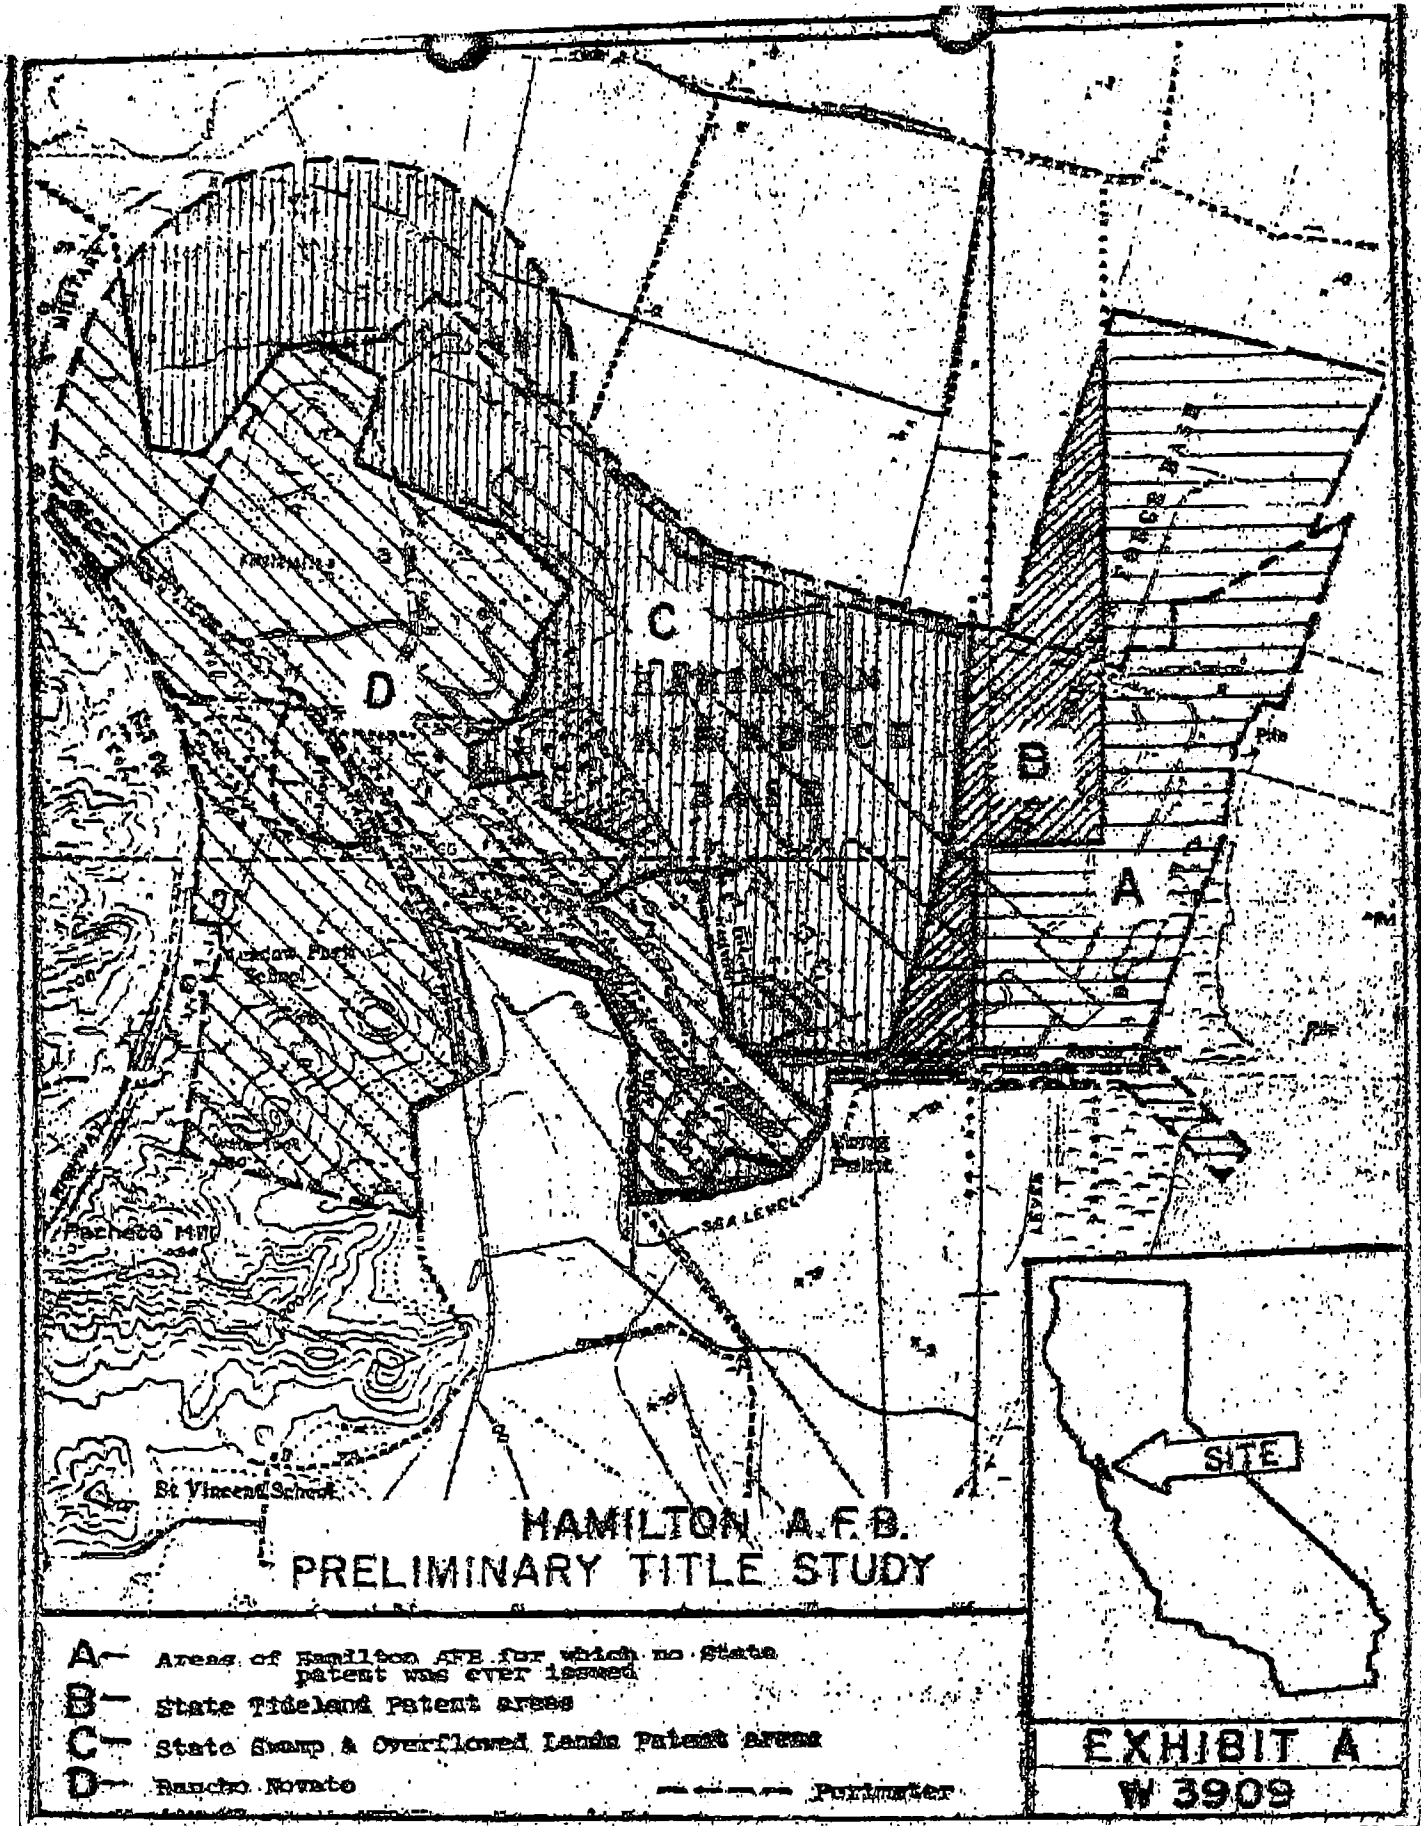

A small portion of the Base may be held by the Federal Government by easement only and a portion may be included within real property the title to which may have been settled.

