Ordinance approving an amendment to the 2016 settlement of United States Environmental Protection Agency’s (“EPA”) unlitigated claim against the City and County of San Francisco approved by Resolution No. 350-16; no formal claim has been filed; the amendment resolves EPA’s claims against the City to perform additional pre-design technical studies in support of cleanup of the Yosemite Slough Sediment Site; the amendment requires the City to perform two technical studies at an estimated cost of $821,839; additional material terms of the amended settlement are that the City will contract with a third party environmental consultant to perform the studies, the City will assume responsibility for completion of the work pursuant to the amendment, the City will assume responsibility and indemnify EPA for any stipulated penalties or claims arising in connection with performance of the additional work under the amendment, and the City will reimburse EPA for its future response costs related to the additional work; and appropriating $821,839 from the Public Utilities Commission Wastewater Enterprise fund balance for payment of the costs.

Be it ordained by the People of the City and County of San Francisco:

Section 1. Background.

On December 15, 2008, the United States Environmental Protection Agency (“EPA”) served notice on the City and County of San Francisco (“City”) identifying the San Francisco Public Utilities Commission (“SFPUC”), along with other public and private entities, as a potentially responsible party (“PRP”) under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, 42 U.S.C. §9601 et seq. (“CERCLA”), for the...
cleanup of contaminated sediment at Yosemite Slough, a tidal channel flowing to the South Basin of the San Francisco Bay between Hunters Point and Candlestick Point (the “Site”).

On January 27, 2015, EPA issued a demand, pursuant to 42 U.S.C. §9622(e) (the “Special Notice Letter”), that the City and other PRPs complete sixteen pre-design technical studies in support of EPA’s chosen cleanup plan for the Site. In 2016 the City and PRPs California Department of Parks and Recreation (“State Parks”), California State Lands Commission (“State Lands”), and United States Defense Logistics Agency (“DLA”) entered into a settlement with EPA, approved by the Board of Supervisors by Resolution No. 350-16, to perform four of the studies providing that (1) the four government entities would equally share the cost of the work up to a total of $350,000 and all EPA future costs incurred in implementing, overseeing or enforcing the settlement (“EPA Response Costs”) and (2) the City would be responsible for performing the work through a third party contractor and for any stipulated penalties or third party claims arising in connection with performance of the work under the settlement (the “EPA Interim Settlement”).

The EPA Interim Settlement did not resolve EPA’s claims against the City under the Superfund Law for performance of additional pre-design technical studies or the ultimate cleanup of the Site. EPA made a demand for the PRPs to perform two additional technical studies and the City agreed to perform the studies pursuant to an amendment to the EPA Interim Settlement (“Amendment”). The Amendment provides that the City will assume sole responsibility for performing the additional work at a cost of $821,839 through a third party contractor, and will be solely responsible for EPA Response Costs associated with the additional work and any stipulated penalties or third party claims arising in connection with the work under the Amendment. The Amendment does not resolve EPA’s claims against the City under the Superfund Law for the ultimate cleanup of the Site. Copies of the EPA Interim
Settlement and the Amendment are on file with the Clerk of the Board of Supervisors in File No. 191208.

Section 2. Approval of Agreement. Pursuant to Administrative Code, Section 10.22, the Board of Supervisors hereby authorizes the City Attorney to further settle and compromise EPA's Special Notice Letter as described herein. Additionally, the Board of Supervisors hereby authorizes SFPUC's General Manager to enter into any amendments or modifications to the Settlement Agreement that the General Manager determines in consultation with the City Attorney: are in the best interest of the City; do not materially increase the obligations or liabilities of the City; are necessary or advisable to effectuate the purposes and intent of the Settlement Agreement or this resolution; and are in compliance with all applicable laws.

Section 3. Appropriation of Funds. The source of funding herein appropriated for use by the SFPUC for purposes of expending costs under the Agreement is the SFPUC Wastewater Enterprise fund balance.
APPROVED:

DENNIS J. HERRERA
City Attorney

ELAINE M. O’NEIL
Deputy City Attorney
Construction and Public Contracting
Team Leader
