

Even though COVID-19 case rates have come down significantly from their peak in the third surge and more people are vaccinated, there remains a risk that people who you may come into contact with when you are outside your residence may have COVID-19. Most COVID-19 infections are caused by people who have no symptoms of illness. There are people you may come into contact with in San Francisco who are not yet fully vaccinated. We have also seen surges in other parts of the country and the world, increasingly impacting younger adults.

The opening or expansion of sectors does not necessarily signify that these activities are “safe.” The purpose of the required safety protocols contained in San Francisco’s Stay-Safer-At-Home Order and companion health directives is to make these activities and sectors safer for workers and the public. But reopening and expansion requires that all individuals and businesses use particular care and do their part to make these activities as safe as possible by strictly and consistently wearing face coverings indoors and outdoors in large crowds and following social distancing requirements and all other safety protocols.

Everyone who is eligible, including people at risk for severe illness with COVID-19 – such as unvaccinated older adults and unvaccinated individuals with health risks – and members of their households are urged to get vaccinated as soon as they can if they have not already done so.

**DIRECTIVE OF THE HEALTH OFFICER No. 2021-01e**

**DIRECTIVE OF THE HEALTH OFFICER OF  
THE CITY AND COUNTY OF SAN FRANCISCO REGARDING REQUIRED BEST  
PRACTICES FOR YOUTH AND ADULT RECREATIONAL SPORTS**

**(PUBLIC HEALTH DIRECTIVE)**  
DATE OF DIRECTIVE: May 20, 2021

**By this Directive, the Health Officer of the City and County of San Francisco (the “Health Officer”) issues specific direction that Participants and Hosts in recreational sports gatherings, as described below, must follow as part of the local response to the Coronavirus Disease 2019 (“COVID-19”) pandemic. This Directive constitutes guidance as provided under Sections 4 and 11 and Appendix C-2 of Health Officer Order No. C19-07x issued on May 20, 2021 (the “Stay-Safer-At-Home Order”) and, unless otherwise defined below, initially capitalized terms used in this Directive have the same meaning given them in that order. This Directive goes into effect immediately, and remains in effect until suspended, superseded, or amended by the Health Officer. This Directive has support in the bases and justifications set forth in the Stay-Safer-At-Home Order. As further provided below, this Directive automatically incorporates any revisions to the Stay-Safer-At-Home Order or other future orders issued by the Health Officer that supersede that order or reference this Directive. This Directive is intended to promote best practices as to Social Distancing Requirements and sanitation measures, helping prevent the transmission of COVID-19 and safeguard the health of workers, customers, and the community.**

**UNDER THE AUTHORITY OF CALIFORNIA HEALTH AND SAFETY CODE  
SECTIONS 101040, 101085, AND 120175, THE HEALTH OFFICER DIRECTS AS  
FOLLOWS:**

- 1. This Directive applies to all individuals who participate (“Participants”) and individuals who organize and host (“Hosts”) recreational organized youth sports,**

**Health Officer Directive No. 2021-01e**

dance and exercise—including school- and community-sponsored programs, and private clubs and leagues—and recreational organized adult group sports, dance, and exercise activities (collectively, “youth and adult sports”) in the City and County of San Francisco (the “City”) as allowed under the Stay-Safer-At-Home Order (“Order”).