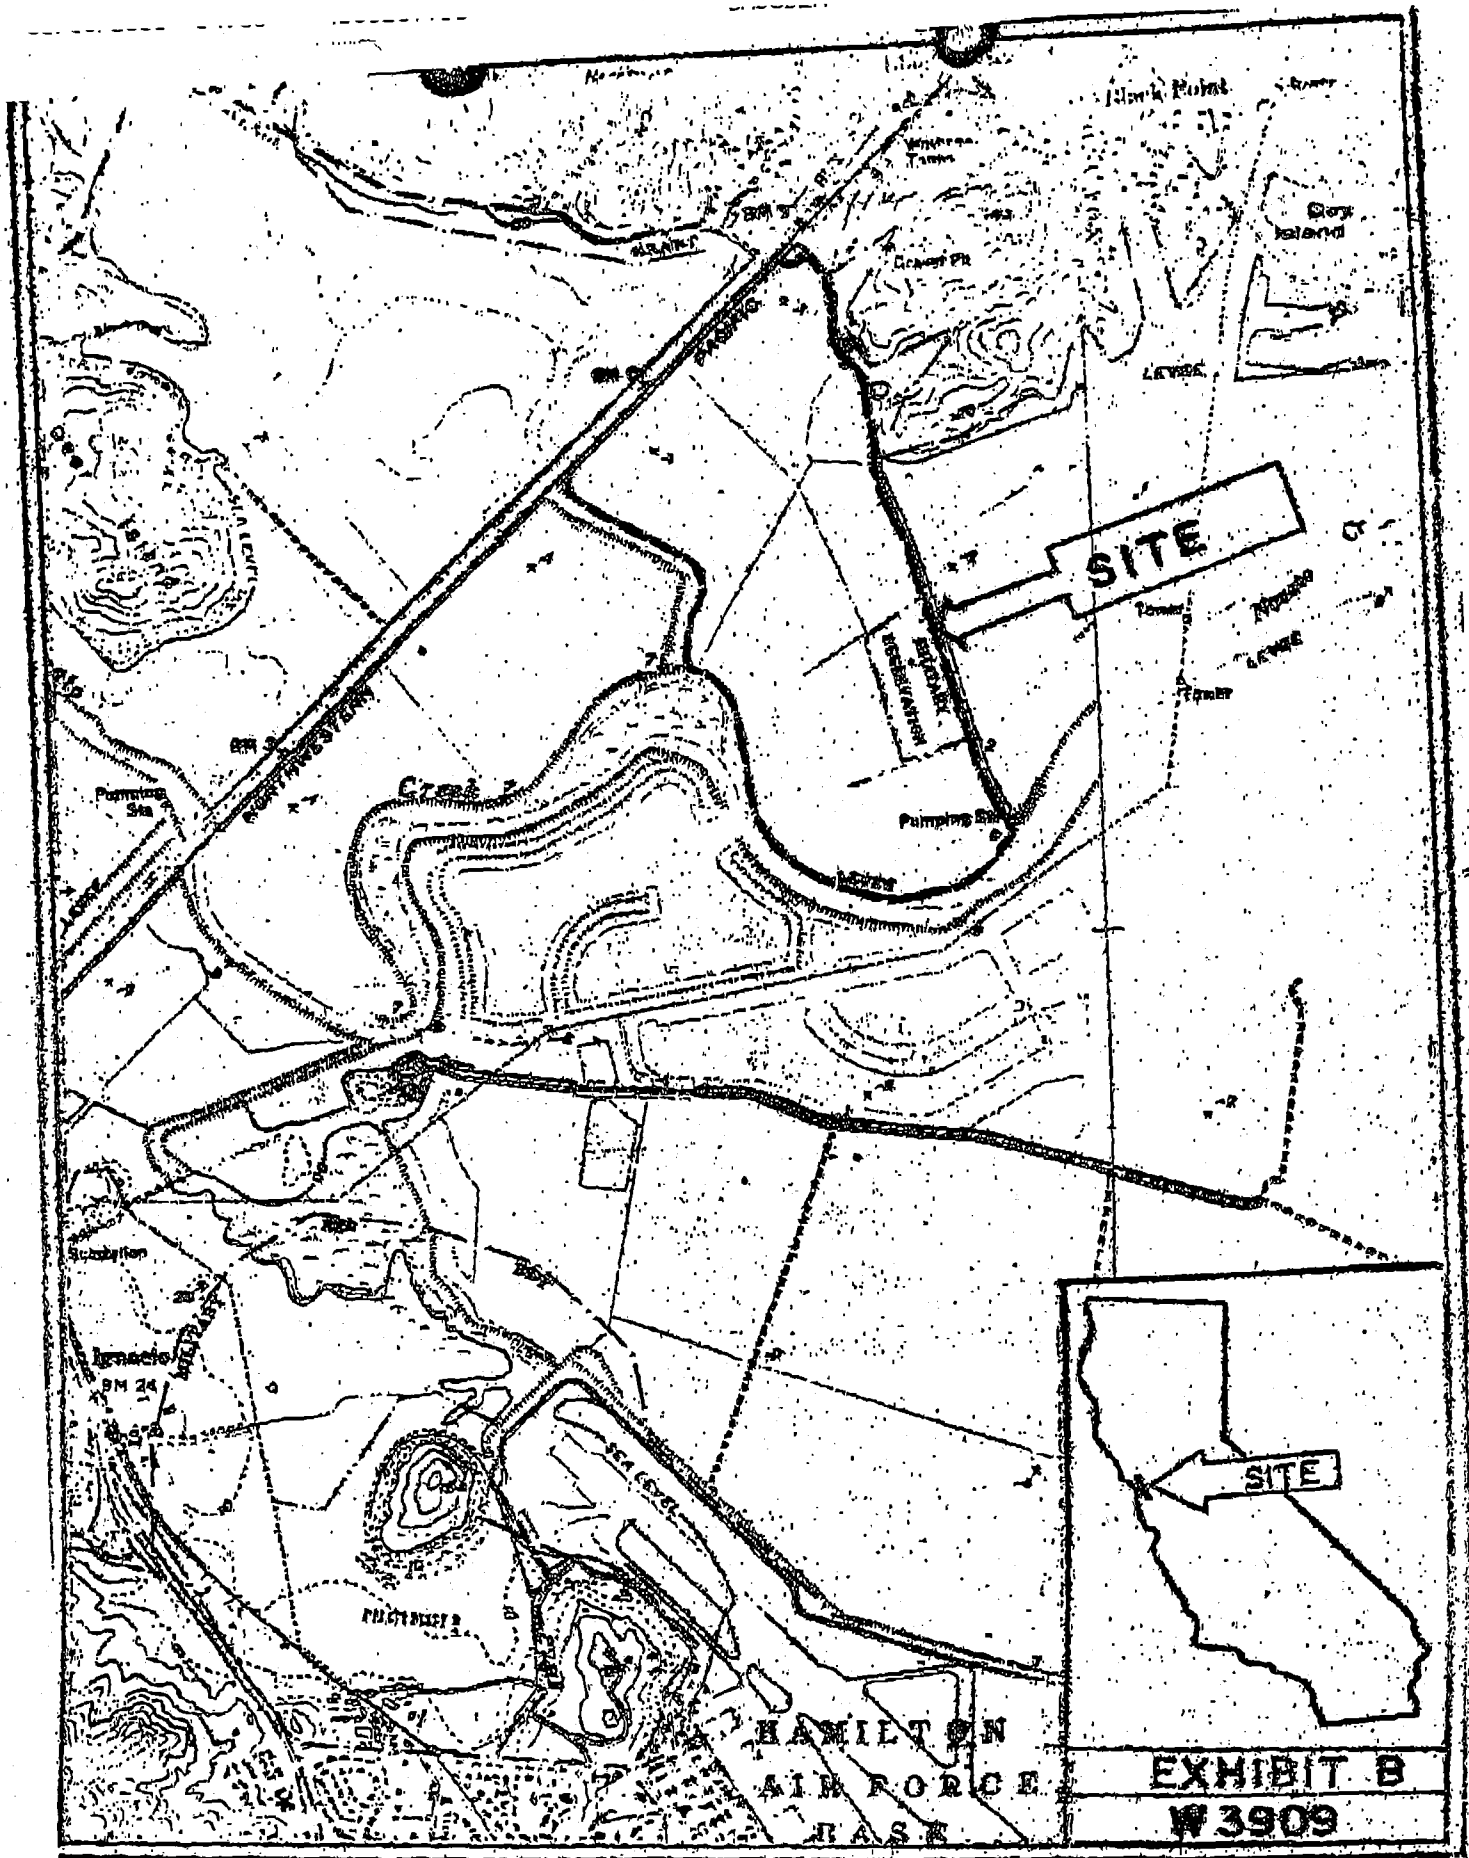

The Federal Government disputes the existence of any State titles within the Base and refuses to delay its disposition procedures. Further action may substantially jeopardize the State's titles and litigation appears to be essential.

to permit the dispute to be resolved according to the law and the evidence.

IT IS THEREFORE RECOMMENDED THAT THE COMMISSIONER AUTHORIZE THE ATTORNEY GENERAL TO INSTITUTE AND PROSECUTE LITIGATION AS MAY BE NECESSARY AND APPROPRIATE TO IDENTIFY AND PROTECT THE STATE'S TITLES WITHIN THE LIMITS OF WHEELING AIR FORCE BASE.

**NOTICE OF PUBLIC HEARING**  
**LAND USE & ECONOMIC DEVELOPMENT COMMITTEE**  
**SAN FRANCISCO BOARD OF SUPERVISORS**

NOTICE IS HEREBY GIVEN that the City and County Board of Supervisors' Land Use and Economic Development Committee will hold a public hearing to consider the **Treasure Island/Yerba Buena Island Development Agreement**.

**Date:** Monday, June 6, 2011

**Time:** 1:00 p.m.

**Location:** Committee Room, Room 263 located at City Hall, 1 Dr. Carlton B. Goodlett Place, San Francisco, CA

**Subject:** File No. 110226. Ordinance approving a Development Agreement between the City and County of San Francisco and Treasure Island Community Development, LLC, for certain real property located within Treasure Island/Yerba Buena Island; exempting certain sections of Administrative Code Chapter 6, Chapter 14B and Chapter 56; and adopting findings, including findings under the California Environmental Quality Act, findings of consistency with the City's General Plan and with the Eight Priority Policies of Planning Code Section 101.1(b), and findings relating to the formation of infrastructure financing districts.

The subject of the hearing regards Assessor's Block No. 1939 and the subject Ordinance adopting a Development Agreement pursuant to Administrative Code Section 56. The Development Agreement is for the Treasure Island/Yerba Buena Island Development Project, which proposes approximately 8,000 dwelling units, 140,000 square feet of retail uses, 100,000 square feet on commercial office space, 500 hotel rooms, 300 acres of open space, and various public service, civic, and institutional uses. The project would provide other public benefits including the investment of approximately \$155 million in transportation infrastructure and the creation of thousands of construction and permanent jobs.

Persons who are unable to attend the hearing may submit written comments regarding this matter prior to the beginning of the hearing. These comments will become part of the official public record.

A copy of this measure and supporting data are available in the above-mentioned file of the Clerk of the Board of Supervisors. For more information regarding the above matter, call (415) 554-5184 or write to: Clerk's Office, Board of Supervisors, Room 244, City Hall, San Francisco, CA 94102.

Attached is the letter from Mary Miles of the Coalition for Adequate Review dated and received by the Board on 5/18/11, which I was reading from at the hearing two weeks ago regarding Supervisors Wiener's plan to allow the modification and repeal of voter-approved initiatives. This letter explains why it is unconstitutional.

