[Planning Code - Automotive Uses; Housing Density]

Ordinance amending the Planning Code to increase density on lots with auto-oriented uses where housing is permitted, except for Residential-Mixed (RM) and Residential-Commercial (RC) districts and designated historic districts, but which do not currently have any residential use or a legacy business, and to remove the Conditional Use requirement to change the use of an Automobile Service Station or Automotive Use to another use, and amend zoning control tables to reflect this change; affirming the Planning Department's determination under the California Environmental Quality Act; making findings of consistency with the General Plan and the eight priority policies of Planning Code, Section 101.1; and making findings of public necessity, convenience, and welfare as required by Planning Code, Section 302.

NOTE: Unchanged Code text and uncodified text are in plain Arial font.
Additions to Codes are in single-underline italics Times New Roman font.
Deletions to Codes are in strikethrough italics Times New Roman font.
Board amendment additions are in double-underlined Arial font.
Board amendment deletions are in strikethrough Arial font.
Asterisks (* * * *) indicate the omission of unchanged Code subsections or parts of tables.

Be it ordained by the People of the City and County of San Francisco:

Section 1. Environmental and Land Use Findings.

(a) The Planning Department has determined that the actions contemplated in this ordinance comply with the California Environmental Quality Act (California Public Resources Code Sections 21000 et seq.). Said determination is on file with the Clerk of the Board of

Supervisors in File No. 211092 and is incorporated herein by reference. The Board affirms this determination.

- (b) On December 9, 2021, the Planning Commission, in Resolution No. 21045, adopted findings that the actions contemplated in this ordinance are consistent, on balance, with the City's General Plan and eight priority policies of Planning Code Section 101.1. The Board adopts these findings as its own. A copy of said Resolution is on file with the Clerk of the Board of Supervisors in File No. 211092, and is incorporated herein by reference.
- (c) On December 9, 2021, the Planning Commission, in Resolution No. 21045, recommended this ordinance for adoption by the Board of Supervisors, and adopted findings that it will serve the public necessity, convenience, and welfare, as provided in Planning Code Section 302. The Board adopts these findings as its own. A copy of said Resolution is on file with the Clerk of the Board of Supervisors in File No. 211092, and is incorporated herein by reference.

Section 2. General Background and Findings.

This ordinance shall be known as "Cars to Casas," "Automotive Uses to Housing Uses," and is based on the following findings:

- (a) For the past several years, San Francisco has consistently ranked as the most, or one of the most, expensive housing markets in the country. There are several factors that contribute to these high costs, but two of the main drivers are an increased demand for housing caused by job growth, and a limited supply of housing caused by a lack of new housing construction.
- (b) Job growth in San Francisco from 2010 to 2019 far exceeded housing produced. The number of workers increased by 225,000 while housing increased by 28,000 units; more than eight workers added for every housing unit added.

- (c) Compounding the City's existing lack of housing supply, San Francisco's Regional Housing Needs Assessment (RHNA) for 2023-2031 is 82,069 units, including 46,598 units at very low, low, and moderate income levels. The 2023-2031 RHNA is nearly triple the previous (2015-2023) RHNA. The annual targets for each income group has increased to amounts higher than what has been approved or permitted in the past, including for above moderate-income levels. In the past, San Francisco has struggled to meet existing RHNA targets for low- and moderate-income households.
- (d) 41% of the land area that is zoned for housing in San Francisco does not allow more than one unit per lot. Further, an additional 29% of the land zoned for housing in San Francisco is limited to two- and three-unit buildings. San Francisco went through a massive downzoning in the mid-1970s when it created the RH zoning districts. As a result, 70% of land zoned to permit housing in San Francisco does not permit apartment buildings with four or more units. This downzoning makes it difficult for San Francisco to build what is often referred to as "Missing Middle Housing."
- (e) Missing Middle Housing offers a greater choice in housing types that still blend into existing single-family neighborhoods, create more affordable housing options, and help reach sustainability goals. Missing middle housing units are usually smaller units than single-family homes because they share a lot with other homes, which results in lower per-unit land costs. Missing middle housing types are also one of the least expensive forms of housing to produce because they are typically low-rise and wood-frame construction, which avoids expensive concrete podiums. Because the construction and building materials are comparatively less complicated than larger mid- and high-rise structures, a larger pool of small-scale and local home builders can participate in the creation of this form of housing.