2. Attached as **Exhibit A** to this Directive is a list of best practices that apply to Participants and Hosts engaged in youth and adult sports (the “Best Practices”). All Participants and Hosts must comply with all applicable requirements listed in the Best Practices.
3. Before hosting or otherwise facilitating youth or adult sports activities, Hosts must create, adopt, and implement a written health and safety plan (a “Health and Safety Plan”). The Health and Safety Plan must be substantially in the form attached to this Directive as **Exhibit B**.
4. Organized youth sports must occur as part of a supervised school program, childcare program, or out of school time program as defined in section 5(d) of the Order.
5. If an aspect, service, or operation of the youth or adult sport activity is also covered by another Health Officer directive (all of which are available at <http://www.sfdph.org/directives>), Hosts and Participants must comply with all applicable directives, and the Host must complete all relevant Health and Safety Plan forms.
6. Hosts must (a) make the Health and Safety Plan available to anyone interested in participating in the youth and adult sports program and to any involved Personnel on request, (b) provide a summary of the plan to all Personnel working on site or otherwise in the City in relation to its operations, and (c) post the plan at the entrance to any other physical location that such Host operates within the City. Also, each such Host must provide a copy of the Health and Safety Plan and evidence of its implementation to any City authority enforcing this Order upon demand.
7. Each Host subject to this Directive must provide items such as Face Coverings (as provided in Health Officer Order No. C19-12 and any future amendment to that order), hand sanitizer or handwashing stations, or both, and disinfectant and related supplies to any of that Host’s Personnel and to Participants, all as required by the Best Practices. If any Host is unable to provide these required items to Personnel or Participants or otherwise fails to comply with required Best Practices or fails to abide by its Health and Safety Plan, then it must cease operating until it can fully comply and demonstrate its strict compliance. Further, any youth or adult sport activity organized by such Host where the Host has failed to comply is subject to immediate closure and the fines and other legal remedies described below, as a violation of the Stay-Safer-At-Home Order.
8. For purposes of this Directive, “Personnel” includes all of the following people who provide goods or services associated with the Host in the City: employees; contractors and sub-contractors (such as those who sell goods or perform services onsite or who deliver goods for the business); vendors who are permitted to sell

**Health Officer Directive No. 2021-01e**

goods onsite; volunteers; and other individuals who regularly provide services onsite at the request of the Host such as coaches, including volunteer coaches and assistant coaches. “Personnel” includes “gig workers” who perform work via the business’s app or other online interface, if any.

9. This Directive and the attached Best Practices may be revised by the Health Officer, through revision of this Directive or another future directive or order, as conditions relating to COVID-19 require, in the discretion of the Health Officer. All Participants and Hosts must stay updated regarding any changes to the Stay-Safer-At-Home Order and this Directive by checking the Department of Public Health website ([www.sfdph.org/healthorders](http://www.sfdph.org/healthorders); [www.sfdph.org/directives](http://www.sfdph.org/directives)) regularly.
10. Implementation of this Directive augments—but does not limit—the obligations of each Host under the Stay-Safer-At-Home Order including, but not limited to, the obligation to prepare, post, and implement a Social Distancing Protocol under Section 4.d and Appendix A of the Stay-Safer-At-Home Order. The Host must follow these Best Practices and update them as necessary for the duration of this Directive, including, without limitation, as this Directive is amended or extended in writing by the Health Officer and consistent with any extension of the Stay-Safer-At-Home Order, any other order that supersedes that order, and any Health Officer order that references this Directive

**This Directive is issued in furtherance of the purposes of the Stay-Safer-At-Home Order. Where a conflict exists between this Directive and any state, local, or federal public health order related to the COVID-19 pandemic, including, without limitation, the Social Distancing Protocol, the most restrictive provision controls. Failure to carry out this Directive is a violation of the Stay-Safer-At-Home Order, constitutes an imminent threat and menace to public health, constitutes a public nuisance, and is a misdemeanor punishable by fine, imprisonment, or both.**

A handwritten signature in black ink, appearing to read "Susan Philip".

---

Susan Philip, MD, MPH,  
Health Officer of the  
City and County of San Francisco

Date: May 20, 2021

Exhibit A to Health Officer Directive No. 2021-01e (issued 5/20/21)

**Best Practices for Participants and Hosts Involved in Outdoor Gatherings**

**In addition to preparing, posting, and implementing the Social Distancing Protocol (Appendix A of Health Officer Order No. C19-07), each Host that operates in the City must comply with each requirement listed below and prepare a Health and Safety Plan substantially in the format of Exhibit B, below. Participants and Hosts must also comply with each of the applicable requirements listed below.**