**Re: BOARD OF SUPERVISORS File No. 110401 [Charter Amendment – Allowing  
Amendments to or Repeals of Initiative Ordinances and Declarations of Policy]  
Rules Committee Agenda of May 19, 2011, Item No. 6**

### PUBLIC COMMENT

This is public comment on the proposed Charter amendment allowing the Board of Supervisors and/or Mayor to amend or repeal initiative ordinances and declarations of policy passed by voters. The proposed Charter Amendment is scheduled for hearing before the Rules Committee on May 19, 2011, Item No. 6.

The proposed Charter amendment claims that the constitutional right to voter initiatives is a “cumbersome system” that only “encourages more and more initiatives” and should be removed from the voters by enabling the Board of Supervisors and/or Mayor to repeal and amend voter-approved initiatives and to legislate expiration dates for voter-approved initiative measures.

The proposed amendment violates the spirit and letter of the California Constitution, which states: “All political power is inherent in the people. Government is instituted for their protection, security, and benefit, and they have the right to alter or reform it when the public good may require.” (Cal. Const. art. II, §1) This power is not a right *granted* to the people, but is a “power *reserved by them.*” (*DeVita v. County of Napa* [“*DeVita*”] (1995) 9 Cal.4th 763,775-776, emphasis added; and *see*, United States Constitution, Preamble) Courts liberally construe this power to protect the right of the people to local initiative or referendum. (*DeVita, supra*, 9 Cal.4th at p. 776)

No authority permits the Board of Supervisors and/or the Mayor to repeal, amend, or place time-based expirations on ballot initiatives passed by the voters. To do so would negate the powers vested in the people by the Constitution.

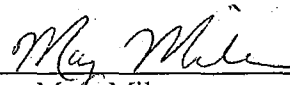

In fact, the California Elections Code section 9125 expressly provides that no initiative measure can be repealed "except by a vote of the people, unless provision is otherwise made in the original [initiative] ordinance." In affirming the force of this provision, the California Supreme Court has explained that Elections Code section 9125 "has its roots in the constitutional right of the electorate to initiative, ensuring that successful initiatives will not be undone by subsequent hostile boards of supervisors." (*DeVita, supra*, 9 Cal. 4th at p. 788, 797) The Court emphatically declined to place limitations on the right to voter initiative, even though "all initiatives place limits on a government body's capacity to legislate in areas that are otherwise statutorily authorized, some of those limitations quite severe." (*Id.*, emphasis in original)

The proposed Charter Amendment is also preempted under the California Constitution article XI section 7, since it conflicts with state law, the California Constitution, and the United States Constitution. Both proposing this Charter Amendment and voting for it are violations of ethical duties that subject a public official to discipline and/or removal from office for willful misconduct, including failure to perform duties in compliance with the law. (SF Charter §15.105)

The Board should decisively reject the proposed Charter amendment as an unprincipled attempt to usurp the fundamental rights of the electorate that are the foundation of democratic government.

Please place a copy of this Comment in all applicable files.

Subject: Stock Option Tax

---

Hello,

I am writing to express my support for the change of the 1% tax on stock options in San Francisco proposed by Supervisor Mark Farrell. This is an anti-competitive tax and as a San Francisco resident and employee, I think San Francisco collects enough taxes already from employees, residents, and businesses together. This extra 1% on stock options is unnecessary.

Thank you,  
Cristina Gutierrez

Dear Mayor Lee and Supervisors,

We are excited that City Hall is focusing on creating a solution to the stock options issue

as a member of the technology community in San Francisco, I strongly urge you to support Supervisor Mark Farrell's stock option legislation!

We support Supervisor Farrell's proposal for a number of reasons:

1. City Hall has to create a permanent solution to the problem, or tech companies (and they jobs they create) will continue to evaluate leaving San Francisco. A temporary solution sends the message that San Francisco is not interested in creating long-term solutions for the local economy. I assume that after 6 years San Francisco won't start taxing stock options again, so why not create a permanent solution?
2. Private and public companies should both be treated equally - it is the only common-sense solution. Supervisor Farrell's legislation ensures that both private and public companies benefit - not only are private companies thinking about leaving San Francisco, but larger, public companies (which employ thousands of San Franciscans) are growing their employees outside of San Francisco. I want these jobs to stay in San Francisco - and Supervisor Farrell's legislation will do just that.
3. Supervisor Farrell's legislation Insures that San Francisco's general fund will not face any additional budget deficit. City Hall won't collect more taxes on stock options, but his legislation is designed so that current levels of tax revenue from stock options will stay constant.

Supervisor Farrell's legislation strikes the right balance in creating incentives to keep tech companies in San Francisco, while protecting the City from adverse budget impacts. Our local economy is at stake - please focus on the long-term, and support Supervisor Farrell's legislation!!

Sincerely,

Todd McKinnon

Subject: Chaffee -- NY Times Outs San Francisco's "City Hall Family" Cf. Cosa Nostra

---

Dear Friends,

Way back on January 4, during my public comment at the first Board of Supervisors meeting of this year I inveighed against the supervisor's calculated invocation of the term "City Hall Family." My comment, taken from my notes, was:

*One hears constantly now references to the "City Hall Family." Of course they don't mean the entire citizenry of San Francisco. It refers to a very small set that shares their selfish interests.*

*The bankers who took billions of public money as a bailout and still pay themselves bonuses worth tens of millions, think nothing of it because they are the "financial services family." Those who misrepresented home loans, formed them into derivatives with phony financial ratings and padded their own commissions at every step, had no compunction. As far as they were concerned it was for the "mortgage industry family." The Mafia calls itself a family. Finally, the National Socialists were part of a family. The people in the Public Library don't consider it lying and cheating and fraud, it is just what is necessary to foster and support the "Friends of the Library family."*

*There was a time when people believed in democracy. The citizens need to accept their obligations to society and contribute to the good of society, and they look to you supervisors as an example. Not only do we have supervisors who are morally reprehensible enough to operate on the premise that City Hall is a "family" but they are so uneducated they have no compunction about actually saying it into a microphone. The idea that those in charge considered themselves a "family" was the problem with aristocracy that the principles of democracy were supposed to solve. The idea that we have supervisors who have no training in democratic principles is just appalling.*

The NY Times has an article in today's edition that takes note of the phenomena. The Times takes it as an example of the brazenness of the political machine. Actually it was invoked not for any actual connection, but rather most often by David Campos, David Chui and John Avalos and others who act like distant cousins whose uncle just won the lottery. The point was supposed to be the moral detachment that excuses the mistreatment of those not part of "our crowd." The NY Times has a different twist.

You may want to take a look, below.

James,

**'City Family' Has a Nice Ring, but It Looks a Lot**

24

# Like a Machine

By ELIZABETH LESLY STEVENS

*Elizabeth Lesly Stevens writes a column for The Bay Citizen.*

Mobsters have the Cosa Nostra. Oil producers have OPEC. And San Francisco has its City Family.

The term is much in use lately. Mayor Edwin Lee invoked it in unveiling a pension-reform plan produced after months of working with the city's unions, elected officials, City Hall executives and the financier Warren Hellman (who is chairman of The Bay Citizen).

Declaring it the plan of "the official City Family," Mr. Lee pronounced himself well satisfied with a proposal that falls far short of the savings he declared critical just three months ago.

Other ideas, notably a measure advanced by Jeff Adachi, the city's public defender, are, to Mr. Lee, unworthy of discussion.

In this one-party town, members of the family may be progressive Democrats or moderate Democrats, gay or straight, teetotalers or potheads. At the end of the day, however, they can be counted on to act with remarkable public cohesiveness.

Of course, the term has a different meaning in times of civic tragedy. A city firefighter was killed Thursday, and another critically injured. No one questions Mr. Lee or city officials' sincere offerings of sympathy.

Yet the charm of the City Family gathering to sing "Kumbaya" in celebration of political compromise can be a glib bit of theater, masking the fact that the needs of a complex, changing community are not being addressed.

The City Family is "a powerful metaphor for conformity," said Matt Gonzalez, an ally of Mr. Adachi and a former president of the Board of Supervisors. "It's a rhetorical tool, and it's very powerful."

As a phrase and as a political force, the City Family is enjoying a renaissance, said Eric Jayé, a veteran political consultant. He traces the term's origin to the powerful troika of Willie Brown, Representative Phillip Burton and his brother, John Burton, now head of the California Democratic Party, who ruled the city (and played an oversize role in California politics) for decades. The phrase's return to vogue marks "the return of this organization to political ascendancy," Mr. Jayé said.

In many cities, this would be called a political machine. In San Francisco, gentler language is preferred.

Gabriel Metcalf, who heads the San Francisco Planning and Urban Research Association, or SPUR, a good-government group, was among the City Family folks who appeared at Mr. Lee's announcement of the pension deal (though SPUR has not yet decided which pension measure to endorse). Mr. Metcalf has broken ranks with the City Family on a couple of issues in recent years, and he knows the cost.

"In San Francisco, there seems to be a belief in thought crimes," he said, "meaning that people who speak out, say things they are not supposed to say, will be shunned."

No one has been shunned more in the last year than Mr. Adachi. Since he first introduced a pension-reform measure last year, he has been a pariah to the City Family. When Mayor Lee first met with department heads after taking office in January, he warned Mr. Adachi against renewing his divisive efforts. Union leaders refused to take part in any meetings that included Mr. Adachi.

Even San Francisco's watchdog — the city's Ethics Commission — is a member of the family. Last month, when Dennis Herrera, the city attorney and a mayoral candidate, found himself facing a lobbying scandal involving his campaign manager, he made a public to-do of referring the matter to an outside agency, Oakland's city attorney. Alex Katz, communications director for that office, initially told The Bay Citizen that he was not aware of the case. Upon checking, he said that the investigation has since been handed over to — the San Francisco Ethics Commission.

Who appointed one of the five commissioners? Mr. Herrera. Who appointed the other four? The mayor, the district attorney, the assessor and the Board of Supervisors — all elected officials whose ethics the commission is supposed to police.