- (f) Since the early 2000s, San Francisco has been moving away from numerical caps on units per lot and toward a form-based density; however, a significant area of the City still relies on numerical unit caps.
- (g) Nearly all new housing, both affordable and market rate, is added in areas with form-based density controls, including the City's commercial areas like Downtown, former redevelopment areas, and form-based density districts like Neighborhood Commercial Transit districts (NCTs) and Urban Mixed Use districts (UMUs). 62% of affordable housing and 79% of all housing is built in these districts, even though they make up just 17% of the city's residential land area.
- (h) Because form-based zoning is present in only certain neighborhoods, housing production is heavily focused in just eight neighborhoods, reducing housing opportunities in the rest of the City. Indeed, 85% of new housing is constructed in those eight neighborhoods: Downtown/South Beach, SoMa, Mission Bay, Potrero Hill/ Dogpatch, Bayview Hunters Point, the Mission, the Tenderloin, and Hayes Valley. Similarly, 82% of all new affordable housing has been built in these eight neighborhoods.
- (i) Personal vehicles are a major cause of global warming. Collectively, cars and trucks account for nearly one-fifth of all U.S. emissions, emitting around 24 pounds of carbon dioxide and other global-warming gases for every gallon of gas.
- (j) In San Francisco, 47% of carbon dioxide emissions come from transportation and 41% come from buildings. San Francisco has been able to reduce its carbon emissions by 41% from 1990 levels, but most of that reduction has come from reducing emissions from buildings; emissions from transportation has remained relatively stable.
- (k) In 2016, the Paris Climate Agreement committed national governments to pursue efforts to limit temperature rises to 1.5 degrees Celsius. In 2018, the Intergovernmental Panel on Climate Change (IPCC) issued a special report on the impacts of global warming and the

need to significantly reduce global greenhouse gas emissions well before 2030 to reduce the most detrimental impacts to ecosystems and to human health.

- (I) In 2018, the United States' Fourth National Climate Assessment made clear that climate change will wreak havoc across the United States, and that the current pace and scale of national climate action are not sufficient to avert substantial damage to the environment, human health, and economy. According to the San Francisco Department of Public Health's Climate and Health Adaptation Framework (2017), the direct and indirect impacts of climate change will disproportionately affect San Francisco communities least able to prepare for, cope with, and recover from those impacts. Those communities include communities of color, low-income communities, and other vulnerable populations.
- (m) San Francisco, the Bay Area, and the State of California are already suffering the effects of climate change in the form of droughts, air pollution, extreme heat, frequent wildfires, flooding, and much more.
- (n) At the 2018 Global Climate Action Summit, San Francisco committed to meet the Paris Agreement by achieving a net zero city by 2050. The City joined in a Climate Equity Pledge to ensure that the City's 2020 Climate Action Strategy update achieves the dual goals of advancing racial equity and decreasing carbon emissions.
- (o) San Francisco's climate commitments and climate action strategy are framed by the City's "0-80-100-Roots" framework, which defines climate and sustainability goals in four key areas: zero waste ("0% zero waste"), transportation ("80% low-carbon trips"), energy ("100% renewable energy"), and carbon sequestration ("Roots").
- (p) One of the City's fundamental goals in implementing the 0-80-100-Roots Climate

 Action Framework is to promote equity by ensuring that implementation reflects and responds
 to the economic, and social needs of different San Francisco vulnerable communities.