**1. Section 1 – General Requirements For all Youth and Adult Sports Activities.**

**1.1.** All people are strongly encouraged to minimize unnecessary interactions, and consistently follow all prevention guidelines including wearing Face Coverings with people outside one's household. Sports, dance, and exercise are higher risk for COVID-19 transmission, and have been linked to numerous outbreaks. Youth sports have been a significant source of COVID-19 spread among youth. These activities are higher risk for COVID-19 because people breathe much more air when exercising, and have close contact in many sports. During exercise, a person with COVID-19 breathes many more infectious droplets into the air. The infectious droplets in their breath travel further because they are breathing harder. People are also more likely to be infected during exercise because they are breathing more air. And the risks are generally much higher indoors than outdoors for these activities. If people intend to participate in a youth or adult sports activity, including parents or guardians of minors who wish to participate, they should consider the health risks relating to COVID-19 to themselves and others before doing so and should take all possible steps to mitigate those risks.

**1.1.1.** Those at higher risk for severe illness and death from COVID-19—such as unvaccinated older adults, and unvaccinated individuals with health risks—and members of their Household are encouraged to carefully consider the health risks relating to COVID-19 before deciding whether to participate in Sports Program. For more information on who is at higher risk for severe illness and death from COVID-19, see <http://www.sfc-dcp.org/vulnerable>.

**1.1.2.** Hosts must develop and implement a process for screening Personnel for COVID-19 symptoms. SFDPH recommends that Hosts ask Personnel to evaluate their own symptoms before reporting to work. For additional resources, including optional sample screening forms, see [www.sfc-dcp.org/screen](http://www.sfc-dcp.org/screen).

**1.1.3.** Hosts must develop and implement a process for screening Participants for COVID-19 symptoms on the day of the sports activity. SFDPH recommends that Hosts ask Participants to evaluate their own symptoms before leaving home. For additional resources, including optional sample screening forms, see [www.sfc-dcp.org/screen](http://www.sfc-dcp.org/screen) (adults) and <https://www.sfdph.org/dph/files/ig/Parent-Guardian-Health-Check-Handout.pdf> (youth).

**1.2.** The following **indoor** organized sports are allowed at this time, subject to compliance with all applicable requirements set forth in the Order, the State's guidance on Outdoor and Indoor Youth and Recreational Adult Sports (referenced below) and this directive.

**1.2.1.** Physical conditioning, practice, skill-building, and training with physical distancing;

- 1.2.2.* Indoor low-contact sports—i.e., sports that allow participants to easily maintain physical distancing of at least six feet;
- 1.2.3.* Indoor moderate-contact sports—i.e., sports that can be played with only incidental or intermittent close contact between participants; and
- 1.2.4.* Indoor high-contact sports—i.e., sports that involve frequent or sustained close contact (and in many cases, face-to-face contact) between participants and high probability that respiratory particles will be transmitted between participants.

For an illustrative list of low-contact, moderate-contact, and high-contact sports, see CDPH’s guidance on Outdoor and Indoor Youth and Recreational Adult Sports, available at <https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/outdoor-indoor-recreational-sports.aspx> (“CDPH Youth and Adult Sports Guidance”).

- 1.3.* The following **outdoor** organized sports are allowed at this time, subject to compliance with all applicable requirements set forth in the Order, the State’s guidance on Outdoor and Indoor Youth and Recreational Adult Sports (referenced below) and this directive:
  - 1.3.1.* Physical conditioning, practice, skill-building, and training with at least six feet of physical distancing;
  - 1.3.2.* Outdoor, low-contact sports—i.e., sports that allow participants to easily maintain physical distancing of at least six feet;
  - 1.3.3.* Outdoor moderate-contact sports—i.e., sports that can be played with only incidental or intermittent close contact between participants; and
  - 1.3.4.* Outdoor high-contact sports—i.e., sports that involve frequent or sustained close contact (and in many cases, face-to-face contact) between participants and high probability that respiratory particles will be transmitted between participants.