Chris Daly, the outré supervisor who termed out of office in January, has almost nothing in common with Mr. Adachi. But Mr. Daly, too, is an untouchable as far as the City Family is concerned — perhaps one reason his post-elective life features a broom and a bar towel.

"Social institutions need to recreate and reinforce" San Francisco's economic and political status quo, Mr. Daly said from the bar he now operates blocks from City Hall. "The City Family, they are the caretakers of that order. As long as you stay in line, it's all good."

Subject: Tuesday SFBOS - final vote on Parkmerced

---

Monday June 6, 2011

RE: SFBOS final vote on the Parkmerced project.

San Francisco Board of Supervisors;

This tuesday you are voting on a project of major concern, socially, environmentally and financially. Your vote on tuesday represents the decision that could be a victory for public concern and benefit, or a decision to ignore and roll-over the myriad of issues raised by numerous public and community organizations on the EIR and the facts that have repeatedly been ignored to date in decisions by the SF Planning Commission, SF Land-Use, and SFBOS to date.

To prevent the legal implications, why not send it back to the planning department. You almost did on the last vote, and with only 1 swing vote it was approved, this shows that the concerns are important enough to consider the alternatives and require more thought. The whole process as you have noted is a rush, and there is plenty of empty buildings, homes and units citywide. The state just voted to postpone a major decision that would infer information on the Palmer Decision and the inclusion of affordable rental housing issue SB184 that was the primary concern of the Bay View Hunter's Point Project and how Lennar threatened the city if forced to build affordable rental housing. With legal issues pending on Treasure Island, the SF Housing Element and Parkmerced, it seems to be more of a solution than ever to reconsider this project and its impacts in light of the public's best benefit. I have issued many memos on the concerns but want to remind you of the primary ones prior to your vote. Rent Control issues have been numerous and raised by local and state organizations on the issues and impacts on the cities housing rental stock. The items follow on additional concerns;

***a) the promises on the developer agreement per state law are un-enforceable at the state level. Without declaratory relief the issue will be that of the fillmore and displacement/gentrification of existing rental garden units that serve as essential social housing on the western side of SF.***

***b) the developer agreement ignores the loss of open-space per unit of the garden apartments***

***c) the transit routing has NOT been vetted by caltrans on the issue of grade-seperation and the shortest distance between two points which is a straight line direct to daly city bart.***

***d) the impact of SFSU-CSU on housing stock and the lack of working class housing in district 7, including the future un-affordable prices stated clearly as conservative estimates in the CBRE report of 3,000 per month for a 1-bedroom and 800,000 for a for-sale unit.***

***e) the environmental impacts of a total clear-cutting and regrading of a site, water wise, and micro-habitat wise due to the adjacency to lake merced, and the concerns raised by the SF Green Party on the carbon footprint impacts when preservation is shovelled aside for large-scale demolition.***

***f) the lack of vision in terms of 1:1 parking when the underground garages proposed for parkmerced already exist and are empty, when this money could be better spent on the transit linkages and future north to south lines on the western side of san francisco including a sloat boulevard or sunset line that could parrallel 19th ave.***

***g) the human impact on the long-term residents that cannot be prevented when garden units are replaced in higher density without a softer and more scaled back approach.***

26

***h) the lack of public protection for the tower units when ignoring the seismic concerns of the only towers and units built without retrofitting of the units in the proposal.***

***i) the in-adequate CEQA analysis as noted by Commissioner Kathrin Moore in her memo, and the astute points she raised on the need to review this project properly.***

***j) the petition online on [www.change.org](http://www.change.org) "Parkmerced" that notes over 200 signatures against the development. This is not many, but it provides a basis for the concerns when people sign the petition country/world wide and raise the bar on what should be done by the city.***

***k) the lack of affordable rental housing citywide, which is against prior policy in the need to provide the OPTION of renting vs. home-ownership in the housing created and built for city existing inhabitants.***

***l) the concern that renovations done prior by Stellar did not implement serious efforts to build sustainable, or low-tech implementable steps on green and environmentally sustainable efforts such as roof-drain systems, solar, wind, and proper composting facilities. Instead they focused on quick flipping of the property, exterior and interior fast renewal of finishes, spending money, and ignoring sustainability for blitz, media (TV's), imagery, and signage.***

***m) the importance of "EQUITY" density which means the building equitably around ALL neighborhoods, so that one is not disproportionately affected by density and development. The concern here is that the major transit lines (3 of which come out at West Portal) have been ignored in the future planning of this neighborhood, and with the SFSU-CSU and Stonestown and other neighborhood projects, the impacts are much larger transit/traffic/parking wise than what is projected. Without adequate steps to densify and infill along existing corridors to defer the impacts on one community, you are consistently stepping on the poor-middle class renter vs. adequately dispersing the impacts.***

***n) Money is not everything, and tax base cannot be the decision maker, when you have two other major projects in the pipeline (Treasure Island and BVHP). This means that to push this forward again without discussing the premise of why Parkmerced was built, and for whom it was meant to serve on the western side, ignores the true need for social housing and the lack of it citywide.***

***o) the lack of a Soundness report clearly indicates that there is no proof to date of the condition of the existing units. As noted the SFSU-CSU owned blocks were repaired with flashing and dry-rot repairs, and this was NOT done in similar fashion by Stellar since they are proposing demolition. The need for independent analysis of the sound housing the garden units provide is critical, and ignoring it is ignoring the premise of the SF general plan.***

Finally I hope you will read this memo in entirety, looking again at the issues and concerns prior to your final vote on the subject. You CAN make a better project by voting against the current EIR, and ensuring that the planning commission and organizations spend time CHANGING the plan for the improvement of all san franciscans. This is not a vote to deny the owner change, it is a vote ensuring that a proper level of adjustment is made to the proposal. That it includes the interests of ALL san franciscans, and that a developer's push to approve without true CEQA analysis and remediation in the proposal is not ignored. If 6 national organizations representing preservation issues have submitted a memo of concern together, it is imperative that you not only listen with both ears, but you look with your eyes at the ground level, on site, and in the documents, to ascertain what is truthfully portrayed and what deems further investigation.

I again urge you to read SF Planning Commissioner Moore's memo on the Parkmerced plan, in addition to the attached memo by 6 national/local organizations.

We do not realize our impacts till it is too late, and in this project the pressure to approve seems to ignore the principles of law too many times to go further. Based alone on architectural principles, the health safety and welfare of the existing and surrounding communities and residents, this project is too large, and too impacting to ignore. It requires revisions and to date there has not been significant political effort to change this.

YOU can make the changes, and help to build a better project, it can be more green,

more sustainable, and more long-term-reaching in its solution, but you will need to muster the courage to confront the proposal as it currently stands. David Chiu's vote stands currently as one that could have sent the project back for review and adequate revisions. The second vote can either affirm the developer gravy train of project approvals without adequate CEQA review of alternatives, or it can ensure public community and neighborhood voice in the decision process by making the project revise its negative or ignored impacts.

that is the best public interest, and the decision is in your hands, or the courts....It seems more prudent to take the longer road through revision than the courts which could be more costly not only financially, but humanistic/socially/physically due to the current negative impacts this project will have on the backbone of rental housing transit and the environment in the western districts of san francisco.

My brief submittal "parkmerced\_today" points to the changes, and suggests alternatives which included infill in the submissions to the SF Planning Department that could meet and exceed the developers profit margins, and amount of construction district-wide when based on infill and preservation as a significant alternative. It is not the only solution, but when one is presented it seems prudent to look carefully at it with an investigative eye. To date it has been ignored, which imperils much more than common sense, it loses the basic ability to ensure that design and the cities built environment has a mix of solutions, and is not stifled design wise, by only big firms with profit-motives as the only "green-\$-greed-solution"....

Sincerely

Aaron Goodman

Subject: BOS Meeting Agenda for Tuesday, June 7, 2011: North Beach Public Library and Joe DiMaggio Playground Master Plan

---

Honorable Supervisors,

We are writing in support of the North Beach Public Library and Joe DiMaggio Playground Master Plan.

1. Agenda Items 45 & 46, 110614 & 110615. The Final Environmental Impact Report (FEIR) is complete and accurate because it shows that by building a new library on a parking lot, tearing down the old library, and closing a half-block section of Mason Street, over 12,000 square feet of open space will be gained. More open space is critical in North Beach because it is the densest neighborhood in the city with the least amount of open space per capita. The FEIR finds that there were no significant impacts to traffic, public transportation, or emergency vehicle access in North Beach if we remove the parking lot and close a portion of Mason Street for a new library. The FEIR is thorough, complete and accurate. Please vote to affirm the certification of the FEIR.
2. Agenda Items 49 & 50, 110673 & 110312. The designation of 701 Lombard Street as Public and Open Space is a mere technicality needed to move the project forward. Please vote to hear and pass on first reading.
3. Agenda Items 51 & 52, 110315 & 110316. Closure of the short block of Mason Street between Columbus Avenue and Lombard Street is critical for public safety. Because Columbus Avenue cuts diagonally across the grid pattern it has created an intersection that is only 45 degrees instead of the usual 90 degrees. A vehicle turning from Columbus onto Mason need not brake to slow for the 45 degree turn as it would have to for the normal 90 degree turn. If this portion of Mason is not vacated, crossing from the library on the triangle to the playground will be extremely hazardous for pedestrians – particularly children and seniors. Vehicles normally drive at 40 to 45 miles per hour on Columbus and would make the turn onto Mason at those speeds. Please vote to hear and pass on first reading.
4. Agenda Items 53 & 54, 110666 & 110667. This resolution is necessary to move the project forward. Please vote to hear and adopt the resolution.
5. The Master Plan for the North Beach Library and Joe DiMaggio Playground has the support of the Recreation and Parks Commission and the Recreation and Park Department, the San Francisco Library Commission and the San Francisco Library, the Planning Commission and the previous Board of Supervisors. It has wide-spread support among the residents of North Beach as evidenced by the collection of over one thousand names on a petition.
6. There have more than ample opportunities for public input. That a handful of people can continue to delay this vitally important City and County of San Francisco public project is totally incomprehensible. We urge you give unanimous approval to this project so that we can finally move forward without further delays.