- (q) Achieving the "0-80-100-Roots" goals in the City will mean cleaner air, fewer vehicles on the road, more reliable transit systems, more bike lanes and pedestrian-friendly networks, highly efficient homes and businesses powered by 100% clean electricity, a robust urban tree canopy, plentiful green spaces, improved soil health, and a regenerative ecosystem.
- (r) Meaningful climate solutions will require increasing supplies of high-quality housing affordable to households at all income levels and located near local and regional transit services. These solutions will also require well-coordinated land use and transportation planning and investments to support low-carbon trips using efficient travel modes such as transit, walking, and biking, to reduce vehicle miles traveled and associated emissions.
- (s) In 2019, the Board of Supervisors unanimously adopted Resolution No. 160-19, declaring a climate emergency in San Francisco, and advocating for immediate action to address the climate crisis, limit global warming to 1.5 degrees Celsius, and eliminate greenhouse gas emissions.
- (t) The Department of the Environment's 2019 report titled "Focus 2030: A Pathway to Net Zero Emissions" shows that achieving accelerated emissions reductions by 2050 will require an ongoing commitment that builds upon and surpasses San Francisco's past successes and increases resources accordingly to continue to reduce emissions all the way to net zero.
- (u) In 2021, the Board of Supervisors adopted Ordinance No. 117-21, which established the following targets for reducing San Francisco Greenhouse Gas Emissions: (1) by 2030, a reduction in Sector-Based Greenhouse Gas Emissions of at least 61% compared to 1990 levels; (2) by 2030 a reduction in Consumption Based Greenhouse Gas Emissions to 30 mtCO2e per household or less, equivalent to a 40% reduction compared to 1990 levels; (3) by 2040 achievement of Net Zero Sector-Based Greenhouse Gas Emissions by reducing

such emissions by at least 90% compared to 1990 levels and sequestering any residual emissions; and (4) by 2050, a reduction in Consumption-Based Greenhouse Gas Emissions to 10 mtCO2e per household or less, equivalent to an 80% reduction compared to 1990 levels.

- (v) In 2014, San Francisco adopted Vision Zero as City Policy, which seeks to eliminate traffic deaths on our streets by 2024.
- (w) Between 2014 and 2021, the City had on average 28 traffic deaths a year, or 223 deaths in total.
- (x) In addition to designing better roads and improving enforcement, traffic deaths can be reduced by discouraging private automobile travel within the City and encouraging public transit and active forms of transportation like walking and biking.
- (y) With less space dedicated to the automobile, more space can be used for housing as well as creating a more livable and vibrant city by reducing noise and air pollution, expanding green space, and creating more people-oriented spaces.

Section 3. The Planning Code is hereby amended by revising Sections 102 and 207, to read as follows:

SEC. 102. DEFINITIONS.

Automotive Service Station. A Retail Automotive Use that provides motor fuels and lubricating oils directly into motor vehicles and minor auto repairs (excluding engine repair, rebuilding, or installation of power train components, reconditioning of badly worn or damaged motor vehicles, collision service, or full body paint spraying) and services that remain incidental to the principal sale of motor fuel. Repairs shall be conducted within no more than three enclosed service bays in buildings having no openings, other than fixed windows or

exits required by law, located within 40 feet of any R District. It may include other incidental services for automobiles including, but not limited to, accessory towing, if the number of towing vehicles does not exceed one, and all towed vehicles stored on the premises are limited to those vehicles that are to be repaired on the premises. This use is subject to the controls in Sections 187.1, and 202.2(b), and 202.5.

SEC. 207. DWELLING UNIT DENSITY LIMITS.

(c) Exceptions to Dwelling Unit Density Limits. An exception to the calculations under this Section 207 shall be made in the following circumstances:

(8) Replacing Auto-Oriented Uses with Housing.

(A) Purpose. The purpose of this subsection (c)(8) is to encourage housing development on parcels that are being used for Auto-Oriented Uses, with the goal of easing the City's housing shortage while addressing the adverse impacts that automobiles have on climate change, pedestrian safety, and livability.

(B) Definition. For the purposes of this subsection (c)(8), an Auto-Oriented Use shall mean any parcel that has, or had as its last permitted use, an accessory parking lot or garage, or any use defined as an Automotive Use in Planning Code Section 102.

(C) Applicability. This subsection (c)(8) shall apply to all properties (i) with an Auto-Oriented Use on which a residential use is permitted as a Principal Use but does not contain a Residential Use, and which also (ii) have not had a Legacy Business, as defined in Administrative Code Section 2A.242(b), on the site for four years prior to submittal of an application under this subsection (c)(8). Notwithstanding the previous sentence, this subsection (c)(8) shall not apply to properties located in RM or RC districts, or to properties located in a designated historic