For an illustrative list of low-contact, moderate-contact, and high-contact sports, see CDPH’s guidance on Outdoor and Indoor Youth and Recreational Adult Sports, available at <https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/outdoor-indoor-recreational-sports.aspx> (“CDPH Youth and Adult Sports Guidance”).

- 1.4.* Hosts may not coordinate, arrange, or engage in travel outside of San Francisco so that its Participants or members can participate in athletic activity that is not allowed in San Francisco—e.g., playing a sport not currently allowed in San Francisco, or practicing or competing outside San Francisco without Face Coverings for a sport that is allowed in San Francisco with Face Coverings. (San Francisco sports programs should encourage teams they play in other adjoining counties to follow the same safety protocols.)

**1.5. Face Covering Requirement.**

<b>Face Covering Required?</b>		
	<b>Indoor</b>	<b>Outdoor</b>
<b>Physical conditioning with 6 foot distancing</b>	Yes	No
<b>Low-contact sports where distancing can be easily maintained</b>	Yes (except swimming/diving)	No
<b>Moderate-contact sports</b>	Yes	Yes, as tolerated
<b>High-contact sports</b>	Yes (except water-based sports and other sports where masks create imminent risk to health (e.g., wrestling, judo); testing required.)	Yes, as tolerated and safe

**1.5.1.** Except as expressly provided below, Face Coverings—as defined in Health Officer Order C19-12—must be worn by Participants, Hosts, coaches, support staff, other Personnel, and observers/spectators at all times. The fit and quality of the mask are very important. Face coverings such as bandanas, balaclavas, ski masks, and scarves are not recommended because they do not offer the proper fit or quality that is needed to protect against COVID-19 transmission.

**1.5.1.1.** Participants in indoor and outdoor low-contact water-based sports—such as swimming, diving, and synchronized swimming—should not wear a Face Covering while in the water, but must wear a Face Covering at all times when out of the pool.

**1.5.1.2.** Participants in outdoor physical conditioning and low-contact sports are not required to wear a Face Covering while actively engaged in practice or competitions when physical distancing can be maintained.

**1.5.1.3.** Participants in outdoor moderate-contact and high-contact sports are required to wear a Face Covering during practice, conditioning and during competition, even during heavy exertion, as tolerated. Face Coverings are not required if all Participants and Personnel provide the Host of the Sports Program with proof of full vaccination for COVID-19. People are considered fully vaccinated two weeks after receiving the second dose of the Pfizer or Moderna vaccines, or two weeks after the single dose of the Johnson & Johnson vaccine.

- 1.5.1.4.** Participants in water-based high-contact sports or other high-contact sports where wearing a Face Covering poses an imminent risk to health (e.g., such as suffocation) should not wear a Face Covering while actively engaged in practice or competitions. For example, Participants in water-polo, wrestling, boxing, and Judo can remove masks as necessary to practice or compete, but should wear a mask at all other times. For clarity, basketball, ice-hockey, ice-skating, roller derby, and indoor soccer/futsal are not activities during which wearing a mask poses an imminent risk to health.

Individuals who participate in indoor sports where Face Coverings are removed must be tested for COVID-19 before beginning to participate in the program, and weekly with rapid Antigen-based (preferred) or PCR tests throughout the duration of the program. Individuals who have been fully vaccinated for COVID-19 for at least 2 weeks are exempt from the testing requirement. Individuals who had lab-confirmed COVID-19 are exempt from testing for 3 months after their COVID-19 infection began. Results must be available within 48 hours of competition with another program. Any individual with a positive antigen result should be immediately isolate and undergo confirmatory testing with a PCR test. All unvaccinated Personnel and Participants who had close contact with the individual (within 6 feet for 15 minutes or more) should immediately quarantine while awaiting the result of the confirmatory test. Individuals who have been fully vaccinated for COVID-19 at least two weeks prior to the exposure and those who had lab-confirmed COVID-19 within the last 3 months do not need to quarantine, as long as they do not develop symptoms of COVID-19. Follow the instructions <https://www.sfdph.org/dph/alerts/covid-guidance/Guidance-Isolation-and-Quarantine.pdf>