28

San Francisco Board of Supervisors  
San Francisco City Hall  
1 Dr. Carlton B. Goodlett Place  
San Francisco, CA 94102

Dear Members of the Board of Supervisors:

As a resident of the North Beach neighborhood for the past 19 years and a parent of two children, I urge you to support the new North Beach Library Branch project and the adoption of the Environmental Impact Report.

The proposed North Beach Library and Park Master Plan - which includes a new library, the permanent closure of the limited public space in the area. The master plan has been vetted and is deeply desired by the major Quadrant of San Francisco.

I recall going to a North Beach Playground improvement meeting in 1997, when my now 15 year old daughter had the chance to make the dream of an improved park and a new library a reality.

The idea of renovating the current North Beach Library, given its many ADA obstacles, is a wasteful use of funds. An outstanding master plan cannot go forward.

Thank you in advance for honoring the needs and vision of the community, and for your support of the new library to come.

Sincerely,

Cathy Cormier

Subject: North Beach Library - Yes!

---

This Tuesday, June 7, you can help us make a new library and decent playground a reality for North Beach, Chinatown, Russian and Telegraph Hills.

Surely every supervisor hopes to provide quality City services for his or her constituents. We are asking for no more than our fair share. We are an old neighborhood, densely settled, with high numbers of economically disadvantaged families. That density, and extreme land values, make acquisition and expansion impossible. We have worked hard - for 12 years - to solve the toughest urban planning problems, to optimize what we have. The North Beach Library was rated one of the top two high needs libraries in 2000. We are one of the last two branches to be update a decade later. It's time.

We hope you will help us on June 7.

Thank you,

Dear Supervisors,

Please vote to approve plans for the new North Beach Library, including closure of Mason Street to accommodate more open space. Our neighborhood has worked long and hard to come up with a plan that works for our community I realize there are objections but there will always be objections from somewhere/someone/sometime. The fact is that neighbors have come together and held numerous community meetings over more than 2 YEARS to come up with a Master Plan - it is time to move forward with this project and let North Beach kids, families, seniors, and adults enjoy a new library and more open space!

Thanks in advance for your consideration,

---

Dear Board of Supervisors,

I am writing in support of the proposed North Beach Library and Playground.

I am a home owner in North Beach with a small child that spends his day in our neighborhood, playing in the Di Maggio Playground and attending the toddler reading times (which can longer be hosted at the library). We NEED this new library and playground. More and more families are choosing to stay in San Francisco and we want North Beach to be able to support the

needs of these families and the rest of the community.

I support the EIR, the Master Plan with the new library, closure of Mason street and new playground. It is the best option for the community, making optimal use of the limited space available.

Thanks so much to all of you who have supported the project and worked so hard for our community, especially Supervisor David Chiu. I urge all of you to support the project and let North Beach *finally* have a resource such as this that other neighborhoods take for granted.

Sincerely,

**Brendan King**

Subject: North Beach Closing of Mason Street

---

I don't know who did the survey of closing Mason Street but this is one of the main lines (streets) going to fisherman's wharf, Safeway etc. There are also around 12 parking spaces that we will be losing. Not only that, where is the money coming from to maintain this area. I don't believe a new library is needed, after all, we are in a new world of technology and most of the children/adults use their computers at home along with the new Kendal books coming out. I'm sure most of the smaller libraries will be obsolete in another 10 years.

PLEASE don't let them get away with this, this library is part of our neighborhood and serves its purpose. Why again fix something that isn't broken Maybe looking at the school yards in the area, they should be open for children to play in, instead of parking cars. We already have North Beach (DiMaggio's) playground and the Salesians boys and girls club, tel hi for the children to learn and play. Please put a stop to this nonsense of wasting time and money.

Subject: North Beach Library and Playground

---

Dear Board of Supervisors:

My husband and I have lived in North Beach for twenty years and we fully support the master plan for the new library, the closure of Mason Street and the renovated playground for which on June 1st the Rec & Park Commission Budget Committee approved the Prop 84 grant proposal. The master plan makes optimal use of what limited public space we have and is deeply desired by the majority of neighbors. Our nine year old twin boys use the library and playground on a regular basis and they are always asking why North Beach has one of the worse libraries and playgrounds in the city, and it's all too complicated to explain the many hurdles that have been placed to halt the plans for a new library. I am not an architect but growing up in London I know that the present library has zero historical significance. Its beyond renovation and is no longer functional for our disabled residents. Quite frankly It's one ugly heap of bricks that should have been demolished a long time ago. The new library and playground will greatly improve the quality of our everyday lives in the neighborhood.

Please approve the master plan for a new library and playground because the residents of North Beach, especially the children, need it badly.

Yours sincerely,

Subject: Please Support New Library

---

June 6, 2011 - Monday

TO: San Francisco Board of Supervisors

Dear Supervisor,

I am a 25 year member of North Beach who supports the building of a new public branch library on the triangle defined by Columbus Avenue, Mason and Lombard Streets.

As former Vice President of the Telegraph Hill Dwellers, I was one of the community proponents who convinced many others in the neighborhood to acquire the above referenced triangle for public use. I helped collect over 1,500 signatures in favor of the eminent domain of the property.

Since then, I have attended several hearings on the proposal to build a new library. Initially, I was in favor of building the library on the corner of Powell and Lombard, the northeastern-most corner of the playground.

However, because the public process has been extremely fair and open, inviting to the neighborhood and democratic, and because I am convinced that a majority of the neighborhood and all those city officials who have looked at the situation dispassionately agree that the community is best served by a new library on the so-called "Columbus triangle," I am now in favor of the proposal to build the library there. And to do it soon.

Thank you for consideration of this matter, and please do not hesitate to phone or email me should you have any questions about my support for this important project.

Sincerely,

Marc Bruno

---

Dear Members of the Board of Supervisors,

I hope you will strongly consider voting in favor of the proposal to renovate the North Beach Library and expand the Joe DiMaggio Playground. I live in the North Beach neighborhood and have two young children. I believe strongly that all of the children in the North Beach area would benefit from these improvements, and that these improvements would ensure that the North Beach neighborhood continues as a place where families in San Francisco can raise children with a strong sense of community.

Best regards,  
Kathleen Liu

Dear Board of Supervisors,

Please adopt the resolution to authorize the use of real property located at 701 Lombard Street for the Joe DiMaggio Playground Master Plan Project.

My name is Ruth Mathison, and I am a mother of two children who attend Yick Wo Elementary School. We support the master plan and the findings of the Environmental Impact Report (EIR). The master plan makes optimal use of the limited public space we have in North Beach and gives us the best hope for the future of our neighborhood.

Thank you for your attention.

Sincerely,

Ruth Mathison

Hello,

I'm writing to express my concern for the building of the new North Beach library and park. This project is absolutely crucial for the neighborhood and the children that will benefit from it. Not building it would be hindering the development of our amazing neighborhood's children and families. Please, please, please do not let anyone claim this as a "historic" building -- what exists now is a complete mess and eyesore for the community compared to the new building we could and should have.

I urge you to allow the revamp of the library and park addition. You will not be sorry when we are given a new, beautiful place to read and grow! It's so important and I encourage you to consider all of the benefits -- believe me, they will significantly outweigh any negatives.

Thank you for your consideration.

Sincerely,  
Sydney Pfaff

I live on Powell Street, directly across the Joe DiMaggio Playground.

I am **AGAINST** the closure of Mason Street for any building.

We need to insure that traffic movement is as readily accessible to all as possible. Should the neighborhood face an emergency, any impediment to traffic flow could be disastrous.

Also, on holiday weekends - Fourth of July is one example - the amount of cars in this area **drastically** increases. For whatever reason, I've observed that muni buses are practically non-existent during these times and so, we need to have as many convenient through streets for both our denizens and the tourists.

God's Blessings and Peace,

Josephine

Dear SF Supervisors:

Thank you for your previous supports for the proposed new North Beach Library project. I understand that those few who are not in support of the library have filed an appeal on the EIR. Again, I'm urging you to reject the appeal and approve the EIR and the project.

I and other supporters of the project see no merit in the appeal but do see a huge benefit of the new library and related park project in enhancing our neighborhood. My family has lived in this area for over 40 years and can attest that the new library and park is greatly needed.

As indicated in my previous e-mails to you all, I see no effects or concerns in closing Mason Street to achieve this project. In fact, I see this as been an improvement to the streetscape and traffic reduction for our neighborhood.

As an practicing architect for over 35 years and past user of the library, I'll say again that the existing library has no architectural significance to the extent it should be preserved. I value good architecture as much as any citizen or architect but this building merits no such importance.

To deprive the neighbors and our community of a new and improved library/park will be mistake. This opportunity would be come around again and we must take advantage and move this project forward. We must take into consideration the desires and needs of hundreds of our neighbors who have voiced their support for this project over the objection of a few obstructionists.

I urge and seek again your support. Hundreds of our neighbors have worked hard for many months in getting this project approved. Please do not disappoint them. Thank you again for your attention and support.

I'm a property owner in Russian Hill/North Beach just up the street from the proposed library and am choosing to raise my family here. North Beach, Russian Hill and some Chinatown families use the Joe DiMaggio Playground, and all the local moms I've spoken with are in favor of a new library and playground. (Everyone I've seen who has posted on this issue on a local North Beach Moms Yahoo group has been in favor of the changes as well.)

The current library is extremely small and the building is old. Its open hours are also inconvenient for working families because it falls during toddlers'/preschoolers' nap times on Saturday and it's closed on Sunday.

Weeknights are tough because you usually only have enough time to make and eat dinner, bathe the kids and put them to bed.

Mason Street is already closed for farmer's market days and has no effect on traffic. The 'triangle open space' that opponents to the proposed library refer to is an ugly parking lot eyesore that has graffiti on the parking signs and needs to go. Expanding the library and improving the playground will not only help to keep more families in SF and encourage more to move to NB, but will also improve the aesthetics of that corner and help improve property values nearby.