1	district under Article 10 of this Code. Sites that contain a business that has been nominated for
2	inclusion in the Legacy Business Registry shall be ineligible for this subsection (c)(8), unless the Small
3	Business Commission finally determines that such business does not meet the criteria for a Legacy
4	Business under Administrative Code section 2A.242(b).
5	(D) Density Controls. Notwithstanding any other provision of this Code,
6	eligible properties shall be subject to the following density controls:
7	(i) Eligible Sites in RH Zoning Districts: Four Dwelling Units per lot as
8	a Principally Permitted use.
9	(ii) Eligible Sites in Other Zoning Districts: Density shall be regulated
10	by the permitted height and bulk, and required setbacks, exposure, open space, and any adopted design
11	standards or guidelines for each parcel as a Principally Permitted Use. Notwithstanding any contrary
12	provision of this Code, projects using this subsection (c)(8) may also seek a density bonus under
13	Section 206.6.
14	(E) Conditional Use. Any other Conditional Use required by this Code that is
15	not related to permitted residential density shall continue to apply.
16	(F) Parking Requirements.
17	(i) Residential Parking. Proposed projects using the density
18	exception in this subsection (c)(8) are subject to the following parking controls:
19	P: up to 0.25 parking spaces per residential unit
20	C: up to 0.5 parking spaces per unit
21	NP: above 0.5 spaces per unit
22	(ii) Non-Residential Parking. Notwithstanding any other provision of
23	this Code, up to 75% of Non-Residential Parking otherwise allowed by this Code shall be permitted for
24	projects using the density exception in this subsection (c)(8).

(G) Review of Program and Limit on Number of Residential Units. The

Planning Department shall include the number and location of projects using this subsection (c)(8) and number of units provided in such projects in the Housing Inventory Report. This subsection (c)(8) shall remain in effect until the Planning Department approves a total of 5,000 residential units under the authority of this subsection (c)(8). When the Planning Director certifies in writing that the Planning Department has approved 5,000 residential units under this subsection 207(c)(8), the subsection shall expire by operation of law, and the City Attorney shall cause the subsection to be removed from the Planning Code.

Section 4. The Planning Code is hereby amended by deleting Section 202.5 in its entirety, as follows:

SEC. 202.5. CONVERSION OF AUTOMOTIVE SERVICE STATIONS.

- —(a) Findings.
- (1) The recent trend toward conversion of service stations to non-service station use has resulted in the curtailment of essential services, including automobile refueling and emergency services, and is contrary to the public health, safety, peace and general welfare.
- (2) To address this problem, the Board of Supervisors adopted Resolution No. 759-89 to impose interim controls on the conversion of service stations and to create a task force to study this problem and make recommendations to this Board regarding how to address this problem.
- (3) In the 17 months since Resolution 759-89, 11 more service stations have been converted to other uses. The Service Station Conversion Task Force has recommended that the Board of Supervisors adopt permanent legislation to address this problem.
- (4) The Board of Supervisors recognizes that service station operators and those who own property on which such stations are located are entitled to earn a fair rate of return on their

investment. Where a fair rate of return is being earned, the Board finds that service stations should be
allowed to convert to other uses only where it is determined that the conversion would benefit the
public.

- (b) Definitions. Whenever used in this Section, unless a different meaning clearly appears from the context:
- (1) "Automotive Service Station" or "service station" shall mean a retail automotive service use as defined in Section 102 of this Code.
- (2) "Conversion" shall mean to change the use of a property from a service station use to a different type of use.
 - (3) "Return on investment" shall mean:
- (A) where the property owner does not own the Automotive Service Station business, the before income tax total annual rent and other compensation received from the service station business for the lease of the land and buildings, less the expenses of the lessor, on a cash basis.
- (B) where the property owner also owns the Automotive Service Station business, the before income tax profit on the sale of all goods and services at the service station, including the sale of gasoline, less the cost of goods sold and operating costs, on a cash basis.
- (4) "Total investment in the property" shall mean the fair market value of the property at the time the application is filed with the Zoning Administrator.
- (5) "Demolition" shall mean the physical removal of underground, and/or surface tanks used in storage and dispensing of gasoline and/or any building or canopy without the replacement of such equipment or structures to allow continued operation of the service station.
 - -(c) Limitation on Conversions.
- (1) No owner of a property used as an Automotive Service Station shall change the use of the property to a different type of use without first applying for and receiving either a Conditional Use authorization from the City Planning Commission, or a conversion determination from the Zoning

Administrator. Such authorizations shall be in addition to any other permit or authorization required for a proposed service station conversion under any applicable City, State or federal law or regulation. Automotive Service Stations which front on Primary Transit Streets or Citywide Pedestrian Network Streets, as designated in the General Plan, shall be exempt from the conversion limitations of this Section. The procedures for service station conversion applications shall be as described in Sections 306 and 306.1 of this Code for conditional use and variance actions.