- 1.5.2.** If a Face Covering becomes difficult to breathe through due to wetness, the athlete should change to a clean, dry mask at least six feet away from others.
- 1.6.** Hosts must track attendance, including names and contact information of all Participants to facilitate contact tracing, if necessary. Hosts must keep this information on file for at least three weeks.
- 1.7. Limitations on Mixing By Participants.**
- 1.7.1.** Except as expressly provided in section 2, below, Participants from different Sports Programs are not allowed to play against or with each other.
- 1.7.2.**
- 1.7.3.** During water breaks and snacks, Participants must maintain at least six feet of physical distance.
- 1.7.4.** Avoid carpooling and shared buses/vans when possible, and if not possible to avoid, then wear Face Coverings at all times and keep windows open to the extent feasible.
- 1.7.5.** Transmission often occurs *off-the-field*, especially when groups let their guard down and socialize or eat together. Mixing with other Households before or after

any practice or competition must strictly adhere to current health orders and directives regarding gatherings.

- 1.7.6.* Participants, particularly those who are unvaccinated, are encouraged—but not required—to limit their participation to one sports program in any three-week period.
- 1.7.7.* Individuals who provide proof of full vaccination may volunteer to assist in a Sports Program.

***1.8.*** Hygiene and Equipment Sanitation.

- 1.8.1.* No sharing of drink bottles and other personal items and equipment, except solely as provided in sections 1.8.1.2 and 1.8.1.3 below.
- 1.8.2.* When equipment is shared during an activity, Participants must perform hand hygiene (wash hands with soap and water or use an alcohol-based hand sanitizer) before and after using shared equipment.
- 1.8.3.* Balls or other objects or equipment can be touched by multiple players during practice and play if the above hand hygiene practices are followed. Clean shared equipment regularly.

***1.9.*** Locker Rooms and Showers. Locker rooms may reopen subject to the health and safety conditions set forth in Health Officer Directive No. 2020-27 (section 1.1.2).

- 1.9.1.* Locker rooms are high risk for transmission of COVID-19. Participants and staff must use locker rooms only to change or use restroom facilities, and must observe occupancy limits. Participants must not remain inside longer than necessary and must not congregate in or near locker rooms. Hosts must take all reasonable precautions to prevent Participants from congregating indoors. Locker rooms should not be used for coaching or for pregame, halftime, or post-game talks.
- 1.9.2.* Participants should arrive dressed to play to the greatest extent possible.
- 1.9.3.* Different teams or groups may not use a locker room at the same time.

***1.10.*** Independent Exercise in Gyms and Fitness Centers. Adults and youth may exercise individually indoors in gyms and fitness centers in compliance with the requirements in Health Officer Directive 2020-31, including Face Covering and physical distancing requirements.

***1.11.*** Spectators.

- 1.11.1.* Spectators are allowed consistent with (a) the rules for outdoor or indoor seated live events and performances (with assigned seats) or (b) the rules for outdoor or indoor gatherings set forth in Appendix C-2 to the Order and [Health Officer Directive No. 2020-19](#). For youth sports, immediate household members are also allowed to be present for the strict purpose of age appropriate supervision.
- 1.11.2.* Observers must maintain at least six feet of physical distance and comply with all other Social Distancing Requirements at all times.