**I'm very concerned that working families will be under-represented at the public hearing on June 7th at 3pm** and hope that you take into account not only who is in the room, but the emails that you receive from local parents choosing to raise their kids in SF. North Beach has more families here than many realize. I ask that you help move this neighborhood forward to encourage more families to stay in SF rather than keep a dated and small library and an ugly tiny parking lot that not many people use. Thank you for your consideration and time. :)

Regards,

Tessa Shvedoff

Esteemed addressees,

As a resident in the neighborhood of the North Beach Library, I strongly support the master plan for the new library, the closure of the small section of Mason St., the renovated playground, and approval of the EIR.

I believe the master plan makes optimal use of what limited public space we have, is deeply desired by the majority of neighbors and will greatly enhance the vibrancy of this neighborhood. The current library building is decrepit, and too small to serve the needs of its users.

I urge the Board of Supervisors to vote "yes" on the new North Beach Library Master Plan.

Sincerely,  
Anne Chermak Dillen

## Please, **PLEASE SAVE the Triangle!**

It is a vital part of our neighborhoods historical façade. It also allows for sun into the North Beach Pool and Playground area. It allows for spectator views from Tour Buses, Cable Cars, Segway Tours and other Tour Hosting entities.

In addition; blocking off the street on Mason between Lombard and Columbus is a VERY BAD IDEA! This idea has the potential to further tie up traffic during North Beach-Fisherman's Wharf special events, like Fourth of July, Columbus Day Parade, Fleet Week Weekend and other annual events. Making the North Beach traffic flow more cumbersome, cumbersome enough to where people won't want to attend the above mentioned events.

## **PLEASE, PLEASE SAVE THE TRIANGLE!**

Thank you, long-time resident,

**Annette Crivello**

Dear Board of Supervisors,

I am writing in support of the proposed North Beach Library and Playground.

I am a home owner in North Beach with a small child that spends his day in our neighborhood, playing in the Di Maggio Playground and attending the toddler reading times (which can longer be hosted at the library). We NEED this new library and playground. More and more families are choosing to stay in San Francisco and we want North Beach to be able to support the needs of these families and the rest of the community.

I support the EIR, the Master Plan with the new library, closure of Mason street and new playground. It is the best option for the community, making optimal use of the limited space available.

Thanks so much to all of you who have supported the project and worked so hard for our community, especially Supervisor David Chiu. I urge all of you to support the project and let North Beach *finally* have a resource such as this that other neighborhoods take for granted.

Yours sincerely,

Caroline King

Dear Honorable Supervisors,

In just a week away you will have the opportunity to decide on whether to move the North Beach Library forward that has been TEN years in the making.

I urge to please support a positive and once-in-a lifetime opportunity for the neighborhood and a vision that the super majority support.

North Beach has the limited open space and this proposed masterplan optimizes the relationships between park and Library.

Please support the Mason Street Closure; the re-zoning; and approval of the EIR and the Neighborhood wishes.

Dear Honorable Supervisors:

I am writing to express my support and to urge you to support the master plan for a new North Beach Branch Library and renovated Joe DiMaggio Playground. Please approve the closure of the short stretch of Mason Street and the EIR.

We, the super-majority of neighborhood residents who support this plan, represent the diversity of the neighborhood. We are people with children and people without children, people with disabilities and people without disabilities; we are renters and owners; we are young people, older people, and all ages in between; we have different backgrounds, different income levels, and we speak different languages, but with one strong voice we say:

Please allow our densely populated neighborhood to have the library and park that we deserve. Please allow us to have both a library and a park that are more accessible and more user-friendly. Please allow us to have both a library and a park that make the best use of the limited space we have. Please allow us to have both a library and a park that this community and this city can be proud of. Future generations will thank you for providing them with these new and well-designed facilities. And we who currently live in the community thank you for all your support for this plan.

Sincerely,

Lisa Garbus

Dear Supervisors,

We are writing again to urge you to support the new North Beach Library Master Plan and to approve the associated EIR. This includes the closure of Mason Street for one short block and important renovations to the Joe D Park and Recreation area. As members of the North Beach community we have followed this project from its inception and feel strongly, as do the great majority of our neighbors, that this is the right thing to do, most importantly for neighborhood children - both those of today and those to come. This one time opportunity can not be lost and future generations will be grateful for the foresight the City displayed in 2011.

David, we know you have provided important support for this District 3 project in the past and appreciate you standing firm through what seems to be an amazingly draw out and complex process.

Respectfully,

Dale and Susan Weidmer

Are we really discussing this issue again? Really? *Really?*

Does the community not have better issues to address like *funding for our schools, better city services and how to grow jobs* than to continue to waste time and energy on an issue that the majority of North Beach residents would like to move forward? I mean, really, the Board of Supervisors already voted on this issue, didn't you? *Quit talking, start building!*

I do want to thank David Chiu and the other supervisors who have shown significant leadership on this issue and to whose campaign I have already donated.

I want to urge the rest of the supervisors and administrators to vote affirmatively for a new North Beach library and bigger park - you will indeed build a legacy for future generations and would earn the support and gratitude of our community.

My offer still stands - If you would like a personal tour of the current library and park area from a resident who uses these facilities many times each week, I would be more than happy to do so.

Thanks!

Cheers, Serena

North Beach Resident, Mom of 2

On Mon, Nov 1, 2010 at 10:08 AM, serena satyasai <[serenasf@gmail.com](mailto:serenasf@gmail.com)> wrote:

OPEN LETTER TO SF BOARD OF SUPERVISORS

Supervisor Chiu and Director Wycko -

Not many folks have the chance to leave a legacy that will be cherished for generations to come. But that is exactly the opportunity you have in supporting a larger North Beach library and improved playground for the families of San Francisco's historic North Beach neighborhood. I am a long-time resident of North Beach and the mother of two children who attend Tel-Hi preschool and Yick Wo elementary school; I urge you to support healthy families and vote for moving the North Beach library to the triangle bounded by Columbus/Mason/Lombard and re-locating the playground to a space contiguous with the other play spaces (clubhouse, swimming pool, hard top).

The new library and playground has many benefits:

**#1. Make the library accessible for all.** Our current library simply doesn't have enough space let alone provide an environment conducive to the well-being of the different populations who use it - young children, teens, elderly and its regular patrons. At a most basic level, it is not functional - the bathroom is not handicap-accessible and is awkwardly placed behind a staff area. We have the responsibility to create a really great learning space for the community and our current library is failing in that mission.

It is the mission of a public library to provide access to information for all. The new library

design provides more space and specialized environments for example to hold story-telling time for tots, a quiet reading space for seniors, a learning space for teens. As the daughter of a librarian, I know we can build a much better library than the one we have today.

**#2. Create an open space for all to enjoy.** By re-locating the playground to the lower level, we will unite spaces that families heavily use. For example, I have a 5 year old boy who likes to ride his scooter on the lower level hardtop area while my 2 year old daughter likes to play in the upper level sandbox. I simply cannot be in two places at once as much as I try;) If you unite the two spaces, my family can stay together. The library and play spaces will also be joined so that there can be more easy access to both areas from each other. And finally, by closing the short block of Mason street to traffic, we will open up a space that has been successfully used for a weekly farmers' market, which we neighbors cherish as a way to see each other and catch up on the week's events.

**#3. Eliminate a traffic hazard and ensure pedestrian safety.** For anyone living west of Columbus, the traffic crossing at Columbus/Greenwich/Mason is a nightmare. Drivers traveling South on Mason often do not stop when they take a left at Columbus because they think it's a straightaway. When I cross that street with my two young children, I am often nearly run over by tour bus drivers, visiting tourists and others who have no idea that they are about to hurt someone, perhaps fatally. This crosswalk is heavily used by kids traveling to Sts Peter & Paul, Garfield, Francisco, Yick Wo, and Tel-Hi schools. It is also right next to the playground and library. By closing off a short block on Mason, we eliminate this traffic hazard.

**#4. Build for the future.** I love North Beach and cherish its history - I live in a home built just after the earthquake. But I am realistic and know that we have to build for the future. This neighborhood is one of the most densely-inhabited that San Francisco has. Already, the playground and common spaces such as Washington Square Park function as the yard for the entire neighborhood. Make sure we have enough space to grow! The new library gives us that room to grow - while still fitting in with the 2-3 story buildings all around it. The proposed play space gives kids more room to run and shout and more space for common neighborhood gatherings. Consider the legacy you can leave for my children's children.

Finally, if you are having a difficult time making a decision, I invite you to take a personal tour with me of the library, the playground and the other affected areas. I am sure when you walk in the footsteps of the families who use these facilities every day, you will understand why we are so passionate about this new vision for our library and playground.

I thank you in advance for your decision to support a bigger library for North Beach and and improve play ground area!

Sincerely,

Serena Satyasai

North Beach Resident, Mom of 2

Note: I am sorry I cannot make today's meeting as I am traveling for work today but I am available any time after Wednesday to take you on the tour. Just email me.

Subject: North Beach library and Mason Street

---

Dear Board of Supervisors,

Dare I say that I am surprised letters still need to be written proving the support of the community for this wonderful, inspired, forward-looking project. Of the handful of naysayers I have met, few use the park, have children and/or can really clearly articulate their opposition (which seems to have been something of a moving target). I strongly support the master plan which includes building of the new, lighter, ADA-accessible library, renovating the playground, accepting the EIR, closing Mason Street and hopefully making the little market a permanent fixture on some corner of the greener expanse. As everyone knows, this city is an international draw and North Beach, with its already limited public space, is at the heart of it. Make this beautiful vision a reality and show your support for the great majority of our community and for a more livable inner city.

Regards,

Yasmine S. Mehmet  
North Beach resident, mother of three

To: Board of Supervisors, City and County of San Francisco

From: Fay Darmawi, North Beach resident

Re: Joe DiMaggio Playground and North Beach Library

Dear Honorable Supervisors,

I am attaching a letter I wrote in October of 2010 to the then Board of Supervisors Planning Committee urging them not to landmark the North Beach Library. I am resending the letter as most of you are new to the Board. The facts in the letter speak to the need for your support of the master plan to expand the Joe DiMaggio playground, demolish the old library, close a portion of Mason Street and build a new library on the triangle lot.