(2) Either the Planning Commission or the Zoning Administrator shall determine at a public hearing whether an applicant is entitled to convert the service station, depending on the grounds on which the permit is sought. The Planning Commission shall make Conditional Use authorization determinations based on the criteria set forth in Subsection (d). The Zoning Administrator shall make service station conversion determinations under the grounds set forth in Subsection (e). An applicant may, but need not, apply to the Planning Commission for a Conditional Use authorization pursuant to Subsection (d) and apply to the Zoning Administrator for a conversion authorization pursuant to Subsection (e), provided that if either one approves the application at the first hearing held on it, no hearing shall be necessary before the other. The procedures for service station conversion hearings shall be as described in Sections 306 through 306.5 and 306.8 of this Code for conditional use action (Planning Commission hearings) and variance action.

—(d)—Criteria for Planning Commission Conditional Use Authorization. In acting on any application for Conditional Use authorization for conversion, the Commission shall consider the following criteria in lieu of the criteria set forth in Section 303(c) of this Code.

(1) The Planning Commission shall approve the application and authorize the service station conversion if it determines from the facts presented that the reduction in availability of automotive goods and services resulting from the service station conversion would not be unduly detrimental to the public because either:

(B) A written statement from an independent Certified Public Accountant summarizing
the applicant's financial records, including the property appraisal and stating the return on investment
calculated pursuant to Section 102;
(C) A certified statement from the Certified Public Accountant identifying the owner of
the property and the owner of the service station business;
(D) Such other financial information as the Zoning Administrator may reasonably
determine is necessary to make the determination provided for in this Section.
— (2) Rebuttable Presumption. There shall be a rebuttable presumption that the property
owner is earning a Fair Return on Investment if the property owner has earned at least a 9% return on
the property owner's total investment in the property for the 24-month period immediately preceding
the filing of the application, or in the case of a service station business that ceased operations after
October 12, 1989, for the 24-month period immediately preceding the date the service station ceased
operations. The property owner may rebut this presumption by offering evidence demonstrating that
because of special facts regarding his or her property the property owner is not earning a Fair Return
on Investment or that because of special demonstrated circumstances the applicant would not earn a
fair return on investment from service station use during that 12-month period after the filing of the
service station conversion application.
— (3) Notice of Hearing. Prior to conducting the hearing required by subsection (c)(1), the
Zoning Administrator shall provide public notification of the hearing pursuant to the requirements of
Section 333 of this Code.
— (4) Determination. The Zoning Administrator shall render written determination within 60
days of the hearing.
(5) Consultation With Other City Departments. If necessary, the Zoning Administrator

shall have the authority to consult with or retain the assistance of the staffs of the Department of Public

Works, Real Estate Department, and Mayor's Office of Workforce and Economic Development in the review of applications for service station conversion.

- -(f) Demolition and Tank Removal.
- (1) No service station shall be demolished except to enable a new service station to be constructed on the property, unless:
- (A) The property owner has first obtained a conditional use authorization from the Planning Commission pursuant to Subsection (d) above or a conversion determination from the Zoning Administrator pursuant to Subsection (e) above; or
- (B) The Department of Building Inspection and the Bureau of Fire Prevention and Public Safety determines that the building is unsafe or dangerous and that demolition is the only feasible means to secure the public safety.
- (2) Notwithstanding subsections (f)(1)(A) and (f)(1)(B) above, if a service station is owned by a lessee of the property and the property lease was signed prior to the effective date of Ordinance 288-91, which lease permits or requires the lessee to remove the service station from the property before or after the expiration or termination of the lease, and the lease has expired or terminated or will do so within 60 days, the lessee may cease operation of the service station as permitted or required in the lease. Nothing in this provision, however, shall relieve the property owner from continued use of property as an Automotive Service Station as defined by Sections 102 and 890.18 of this Code or the requirements of subsection (f)(1)(A) above.
- (3) This Section shall not limit the removal of any underground storage tank at a service station where removal of the tank is required to comply with any other local, State or federal law or regulation or where the Director of Public Health or a State or federal regulatory agency with jurisdiction over underground storage tanks determines that the tank poses, or removal of the tank is necessary to mitigate, a threat to public health or safety, including but not limited to waters of the State. All appropriate permits (other than the authorizations required by this Section for conversions)

shall be obtained prior to such authorized tank removals. The removal of an underground tank

pursuant to this Section does not otherwise exempt a property owner from the requirement of obtaining

conditional use authorization to convert an Automotive Service Station.