**2. Section 2 – Additional Requirements for Competitions and Tournaments.**

- 2.1. Teams must not participate in any out-of-state games and tournaments; several multistate outbreaks have been reported around the nation, including California residents.
- 2.2. Teams may compete with other teams in California. Teams are not allowed to compete with teams from other states at this time.
- 2.3. Except as expressly provided in this subsection, a team may compete with only one other team per day. No tournaments or events that involve more than two teams are allowed, except for:
  - outdoor low-contact sports where individual competitors from multiple teams are routine such as: track and field, cross-country, golf, skiing/snowboarding, tennis, swimming/diving/surfing, biking and equestrian events; and
  - tournaments in which all teams are following the requirements imposed on collegiate sports by the State of California in its Institutions of Higher Education Guidance, dated September 30, 2020, as summarized in the CDPH Youth and Adult Sports Guidance (<https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/outdoor-indoor-recreational-sports.aspx>).
- 2.4. Hosts must keep detailed rosters of all players and staff involved in competition, including information needed to notify people of COVID-19 exposure if a competitor or coach tests positive for COVID-19 (e.g. starting heat and wave times for races, tennis doubles partners, golfers sharing same the tee time).
- 2.5. If more than one match will be held at the same location in a day, it is recommended that matches be scheduled far enough apart—in space or time—that teams that are not competing will not interact with each other, for example, when leaving and arriving at the location.

**3. Section 3 – Additional Requirements for Youth Sports Programs.**

- 3.1. Participants are encouraged not to move from one Sports Program to another more often than once every three weeks.
- 3.2. Due to the nature and risk of transmission while participating in outdoor high-contact and moderate-contact sports, Hosts of high-contact and moderate-contact Sports Programs or activities must require the parent/guardian of each child (i.e., any Participant under the age of 18) who participates in the program to sign an acknowledgement of health risks containing the following language:

The collective effort and sacrifice of San Francisco residents staying at home limited the spread of COVID-19. But community transmission of COVID-19 within San Francisco continues, including transmission by individuals who are infected and contagious, but have no symptoms. Infected persons are contagious 48 hours before developing symptoms (“pre-symptomatic”), and many are contagious without ever developing symptoms (“asymptomatic”). Pre-symptomatic and asymptomatic people are likely unaware that they have COVID-19.

Sports, dance, and cardio/aerobic exercise are higher risk for COVID-19 transmission, and have been linked to numerous outbreaks. In other parts of the

U.S., youth sports have been a significant source of COVID-19 spread among youth. The risks are generally much higher indoors than outdoors for these activities. But these activities are higher risk for COVID-19 in any environment because people breathe much more air when exercising, and have close contact in many sports. During exercise, a person with COVID-19 breathes many more infectious droplets into the air. The infectious droplets in their breath travel further because they are breathing harder. People are also more likely to be infected during exercise because they are breathing more air.

The availability of organized youth sports activities hosted by a school program, childcare program, or out of school time program, is an important step in the resumption of activities. But the decision by the Health Officer to allow organized youth sports activities that follow required safety rules, does not mean that attending and participating in organized youth sports activities is free of risk. Enrolling a child in organized youth sports could increase the risk of the child becoming infected with COVID-19. Moderate-contact and high-contact sports, which can require frequent, close contact between participants, increase the risk of COVID-19 transmission. While the majority of children that become infected do well, there is still much more to learn about coronavirus in children, including about the risks of Multisystem Inflammatory Syndrome in Children (MIS-C) and COVID-19 associated myocarditis, which can result in sudden death during exercise.

Each parent or guardian must determine for themselves if they are willing to take the risk of enrolling their child in organized youth sports, including whether they need to take additional precautions to protect the health of their child and others in the household. They should carefully review the SFDPH COVID-19 youth safety guidance at <http://www.sfdcp.org/CovidSchoolsChildcare>. They should particularly consider the risks to household members who have a higher risk of severe COVID-19 illness, including older adults and other people with chronic conditions or compromised immune systems. Parents and guardians may want to discuss these risks and their concerns with their pediatrician or other health care provider.

More information about COVID-19 and MIS-C, is available on the Centers for Disease Control and Prevention website at <https://www.cdc.gov/coronavirus/2019-ncov/>. See [sfdcp.org/covid19hcp](http://www.sfdcp.org/covid19hcp) for a list of groups at higher risk for severe COVID-19

I understand the risks associated with enrolling my child in organized youth sports, and agree to assume the risks to my child and my household. I also agree to follow all safety requirements that the Host of the organized youth sports activity imposes as a condition of enrolling my child.