Thank you for your attention to this very important matter.

**RE: NORTH BEACH BRANCH LIBRARY,  
NOT A LANDMARK**

Dear Honorable Supervisors Chiu, Mar and Maxwell,

For a building to be granted landmark status, it must retain a high level of integrity. The more a building retains its original aesthetic and functionality, the more integrity it has. The more significant the alteration a building suffers, the less integrity it has. The North Beach library is not worthy of landmark status because three prominent Appleton & Wolfard identifying elements have been altered and cannot be reversed. This letter will discuss the three following major and irreversible alterations at the North Beach library:

**1) The "Outdoor Reading Room" Conversion into the Existing Tot Lot**

The conversions of the original "outdoor reading room" into the existing tot lot removed the last and only trace of an Appleton & Wolfard "suburban park" setting at the North Beach library.

**2) The Pergola (Trellis Covered Patio) Cut-Off by an Iron Fence**

The construction of an iron fence separating the pergola/patio area of the North Beach library from the tot lot removed another Appleton & Wolfard defining element – the seamlessness of indoor and outdoor space.

**3) The Main Entrance Changed from Columbus Avenue to Mason Street;  
Columbus Avenue Entrance Locked and Barricaded Indefinitely**

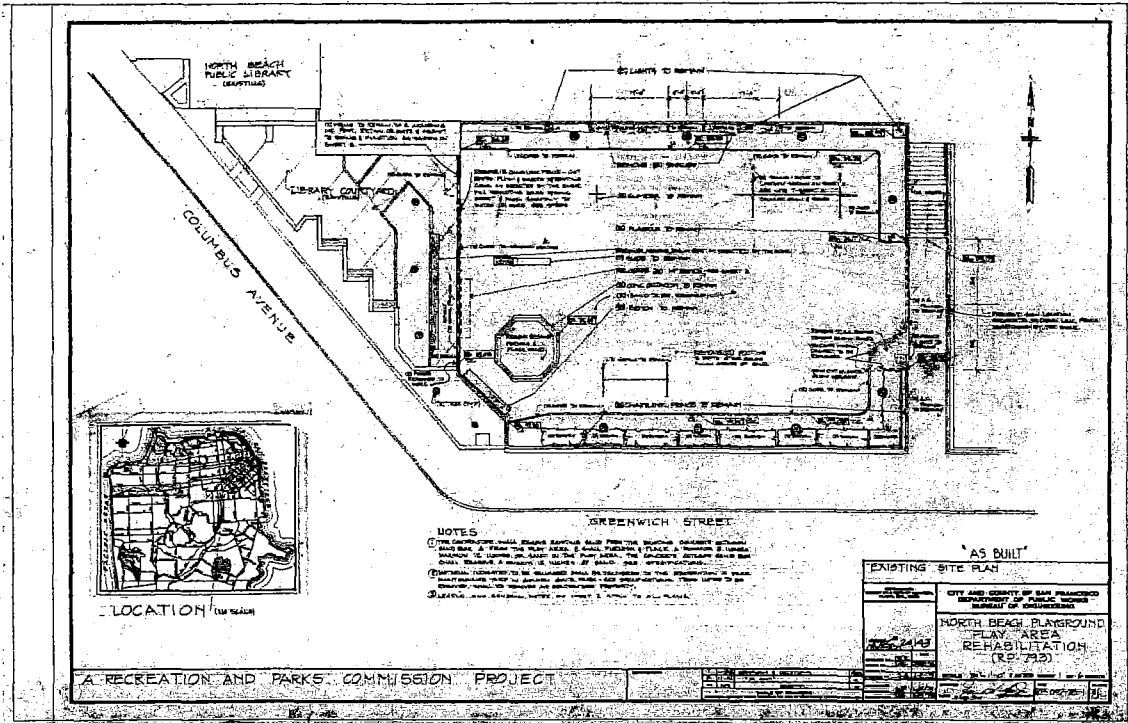

The permanent move of the library's entrance to Mason Street and closure of the original main Columbus Avenue entrance significantly altered Appleton & Wolford's aesthetic and functional intent for the experience of entering the North Beach library.

**(1) The "Outdoor Reading Room" Conversion into the Existing Tot Lot**

One of the hallmarks of an Appleton & Wolfard library is its setting in a "suburban-like" landscaped park. The North Beach library, when it was originally built, was no different. It sat, set-back from the street, behind an "outdoor reading room" – a large concrete patio with raised planter landscaping. Because the site was too small, sloped, and exposed to a major street (Columbus Avenue), the designers' attempt at shoehorning the "suburban-like" park failed and the outdoor reading room was underutilized. And in 1986, the outdoor reading room was converted into the existing tot lot. With this conversion, the North Beach library no longer sat in a "suburban-like" park – thereby losing one of the most defining elements of an Appleton & Wolfard library.

The City, if it chooses, may reclaim the tot lot for an outdoor reading room but in doing so would go against its own General Plan of promoting recreational and open space in North Beach, and against most of the families who live in the neighborhood. The

conversion of the outdoor reading room into the tot lot is irreversible from political and programmatic points of views.

“As Built” Drawings: Shows Library Courtyard or “Outdoor Reading Room” (1978)

North Beach Playground “Tot Lot” (2010)

## **(2) The Pergola (Trellis Covered Patio) Cut-Off by an Iron Fence**

Another distinguishing characteristic of an Appleton & Wolfard library is its uninterrupted flow of indoor and outdoor spaces. As originally built, the North Beach library had an outdoor trellis covered patio – a pergola – that flowed nicely, through large glass sliding doors, into the interior of the library. This design recalls many ranch-style homes in the suburbs of the 1950s. However, with the conversion of the “outdoor reading room” into a tot lot, an iron fence was built that cut off not only the physical movement between the library and its outdoor spaces but also any sight lines. The iron fence prevents movement but also views into the tot lot from the library, thereby removing a crucial element of Appleton & Wolfard libraries. Security for the tots playing in the tot lot prevents the removal of the iron fence.

Part of Pergola and View into Upper Level Reading Room (1957)

Pergola/Patio and Iron Fence (2010)

**(3) Main Entrance Changed from Columbus Avenue to Mason Street; Columbus Avenue Entrance Locked and Barricaded Indefinitely**

Entrances at the street level – a design element used to evoke egalitarian values, characterize Appleton & Wolfard libraries. The North Beach library has two such street level entrances, one on Mason Street and the other on Columbus Avenue. The North Beach library’s main entrance was intended to be the one on Columbus Avenue.

Main Columbus Avenue Entrance With Original Signage (1957)

The use of the Columbus Avenue entrance is no longer permissible as it violates public facilities accessibility laws. Since it’s closure, the signage at the Columbus Avenue entrance has been moved to its current placement on the wall facing Mason Street. The Columbus Avenue doors have been locked for at least ten years and a chain link fence has been added. Its disuse is punctuated by its current use as storage for garbage and recycling cans. The moving of the main entrance from Columbus Avenue to Mason Street represents a major alteration that decreases the building’s aesthetic and functional integrity.

Columbus Avenue Entrance (2010)

While the garbage cans and the chain link fence can be removed, the fact remains the doors must be locked as it would be against the law to open them since the inside landing is not handicap accessible to either the upper reading room or the ground level stacks. The functional obsolescence of the Columbus Avenue entrance can be traced back to the initial forcing of a "suburban" prototype into a tight urban site. That decision resulted in an awkward 3 and 1/2 story library building and the making of the North Beach branch the only Appleton & Wolfard with more than one story.

My two children, who attend Yick Wo Elementary School, and I regularly use the library. I have a BA in Urban Studies from the University of Pennsylvania and a Masters in City Planning from the Massachusetts Institute of Technology (MIT). Therefore I am very conversant in the issues surrounding the current library and its eligibility as a landmark. As a family we have a strong stake in the future of North Beach and want to see it thrive for future generations. That is why I urge you not to landmark the existing North Beach library to make room for a bigger park and new library.

Thank you for your time and attention on this issue.

Sincerely,

Fay Darmawi

2011 JUN -2 PM 3:11

RECEIVED  
BOARD OF SUPERVISORS  
SAN FRANCISCO

Frank Dean, General Superintendent  
Golden Gate National Recreation Area, Building 201  
Fort Mason  
San Francisco, CA 94123-0022

Dear Superintendent Dean:

My family and I have lived in Marin for over three decades. We have jogged and hiked every trail on Mt. Tamalpais, as well as the Marin Headlands, Rodeo Beach and Marin Water District. In all those years, we have enjoyed taking our dogs to Rodeo Beach, Fort Funston, Ocean Beach and Crissy Field, as those are the only places they could run off leash. We have trained all our dogs to be good citizens and we remove any pet waste, anywhere we go. Now I find there is a plan in process to make some of our favorite places either leash-only or no-dog areas. This is most distressing.

At the age of 72, I still work in San Francisco but my recreational activities have been altered because of health concerns. I can no longer run trails or hike. Nowadays we take our dogs to the beach and various dog parks in the area. We have always enjoyed the GGNRA where our dogs can have the opportunity to run on the beaches and at Fort Funston. I have become concerned about the plans to severely restrict off-leash dog walking in GGNRA. What I have read in the Draft Dog Management Plan has disturbed me greatly.

There is one major point which is not addressed anywhere in the plan., GGNRA is NOT a national PARK. It was not intended to be. National parks have as their intent keeping the wilderness pristine and uncontaminated even by humans for the most part. GGNRA is a national RECREATION area; ergo, it was intrinsically intended as an urban recreation area. Yet the entire plan is written as if GGNRA were a national park and should be subjected to national park rules and regulations. This is very wrong. To put the same restrictions on it as on a national park defeats the purpose of recreation to begin with. National parks are to be preserved so people can go there and see the beauty of nature, walk specified trails and keep things unspoiled. Urban environments desperately need recreation areas where people can use the land, play and get exercise. There is a huge difference, and land in an environment as heavily populated as the Bay Area is more important than ever as a place where people can actually enjoy the land, not keep it untouched by man.

