EXECUTIVE SUMMARY

All response agencies' staffing and available shelter referral options continue to be impacted due to COVID-19 or capacity limits during Operational Period (OP) 9. Efforts for OP 9 focused on refining and implementing plans for coordinating daily interventions at priority locations, refining strategic field outreach operations to increase uptake in engagement, and developing streamlined and efficient ways to collect and report on metrics and data to show the progress of Tenderloin Emergency Initiative operations and the impact on the neighborhood.

Key Activities/Highlights:

- Tenderloin Emergency Initiative leadership held two workshops with City stakeholders to review the seven previously established priority problems and potential solutions for the Tenderloin neighborhood and the corresponding output metrics tracked by City and non-City agencies. These workshops resulted in eight new draft goal areas and corresponding outcome measures in addition to output metrics. These new goal areas and outcome measures will allow the City to better track the progress of the Tenderloin Emergency Initiative and its impact on the neighborhood.

- The Field Outreach Team revised their cadence for engaging individuals in the Tenderloin neighborhood in coordination with Joint Field Operations in an effort to increase advance encounters with people to connect them with services and to direct people to the Linkage Center.

- A non-congregate shelter was brought online this OP that added capacity for up to 116 placements for unsheltered residents of the Tenderloin neighborhood and the Linkage Center.

OPERATIONAL PROGRESS REPORTS

Weekly progress reports include the accomplishments according to the OP’s objectives and new operational information related to the Tenderloin Emergency Initiative response efforts.

A joint group of City and community stakeholders established the following priority problems as the top issues to address in the Tenderloin. To ensure that operations are directly addressing the top problems, all objectives must link back to at least one of the priority areas:

1. Drug dealing and violent crime
2. Open-air drug use
3. Lack of shelter and drop-in resources
4. Lack of safe passage and accessibility
5. Waste and debris
6. High levels of 911 medical calls
7. Illegal vending

Note: These priority problems will be revised and adjusted to reflect the main goals of the Tenderloin Emergency Initiative starting no later than OP 12. This will help track not just output of City and non-City staff, but also the outcomes of those efforts as measured by impact in the neighborhood.