- 3.3. Youth athletes who test positive for COVID-19 must be must be evaluated by a health care provider for possible cardiac symptoms and cleared in writing by a health care provider before returning to exercise as recommended by the American Academy of Pediatrics. See <https://services.aap.org/en/pages/2019-novel-coronavirus-covid-19-infections/clinical-guidance/covid-19-interim-guidance-return-to-sports/>.

**4. Section 4 – Additional Requirements for Indoor Sports Programs.**

- 4.1. Indoor sports facilities may not exceed 50% capacity, up to 200 people total, including all Participants, coaches, other Personnel, and observers. This capacity limitation applies to the facility overall and to any individual rooms within the facility.
- 4.2. One-on-one sports training (with one coach or trainer and one Participant) is allowed in indoor sports facilities as long as coach/Participant pairs maintain at least 12 feet of physical distance from other coach/participant pairs at all times and the total number of individuals—including all Participants, coaches, other Personnel, and observers—remains below the 50% capacity limit.
- 4.3. Indoor sports facilities must comply with the ventilation protocols at Section 4.i of the Stay-Safer-At-Home Order. Review SFDPH’s guidance for improved ventilation available at: <https://www.sfcddcp.org/COVID-ventilation>. Facilities are strongly urged to implement at least one of the following ventilation strategies: (1) all available windows and doors accessible to fresh outdoor air are kept open; (2) fully operational HVAC system; or (3) appropriately sized Portable Air Cleaners.
- 4.4. Indoor sports facilities must post all COVID-19 related signage as required by Sections 4.g and 4.h of the Stay-Safer-At-Home Order. The County is making available templates for the signage available online at <https://sf.gov/outreach-toolkit-coronavirus-covid-19>.
- 4.5. All Personnel and Participants must wash or sanitize their hands upon entering the indoor facility.
- 4.6. Indoor sports facilities must provide a hand washing station, hand sanitizer, or sanitizing wipes for Personnel and Participants.
- 4.7. Personnel must regularly clean high touch areas following CDC guidelines available at <https://www.cdc.gov/coronavirus/2019-ncov/community/disinfecting-building-facility.html>.

### Health Officer Directive No. 2021-01e (Exhibit B) Health and Safety Plan (issued 5/20/21)

Each Host must complete, post onsite, and follow this Health and Safety Plan.

Check off all items below that apply and list other required information.

*Business/Entity name:*

*Contact name:*

*Entity Address:*

*Contact telephone:*

*(You may contact the person listed above with any questions or comments about this plan.)*

- Business is familiar with and complies with all requirements set forth in Health Officer Directive No. 2021-01, available at <http://www.sfdph.org/directives>.
- Sports activity is allowed in under the current health orders and directives.
- (Youth teams) Designate a COVID-19 staff liaison. Liaison name:\_\_\_\_\_
- Personnel and Participants are instructed to stay home when ill. Parents of youth participants are instructed to keep children at home when ill.
- Non-essential volunteers who have not been fully vaccinated for COVID-19 are limited.
- No coordinating, arranging, or engaging in travel outside of San Francisco to participate in athletic activity that is not allowed in San Francisco.
- Face coverings are worn by everyone at all times, unless specific exceptions apply.
  
- Mixing with other Households before or after any practice or competition strictly adheres to current health orders and directives regarding gatherings.
- Locker rooms comply with health and safety requirements.
- Spectators comply with rules for outdoor/indoor gatherings or outdoor/indoor seated live events and performances.
- If competitions are involved: no out-of-state games or tournaments; only one event per day (or all teams comply with rigorous requirements for collegiate sports).
- For youth sports, parent/guardian has signed informed consent document.
- Youth participants who test positive for COVID-19 must receive medical clearance to return to play/resume exercise.
- For indoor facilities:
  - Capacity is limited to 50% or 200 people, whichever is less;
  - Ventilation signage is posted and at least one ventilation strategy is implemented in locker rooms (if used);
  - Other required signage is posted;
