General Plan 2040 Update
The Shape SSF 2040 General Plan is a forward-looking blueprint for the City's vision through the year 2040. The General Plan sets overall City policy and priorities for how to use and manage its physical, social and economic resources. Per state law, the general plan includes eight mandatory elements - land use, circulation, housing, conservation, environmental justice, open space, noise, and safety. The general plan also addresses the following additional topics – community design, mobility, parks, community health, resilience, community services, economic development and climate protection. The General Plan establishes a detailed range of policies related to housing, employment, public realm, connectivity, and more in the Downof policies related to housing, employment, public realm, connectivity, and more in the Downtown, East of 101, El Camino Real, and Lindenville sub-areas, which are the sub-areas anticipated to undergo the most change under the General Plan horizon. For the other residential sub-areas, little change is expected over the General Plan horizon and, thus, the General Plan establishes a framework to enhance existing assets and character.

Zoning Ordinance Update
The Zoning Ordinance is required to be consistent with the General Plan and provides the development and land use regulations to implement the General Plan. The Zoning Ordinance identifies permitted, conditionally permitted or prohibited uses, clarifies the types of buildings or structures and the desired character of the community (size, height, configuration and lot coverage). The Zoning Ordinance includes new citywide design standards for all residential development in compliance with State law and a form-based code approach in certain districts to regulate new development. The Zoning Ordinance also includes a new Floodplain/Sea Level Rise Overlay zone, updated parking standards, a new Community Benefits Program and an updated Transportation Demand Management chapter.

Climate Action Plan The Climate Action Plan (CAP) outlines how the City will create new policies, programs and services that will support the community in reducing greenhouse gas (GHG) emissions. The CAP provides programs to reduce emissions by 40% by year 2030 and 80% by the year 2040 with a long-term goal of carbon neutrality by 2045. The goals of the CAP are to equitably mitigate and address the impacts of climate change and realize the co-benefits of climate mitigation actions that help create a sustainable community. The CAP programs cover the areas of clean energy; energy efficient building construction; multimodal, sustainable, livable and connected transportation; water efficiency and a safe and resilient water supply; diversion of solid waste and organics from landfill; and increases carbon sequestration in public lands, open spaces and urban forest through marsh enhancement and tree planting.

Environmental Analysis
Pursuant to State law, a Program-level Environmental Impact Report (EIR) has been prepared in accordance with the California Environmental Quality Act (CEQA). The General Plan EIR provides a complete evaluation of the 2040 General Plan, Climate Action Plan and Zoning Code Amendments as the proposed "Project", and the cumulative impacts of the Project along with other existing and proposed uses and alternatives to the Project. The EIR provides a program-level analysis of the potential effects on the environment that could occur from implementation of the proposed project. The General Plan Update anticipates approximately 14,312 net new housing units and approximately 42,297 net new employment opportunities by 2040.