Dogs are as much a part of recreation as horses are and their owners should be no more prohibited from recreational lands than horse owners. Urban inhabitants have few places where they can go with their dogs and as a result have even greater need for such places. This plan takes none of that into consideration.

In fact, nowhere in this plan do I see mention of the enhancement of both health and recreational ability of the GGNRA. The plan is written as if it WERE a national park. In which case, all these areas should be accessible only by specific trails and should prohibit bicycles in

29

Superintendent Dean

5/23/2011

Page 2

many (if not most) places. This obviously is neither the intent nor the current practice of GGNRA.

This plan is filled with misstatements, inaccuracies and suppositions which have no basis in fact. The plan also omits numerous important issues. The quality of life in an urban environment is impacted greatly by peoples' ability to experience the outdoors and have outdoor recreation. For those of us whose recreation includes our dogs, many places are off limits and most others require leashes, so we feel strongly about the places which allow us and our dogs to enjoy nature at our own individual pace—in other words, allows them to run while we walk. As we have aged, GGNRA has become a larger and larger part of my and my wife's ability to enjoy the outdoors. I have several physical problems which I battle, and staying as active as possible is a vital part of maintaining my quality of life. Our dogs are a large part of our recreation.

We've been frequenting Rodeo Beach all the decades we've lived in Marin, and later the discovery of Crissy Field, Fort Funston and Ocean Beach gave us more opportunities to enjoy the beach. To have these taken away from us because our dogs cannot accompany us, or must walk at our slow pace, would be severely restraining. If this comes to be, my ability to stay active would be very negatively affected, as my outdoor life includes the dogs and I wouldn't be able to utilize GGNRA without their company. I need to BE active in order to STAY active and healthy.

I always thought GGNRA was intended as a place where people can engage in all different forms of recreation. Walking with our dogs deserves equal representation with other forms of recreation. Yet while other forms of recreation can be enjoyed in many, many places in the Bay Area, dog walking is limited to only a few areas, and off-leash dog walking is virtually nonexistent except for GGNRA.

I can see nothing but negative consequences for the proposed actions. We take responsibility for socializing our dogs and taking care of their waste, and we have never encountered any problems with our dogs. Dogs which aren't socialized can become aggressive and protective, which could only increase problems; untrained, leashed dogs can be more aggressive than dogs allowed to meet one another off leash. The Bay Area has a high population of dogs; dog parks provide socialization but little ability for real exercise.

I also don't understand, after reading the proposal, why there is no specific evidence presented regarding detrimental effects on wildlife and the environment by dogs. I haven't experienced this, nor have I witnessed any pet owners being irresponsible in allowing their dogs to chase wildlife or damage the environment. Our dogs have always been trained to not disturb wildlife and we have always kept them out of areas designated as protected. Given this, as well as the fact that no specific evidence is in the plan, only suppositions and speculation, I question the viability of the material. Marin and San Francisco have been fine with the policies already in effect; to change them would be deleterious in so many ways, I can't see why it is being proposed.

The plan has a number of items I question. For one, I know of no "degradation of soil and water resources" because of dogs. Humans "degrade" the soil more than dogs just by walking on it, and the areas that concern me, being beaches, get no water degradation. I can't imagine how any place would experience such things—the only single "degradation" I can think of would be dog waste, and all the dog owners I know are careful to pick up not only their own dogs' waste, but that of others as well. I have seen many places where dog waste is a problem; GGNRA is NOT one of them. Those of us who utilize it are more careful about this issue than the general population, by far.

The proposal claims that impacts to physical resources would be from negligible to ADVERSE because of dogs. That is a very open statement; to determine how to proceed, it would have to be more specific to be of any value. Rodeo Beach hasn't changed in all the years we have walked there, and I don't see how dogs have had any adverse effect on it, or how any "severe" effects could be envisioned. This needs more clarification as to exactly WHAT is meant by "adverse" impacts. Otherwise it sounds like someone who hasn't even been to these sites is merely imagining something. The same is true for Ocean Beach, Crissy Field and Fort Funston. PEOPLE walking somewhere erode the soil; dogs actually cause less erosion. Enforcement of dog-waste regulations would avoid any other form of degradation that I can imagine.

Impacts on health and safety is another unclear issue. How dogs could negatively impact health, as opposed to how they POSITIVELY impact health, both physical and mental, is nowhere taken into account. Considering the population involved, the issues of safety have been unquestionably minor, and nothing can completely prevent controversy, whether dogs are there or not. When it comes to safety, the places we go within GGNRA are far safer than the vast majority of urban areas; I would guess that is true of all GGNRA areas.

Dogs which are confined, don't get sufficient exercise or aren't socialized result in far less safety than those who receive proper exercise and training. People who regularly recreate with their dogs are the ones who bother to train and socialize their pets; as a result, we are promoting safety more than those who do not.

When it comes to native vegetation and the Snowy Plover, every dog owner I have ever encountered is careful to keep their dogs out of protected vegetation and the Plover territory. Certainly there are those who are irresponsible, but there are irresponsible people everywhere; they are in the minority, this I KNOW, because those of us in the dog community are quick to police them ourselves.

All in all, reading through the plan, it is entirely too generic; "negligible to adverse" covers a wide spectrum, and nothing I read, from what I have experienced personally, would lead to serious or adverse results if the 1979 policy were kept in place. I can't speak for many of the areas, but I would assume the same is true in most of the areas of GGNRA.

Impacts to the soil would be "long-term, major and adverse" at Fort Funston, according to the proposal, if things remain the same. If Fort Funston were to be made into a leash area, or even worse, a no-dog area, it would be frequented by very few people. It's cold, out of the way, and

Superintendent Dean

5/23/2011

Page 4

not very scenic. Few people go there who don't have dogs. As a result, the very concept of Fort Funston as a recreation area would be useless, which goes directly against the intent of GGNRA as created. To defeat GGNRA as a recreation area WOULD make it just like a national park: something to be kept pristine, unaffected by even humans. Were it somewhere else, this might be of value, but in the middle of an urban area like San Francisco, where it is desperately needed for recreation, is absurd.

It is stated that the Department of the Interior has responsibility for fostering "wise use of our land and water resources" AND "for the enjoyment of life through outdoor recreation". In national parks, certainly this means keeping the land free of any contamination...by humans or anything else. Not in an urban recreation area; there "wise" use of land and water resources must be BALANCED against the enjoyment of life through outdoor recreation. If we enjoy the land and water for recreation, there will be degradation, it's inevitable even if only humans use it. The balancing act is necessary. GGNRA is not a national park. It's important that it be preserved for everyone's use, every form of recreation, in such a hugely populated area where enjoyment of life through outdoor recreation is needed more than anywhere else.

Enjoying life through outdoor recreation with our dogs is every bit as important as any other form of recreation, moreso actually, as anywhere you go where dogs are allowed off leash, you will see more dog owners with their dogs than you will almost any other form of recreation being practiced. All other forms of recreation can be done almost anywhere; recreation with dogs off leash can only be done in a few selective places. Please give ALL of us the use of the GGNRA. Thank you for your consideration.

Sincerely,

Jim Cunnington

Date 5-15-11  
Subject: San Francisco, Housing Element

Dear Sirs

I urge you to reject the proposals to the housing element that will destroy the wonderful and unique qualities of our city. This unique environment has drawn many talented and hardworking people to the city.

The specific portions of the proposal that I find troubling are:

- 1) The proposal removes the current height restrictions and allows up to 8-story (80 ft) buildings along all major bus lines running throughout the city.
- 2) The proposal eliminates density limits from RH-1 and RH-2 neighborhoods, and reduces drastically the current open space and back yard space requirements. This could significantly impact current "view corridors"

This risky proposal does not have support of current homeowners in our area.

Sincerely

William R. Kales and Nancy Ely Kales

# Walking in San Francisco can be a fatal experience

By: [Will Reisman](#) 05/24/11 11:26 PM  
*Examiner Staff Writer*

< span="" > Risky walk: From 2000-09, 220 pedestrians were killed in traffic incidents in S.F. (Examiner file photo)  
Pedestrian deaths comprise more than half of all traffic fatalities in San Francisco, a rate more than four times the national average.

In most metropolitan areas, pedestrians account for just a small portion — 12 percent — of total traffic deaths. But walkers in San Francisco make up 51.9 percent of traffic fatalities, according to a study by Transportation For America, a national coalition of transit and planning groups.

Because it's a dense, accessible city, more people walk in San Francisco, which partially explains the high rate of pedestrian fatalities, said Executive Director Elizabeth Stampe of Walk SF.

She said another factor behind the high death rate is The City's ongoing efforts to transform local streets from highwaylike arteries into roads with slower-moving traffic. That makes it safer for drivers, but not safe enough for

32

walkers.

The Transportation For America report was released to highlight the lack of dedicated funding for pedestrian improvement projects in metropolitan areas. Although walkers account for 12 percent of all traffic deaths, only 1.5 percent of transportation funding is set aside for pedestrian safety projects, according to the report.

Stampe said finding funding is essential to improving pedestrian conditions in San Francisco. Mayor Ed Lee's proposed \$248 million bond measure to upgrade road conditions, which includes \$50 million for streetscape improvements, could significantly impact The City's walking environment, Stampe said.

While San Francisco had a disproportionately high rate of pedestrian traffic fatalities, the overall condition for walking in the metro area was fairly safe, according to the report. Using a formula that factored in how often people walk, the report found that the metro area — which includes Oakland and Fremont — ranked 41st among U.S. cities for pedestrian safety levels. By comparison, the Seattle area ranked 46th and New York was 50th.

Between 2000 and 2009, 220 San Francisco pedestrians were killed in a traffic accident.

[wreisman@sfxaminer.com](mailto:wreisman@sfxaminer.com)

## Eyes on the road

**51.9:** Percentage of traffic fatalities in San Francisco that are pedestrians

**12:** Percentage of traffic fatalities nationwide that are pedestrians

**2.86:** Average pedestrian fatality rate in San Francisco County, per 100,000 people

**3.5:** Average pedestrian fatality rate in Tampa Bay, Fla. (highest national average)

**\$280M:** Funding spent annually on pedestrian traffic fatalities, injuries