Section 5. PLANNING CODE AMENDMENTS TO ZONING CONTROL TABLES TO CONFORM TO DELETION OF PLANNING CODE SECTION 202.5.

Consistent with Section 4 of this ordinance, which deletes Section 202.5, "Conversion of Automotive Service Stations," from the Planning Code:

(a) The following Zoning Control Tables in Planning Code Article 2 are revised to delete the cross-reference to Planning Code Section 202.5 where "Automotive Service Station" is listed in the tables:

Table 210.1 (C-2 Districts: Community Business)

Table 210.2 (C-4 Districts: Downtown Commercial)

Table 210.3 (PDR Districts)

(b) The following Neighborhood Commercial and Neighborhood Commercial Transit Zoning Control Tables in Planning Code Article 7 are revised to delete the cross-reference to Planning Code Section 202.5 where "Automotive Service Station" is listed in the tables:

SEC. 899. OTHER APPLICABLE SECTIONS OF THE PLANNING CODE.

Certain sections of the Planning Code in Articles other than this Article also apply to Mixed Use Districts. Such sections and their titles are listed below. The following listing is set forth for convenience; in the event of any omission of a provision, that provision shall nevertheless still apply.

Uses

* * * *

Section 202.5 Conversion of Automotive Service Stations

* * * *

Section 7. Effective Date. This ordinance shall become effective 30 days after enactment. Enactment occurs when the Mayor signs the ordinance, the Mayor returns the ordinance unsigned or does not sign the ordinance within ten days of receiving it, or the Board of Supervisors overrides the Mayor's veto of the ordinance

.....

Section 8. Scope of Ordinance. In enacting this ordinance, the Board of Supervisors intends to amend only those words, phrases, paragraphs, subsections, sections, articles, numbers, punctuation marks, charts, diagrams, or any other constituent parts of the Municipal Code that are explicitly shown in this ordinance as additions, deletions, Board amendment additions, and Board amendment deletions in accordance with the "Note" that appears under the official title of the ordinance. Section 5 of this ordinance is an exception to the foregoing sentence, because Section 5 mandates changes in the Planning Code without adhering to the specifics of the above-referenced Note.

City and County of San Francisco Tails Ordinance

City Hall
1 Dr. Carlton B. Goodlett Place
San Francisco, CA 94102-4689

File Number:

220811

Date Passed: December 13, 2022

Ordinance amending the Planning Code to increase density on lots with auto-oriented uses where housing is permitted, except for Residential-Mixed (RM) and Residential-Commercial (RC) districts and designated historic districts, but which do not currently have any residential use or a legacy business, and to remove the Conditional Use requirement to change the use of an Automobile Service Station or Automotive Use to another use, and amend zoning control tables to reflect this change; affirming the Planning Department's determination under the California Environmental Quality Act; making findings of consistency with the General Plan and the eight priority policies of Planning Code, Section 101.1; and making findings of public necessity, convenience, and welfare as required by Planning Code, Section 302.

July 11, 2022 Land Use and Transportation Committee - CONTINUED TO CALL OF THE CHAIR

December 05, 2022 Land Use and Transportation Committee - RECOMMENDED AS COMMITTEE REPORT

December 06, 2022 Board of Supervisors - PASSED ON FIRST READING

Ayes: 11 - Chan, Dorsey, Mandelman, Mar, Melgar, Peskin, Preston, Ronen, Safai, Stefani and Walton

December 13, 2022 Board of Supervisors - FINALLY PASSED

Ayes: 11 - Chan, Dorsey, Mandelman, Mar, Melgar, Peskin, Preston, Ronen, Safai, Stefani and Walton

I hereby certify that the foregoing Ordinance was FINALLY PASSED on 12/13/2022 by the Board of Supervisors of the City and County of San Francisco.

> Angela Calvillo Clerk of the Board

London N. Breed Mayor
